Add a Training Approval Process to an Existing Item 305

Managing Communities 306

Create a General Community 306
Designate Moderators for a Community 308
Add a Community to an Existing Item 309

Glossary 311

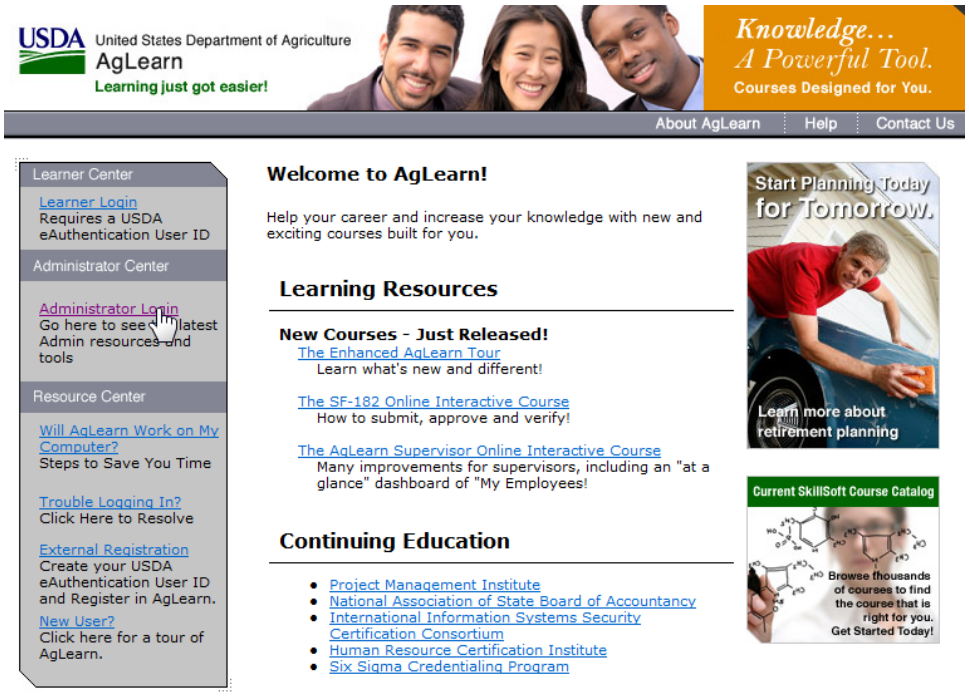
The Administration Environment

Notes:

The Administration environment of AgLearn provides administrators with the ability to track the range of information needed to manage USDA learning programs effectively. This section provides an overview of the Administration environment, examples of common screen types, and job aids for referencing menu options and universal controls (i.e., common buttons, links, and icons) descriptions.

Go to **http://www.aglearn.usda.gov** and follow these steps to login as an Administrator to AgLearn:

- On the Learner Welcome page, click **Administrator Login** to reach the Administrator Welcome Page.
- On the Administrator Welcome Page, click **Administrator Login**.
- Click **Continue** to accept the security admonition.
- Enter your e-Authentication credentials.



Notes:

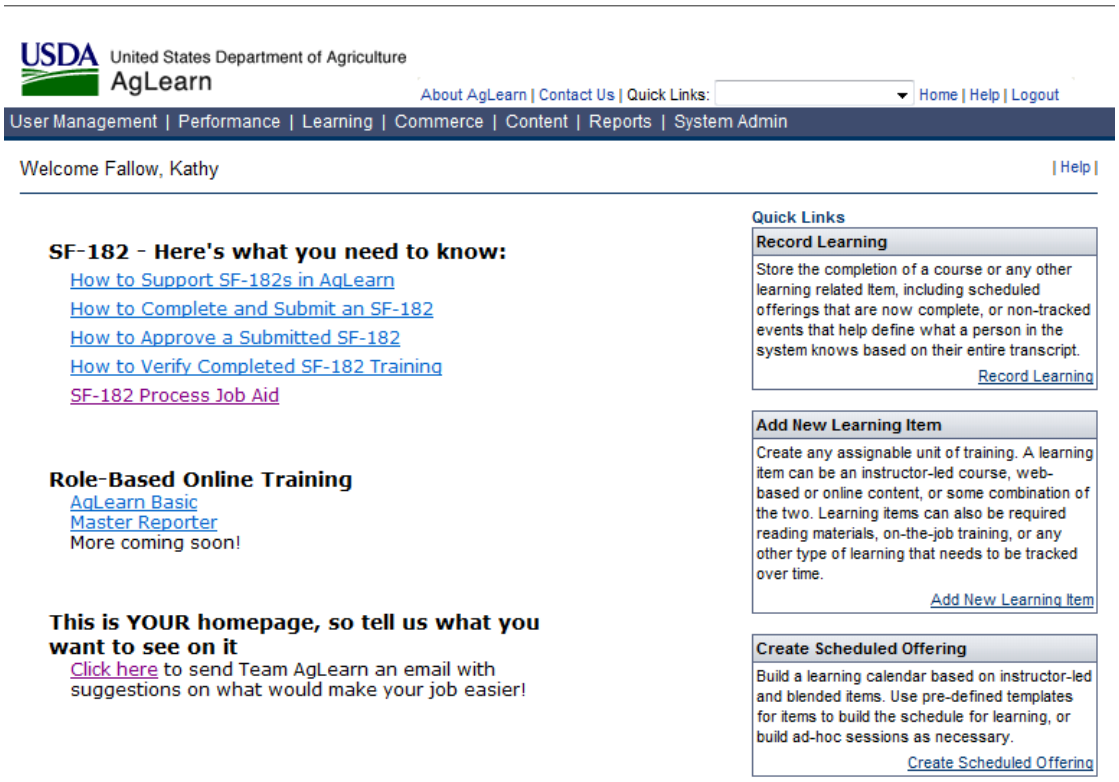
Note: Your view of the Administrator Home Page will depend on the specific role you've been assigned.

Administrator's Home Page

The **Administrator's Home Page** is the first screen that displays after logging in to the Administration environment of AgLearn. There are seven different views in the Administration environment:

- User Management
- Performance
- Learning
- Commerce
- Content
- Reports
- System Admin

The menu displays and options are restricted according to the permissions directly associated with AgLearn administration role of the person logged in. Areas in which an administrator does not have permission to work will not display.



Notes:

Administration Environment Interface

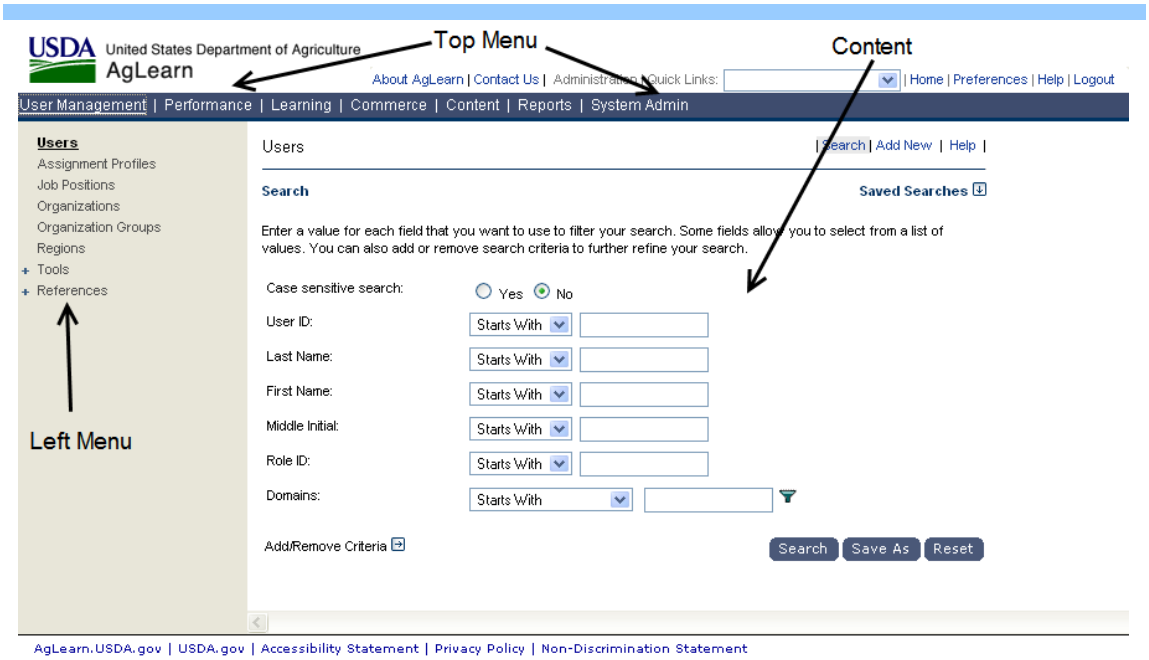
The interface for the Administration environment of AgLearn is comprised of three frames:

- Top Menu
- Left Menu
- Content

The **Top Menu** frame contains three buttons (universal controls) in the upper right corner and nine menu options spanning across the frame. Privileges assigned to each role determine which menu options are visible and accessible to the person logged in to AgLearn.

As **Top Menu** frame options are selected, corresponding sub-menu options are displayed in the **Left Menu** frame.

Note: See the **Menu Options** and **Menu Descriptions** tables for detailed information pertaining to the **Top Menu** frame. Also see the **Universal Controls** table for detailed information pertaining to buttons, fields, links, and tabs available throughout AgLearn.



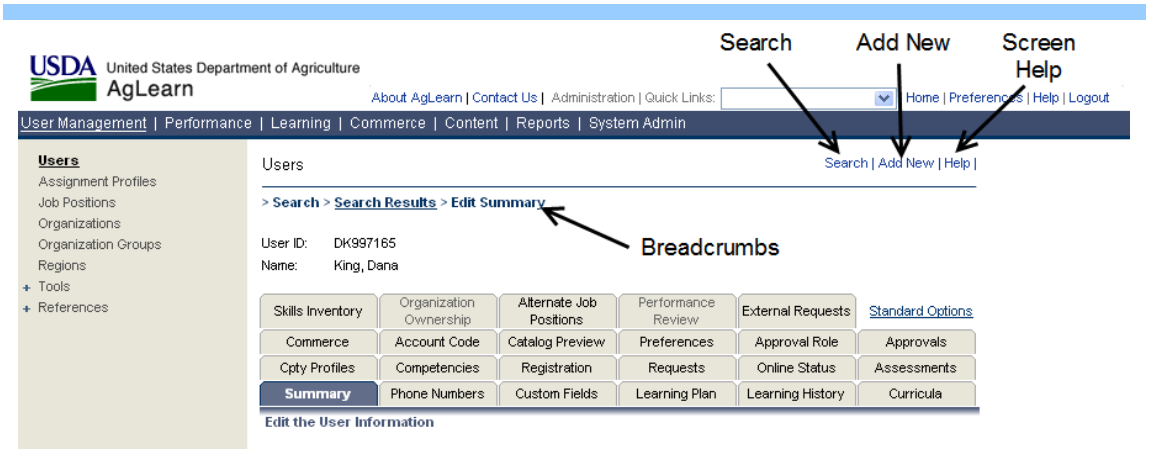
Notes:

Administration Environment Interface, continued

The **Content** frame is the "working area," where searches are conducted and data/information is edited and viewed. There are several features which appear on the majority of screens in the **Content** frame:

- A "breadcrumb," or path, appears in the upper left corner of each **Content** frame and identifies a person's current location within AgLearn. (In this example, the "breadcrumb" indicates the person is at the **> Search** screen.)
- The context-sensitive **Help** link is located in the upper right corner of the **Content** frame and provides access to context-sensitive help.
- **Simple** and **Advanced Search** links are located in the upper right corner of the **Content** frame and provide the ability to conduct simple and advanced context-sensitive searches.
- Universal controls appear throughout AgLearn and provide the functionality for managing information.

Note: See the **Universal Controls** table at the end of this section for detailed information pertaining to them.



Notes:

Screen Types

There are several types of screens comprising the **Content** frame. Below is a partial list of common screens types appearing throughout AgLearn:

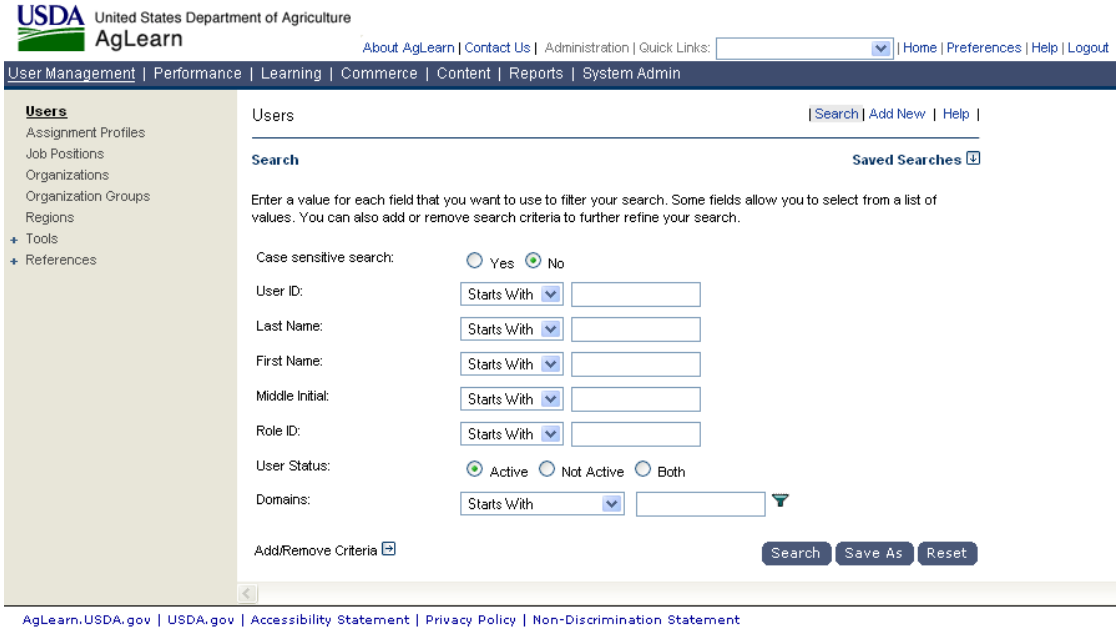
- Search
- Results Tab
- Screens with Tabs
- Screens with Sections
- Reports
- Assistants

Notes:

Screen Types/Search

The **Search** screen is typically the default screen appearing when an option from the **Top Menu** frame is selected. This screen provides the ability to define criteria for narrowing a search. Depending upon the number of search criteria available, both **Simple** and **Advanced Search** options are available.

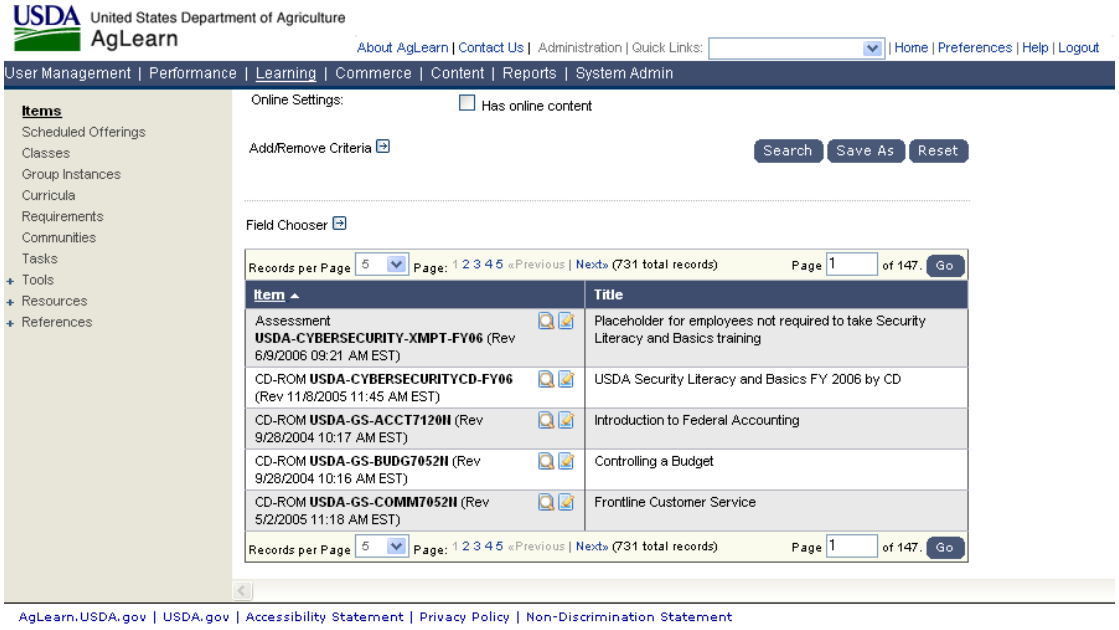
Note: See the **Universal Controls** table at the end of this section for detailed information pertaining to each control.



Notes:

Screen Types/Results

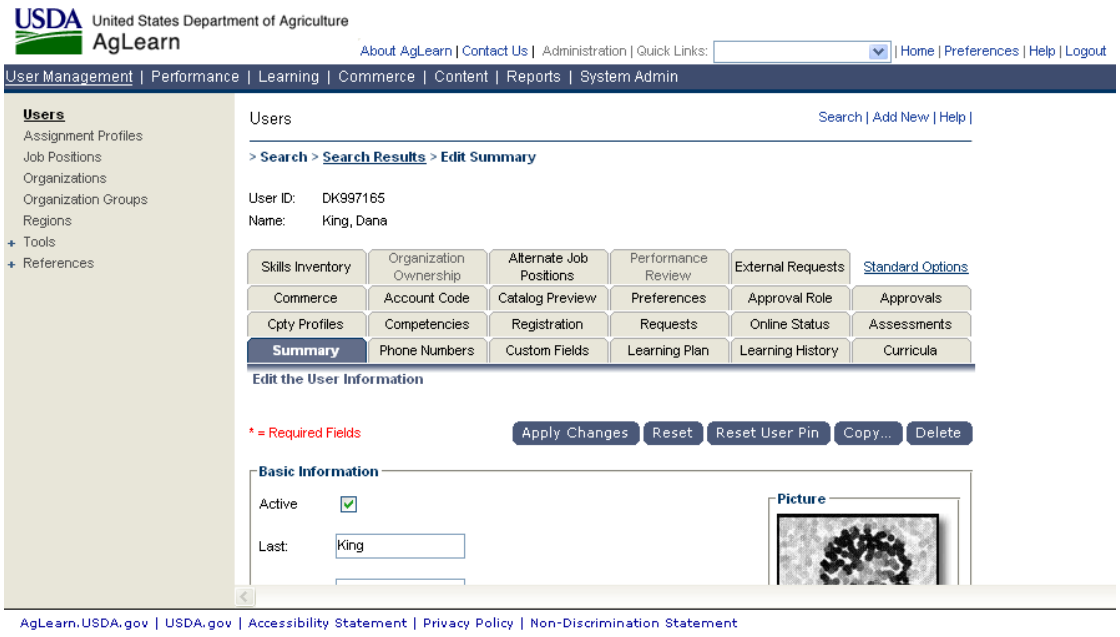
When criteria are entered on a **Search** screen and the **Search** button is clicked, the **Results** display at the bottom of the **Search** screen. Clicking the appropriate icon next to a result allows the administrator to view or edit that result based upon the permissions/role of the person logged into AgLearn.



Notes:

Screen Types/Tabs

Screens containing a great deal of data use tabs to present the information in a categorized fashion rather than displaying all of the information on one very long screen. The currently selected, or **active** tab, appears in dark blue. Clicking a tab provides the opportunity to view/edit the information on that tab. If edits are made to information on a tab, **Apply Changes** must be clicked prior to clicking a different tab (or information will be lost).



Notes:

AgLearn uses the term Modules instead of Sections.

This screen illustrates two different sections – the **Add this Scheduled Offering to the Catalog** section and the **Update the Catalog Prices for the Scheduled Offering** section.

Screen Types/Screens with Sections

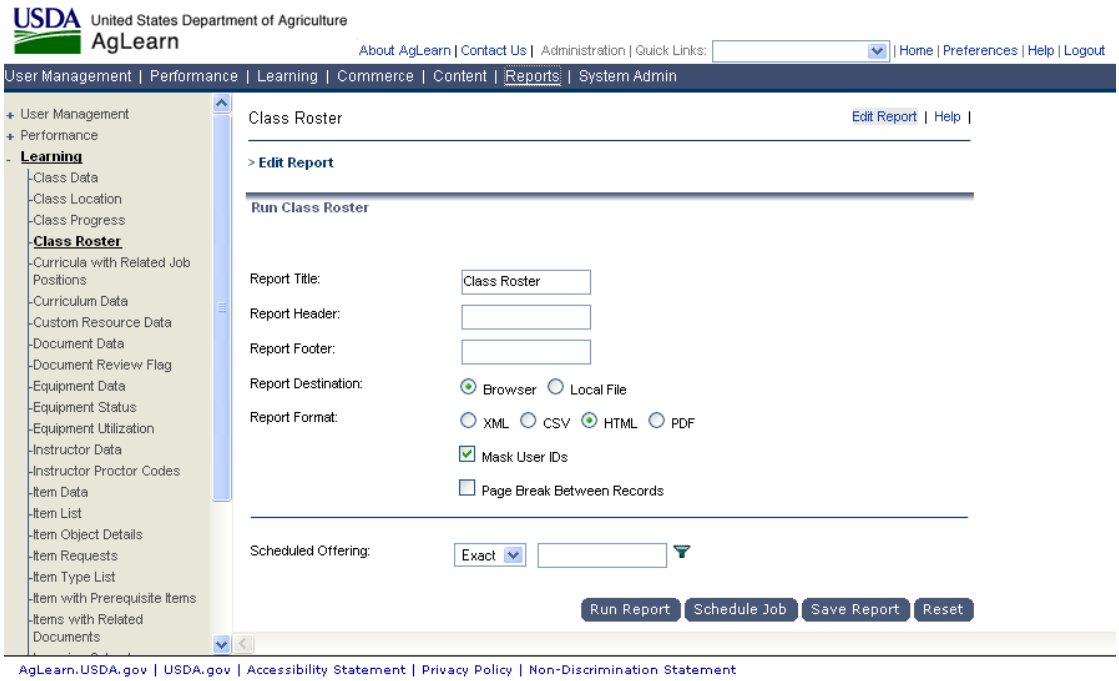
Many screens are divided into different sections to group similar information or provide the ability to perform several tasks on one screen. Sections are separated from one another by section headers.

Notes:

Screen Types/Reports

Reports are used to display and print AgLearn data. AgLearn report screens provide the ability to run a report immediately upon identifying the appropriate criteria, or to schedule the report to run at a later time.

Note: See the **Menu Options** table to view a complete list of reports available in AgLearn.

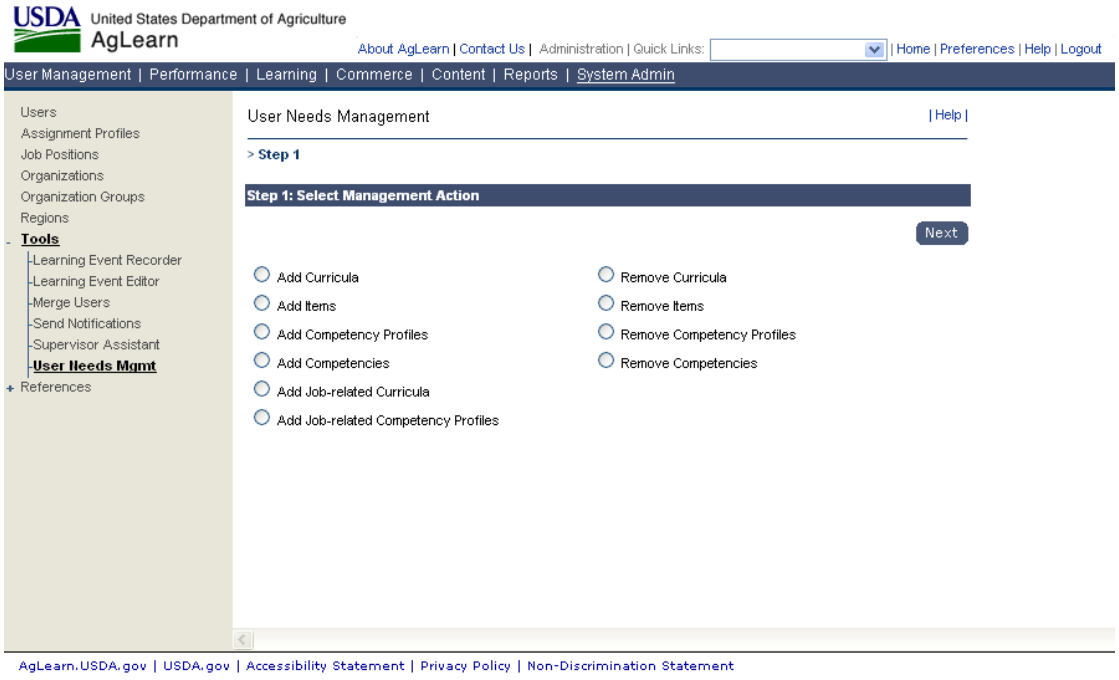


Notes:

Screen Types/Assistants

Assistants are time saving “wizards,” used to perform certain tasks in a sequential, step-by-step, fashion. When working with an assistant, provide the information requested on a screen, then click **Next** to proceed to the following screen in the sequence (or the next step).

Note: See the **Menu Options** table to view a partial list of assistants available in AgLearn.



Menu Descriptions

The table below lists the seven menu options, with their corresponding descriptions, available to the AgLearn administrator.

Menu Option	Example	Description
User Management	User Management	The **User Management** menu option provides access to those system functions used to manage general User information, User competency assessments, and User learning events.
Performance	Performance	The **Performance** menu option allows the administrator to manage competencies, performance evaluations, and succession planning.
Learning	Learning	The **Learning** menu option provides access to those system functions used to manage competencies, learning items (including online items), content objects, exam and survey objects, objectives, competency profiles, curricula, and questions.
Commerce	Commerce	The **Commerce** menu option provides access to those system functions used to track and update commercial transactions of Users and/or organizations defined in AgLearn.
Content	Content	The **Content** menu option provides access to those system functions used to manage online content, such as content objects (courseware), surveys, questions, and exam objects.
Reports	Reports	The **Reports** menu option provides access to those system functions used to generate any available AgLearn reports.
System Admin	System Admin	The **System Admin** menu option provides access to those system functions used to manage AgLearn application variables and settings, security and data domain privileges, custom columns, default notification messages, custom reports, and administrator information.

Menu Options

The table below lists the seven menu options, with their corresponding sub-menu options, available to the AgLearn administrator.

User Management	Performance	Learning	Commerce	Content	Reports	System Admin
Users	Competencies	Items	Catalogs	Content Objects	User Management	+ Application Admin
Assignment Profiles	Competency Profiles	Scheduled Offerings	Master Inventory	Content Packages	Performance	+ Security
Job Positions	Succession Planning	Classes	Account codes	Questions	Learning	+ Automatic Processes
Organizations	Skill Search	Group Instances	Order Management	Exam Objects	Content	+ Configuration
Regions	+ Tools	Curricula	Unused order Tickets	Objectives	System Admin	+ Custom Columns
+ Tools	+ References	Requirements	Financial Transaction Approval	Documents		+ Tools
+ References		Communities	+ Tools	+ Tools		+ References
		Tasks	+ References			
		+ Tools				
		+ Resources				
		+ References				

Universal Controls

The table below lists common examples of universal controls, with their corresponding descriptions, available throughout AgLearn.

Menu Option	Example	Description
Tabs	Notifications / Cost Calculation / Summary / Segments	**Tabs** contain information relevant to the selected record. Selecting a tab provides the opportunity to view and edit the information appearing on the tab.
Apply Changes	Apply Changes	The **Apply Changes** button saves changes made to information appearing in the corresponding section of a screen. **Important**: Changes made to **any** record will **not** be saved unless the **Apply Changes** button is clicked **before** moving to another screen.
Reset	Reset	The **Reset** button resets all fields on the corresponding screen to their original values.
Add	Add	The **Add** button creates a new record corresponding to the selected submenu option (e.g., if **Learning/Items** is selected, clicking the **Add** button provides the opportunity to create a new Item record).
View		The **View** button appears on a **Results** screen and displays the corresponding record.
Edit		The **Edit** button appears on a **Results** screen and opens the corresponding record in Edit mode.
Delete	Delete	The **Delete** button appears on a **Summary** tab and deletes the corresponding record. (You will be asked if you are sure before the record is deleted. There is no “Undo” key in AgLearn.)
Records per Page	Records per Page 10	The **Records per Page** field indicates the number of records to be shown on each screen
Search	Search	The **Search** button performs a search based on the criteria selected on the **Search** screen.
Expand Tree		The **Expand Tree Icon** indicates the data displayed is the parent of several other nested components. Click the icon to display the entire hierarchy.
Collapse Tree		The **Collapse Tree Icon** folds all child components under the parent.
Filter		The **Filter** icon opens a separate window to define search parameters.
Expand		The **Expand** icon will open a pop-up window with additional options for the parameter with which it is associated.
More Options		The **More Options** icon will open a pop-up window with additional options for the parameter with which it is associated.
Search		The **Search** icon performs a search based on the criteria selected on the **Search** screen.
Add one or more from list	add one or more from list	The **Add one or more from list** link displays a search screen from which a search is conducted.
Calendar		The **Calendar** icon opens a separate window to select and enter a date in its corresponding field.
Next	Next	The **Next** button displays the next screen in a sequence when using one of the Assistants.
Previous	Previous	The **Previous** button displays the previous screen in a sequence when using one of the Assistants.
Submit	Submit	The **Submit** button submits the information entered on previous screens and completes the process when using an Assistant.

Menu Option	Example	Description
Add New	Add New	The **Add New** link, located in the upper right corner of the **Content** frame, is available from the **Search** screen and provides the ability to add a new record (e.g., to add a new User, click **Add New** on the Users search screen).
Context-Sensitive Help	Help	**Context-Sensitive Help**, which is located in the upper right corner of the **Content** frame, displays in a new window the help screens relevant to the corresponding sub-menu option.
Help	Help	The **Help** button, which is located in the upper right corner of the **Top Menu** frame, opens the entire AgLearn Online Help System.
Home	Home	The **Home** button, which is located in the upper right corner of the **Top Menu** frame, displays the **Administration Main Menu** screen.
Logout	Logout	The **Logout** button, which is located in the upper right corner of the **Top Menu** frame, ends the current AgLearn session.

Notes

Managing Data Entry and Searches

A number of search screens in AgLearn make it easy to find data by applying a search filter. Search filters can be created to suit any eventuality by adding or removing search criteria at will. Most administrators will find a regular set of search criteria that meets their most common needs, and will make only occasional changes for special circumstances.

Search-specific tasks include the following: **Personalize a Search**, **Perform a Search**, **Personalize Search Results**, **Save a Search**, **Execute a Saved Search**, **Perform a Select or Add From List Search**, **Select and Enter a Date via the Calendar Icon** and **Perform a Selection via the Selection Icon**.

A Day-in-the-Life Scenario

You need to be able to find all users whose last names begin with the letter "S." You also need to know how many users reside in a specific domain.

Adding/Removing Search Criteria

The search screen is available on many menus. The User Management menu is being used for illustration purposes.

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Click the **Expand** icon next to **Add/Remove Criteria**	3.	Check (or uncheck) the boxes for the criteria you want to use.	4.	Click **Submit Query.**	
5.	The options you selected will appear for subsequent searches.	
Notes

The **Simple Search** screen opens when some left hand menu items are selected.

To go to a specific page number, enter the desired number in the Page field and then click **Go**.

Not all action icons associated with records in a search results screen may be displayed. The displayed actions are determined by the permissions given to the assigned role.

Performing a Search

Step	Activity	View
1.	Select the **User Management** menu. **Note**: The search screen is available on many menus. The **User Management** menu is being used for illustration purposes.	
2.	Enter and/or select the basic search criteria as appropriate. **Note**: The data fields may be left blank to select from an entire list.	3.	Click **Search**.	
4.	Review search results.	5.	If necessary, select the **Next Page** link to go to the next page of results.	
6.	Select **All** from the **Records per Page** drop-down list to display every record in the results.	7.	Select the **View**, or **Edit**, icon to perform the desired action.	
Notes

The search screen is available on many menus. The User Management menu is being used for illustration purposes.

Customizing Search Results

Once search results are displayed, you can add additional fields to be displayed on the search results screen.

Step	Activity	View
1.	Select the **User Management** menu.	User Management
2.	Click the **Expand** icon next to **Add/Remove Criteria**.	Field Chooser
3.	Check (or uncheck) the criteria you would like to see displayed for your subsequent search results.	**Field Chooser** 1 User ID 2 User Name 3 Domain ID 4 Supervisor Emp Status Emp Type Job Location Job Position Organization ID Active Address City State / Province Postal Code Country Hire Date Terminated Email Address Has Access Locked Region ID Role ID
4.	Click **Submit** to see the search results with the additional fields.	Submit

The search screen is available on many menus. The User Management menu is being used for illustration purposes.

Saving a Search

Step	Activity	View
1.	Select the **User Management** menu.	User Management
2.	Fill in your search parameters.	Case sensitive search: Yes No User ID: Starts With Last Name: Starts With First Name: Starts With Middle Initial: Starts With Domains: Starts With NRCS Items Needs: Exact Type: Web Based ID: USDA-PRIVACYBAS
3.	Click **Save As**.	Save As
4.	Enter a **Saved Search ID** and description.	* = Required Fields * Saved Search ID: Description: Submit
5.	Click **Submit**.	Submit

The search screen is available on many menus. The User Management menu is being used for illustration purposes.

Executing a Saved Search

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Click the **More Options** icon next to **Saved Searches**.	
3.	Select the saved Search you want to open.	4.	The **Search** form appears, with the saved parameters already filled in. Edit as needed.	5.	If you want to save any edits for future searches, click **Save**, or click **Save As** to save them under a different name.	
6.	Click **Search**.	

Performing a Select from List Search

Notes

The Select from list search is available on other screens. The Items screen is being used for illustration purposes.

The **List** link enables you to add criteria to the search filter.

The **select from list** link allows the user to select more than one result. The **selection** icon presents a list from which only one result may be selected.

At this point you can remove filter records if you wish by selecting the **Remove** check box.

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Items**.	
3.	Select the **Select from List** icon, or search for the **Item Type**.	4.	Select the **Select** or **Add** check box next to the record(s) requested.	5.	Click **Submit Selection**.	
6.	Verify the selection and click **Submit Filter**.	
Notes

The Calendar icon is available on many screens. The Scheduled Offerings screen is being used for illustration purposes.

Using the **Calendar** icon prevents date formatting errors.

You can also click on the **>** and **>>** symbols to change the month and year.

Selecting and Entering a Date via the Calendar Icon

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Scheduled Offerings**.	3.	Click the **Calendar** icon next to the desired field.	
4.	Select the month from the drop-down list.	8.	Click the increase or decrease buttons to change the year's display forward or backward.	9.	Select the desired date to enter the date and close the **Select Date** window. **Tip**: Select the **Today** link to set the date to the current day.	10.	Verify that the selected date appears in the **Date** field.	

Notes

The Selection icon is available on many screens. The Items screen is being used for illustration purposes.

Clicking the **Selection** icon will open a new Search window.

Leave any search fields blank to select from the entire list.

Click **Next** to move to additional pages of results or select **All** from the Results per Page drop down list to display all the results on the screen.

When the link is selected, the results window closes and the data is automatically entered into the field.

Performing a Selection When Only One Option May be Chosen

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Items**.	Items Scheduled Offerings Classes
3.	Select the **Add New** link.	| Search | Add New | Help |
4.	Click the **Search** icon next to the desired field to open a new **Pick** window.	* Domain ID:
5.	Enter or select the search criteria as appropriate.	Case sensitive search: Yes No Domain ID: Starts With Description: Starts With
6.	Click **Search**.	Search
7.	Review search results.	Records per Page 10 Page: 1 2 3 4 5 «Previous | Next» (87 total records) Page 1 of 9. Go Domain ID / Description AMS / AMS Select APHIS / APHIS Select APHIS-AC / APHIS: Animal Care Select APHIS-BRS / APHIS: Biotechnology Regulatory Services Select APHIS-IS / APHIS: International Services Select APHIS-LPA / APHIS: Legislative and Public Affairs Select
8.	Select the **Select** link of the record to be used for data entry.	Records per Page 10 Page: 1 2 3 4 5 «Previous | Next» (87 total records) Page 1 of 9. Go Domain ID / Description AMS / AMS Select APHIS / APHIS Select APHIS-AC / APHIS: Animal Care Select APHIS-BRS / APHIS: Biotechnology Regulatory Services Select APHIS-IS / APHIS: International Services Select APHIS-LPA / APHIS: Legislative and Public Affairs Select
9.	Verify that the selected data has been placed in the field.	* Domain ID: APHIS

Managing Users

Most of the personal User data in AgLearn is automatically populated through regular data feeds (Domain, address, Job Position, Pay Grade, etc.) or is entered manually by the Users themselves (supervisor, e-mail address, phone numbers). There are some personnel-related functions that Users cannot take care of, as they are associated with multiple accounts, or are designed to provide information to, or take action on behalf of, the User.

The **Merge Users** functionality is useful when multiple accounts have been created for the same User. **Supervisor Assistant** allows the administrator to quickly update AgLearn when a supervisor change is made, instead of waiting for all of the affected Users to do it individually.

Administrators can add or remove training directly from the User's learning plans, as well as modify the 'Required By' dates for training that has already been assigned.

Ad Hoc Notifications allow the administrator to directly communicate via e-mail with a subset of Users that may be created just for that communication. (All those who have not completed a specific Item, for instance.) **Direct Linking** allows a User to go directly to a specified AgLearn page by clicking a URL embedded in an e-mail, possibly one generated by an ad hoc notification.

SF-182 forms used as requests for external training can be created, modified, approved, and verified by administrators with the necessary workflows.

Assignment Profiles are powerful compilations of attributes that may be used for catalog access, Item or curriculum assignment, or any function that involves potentially large numbers of Users with specific similarities.

A Day-in-the-Life Scenario

- Due to well-intentioned, yet misguided, efforts, a User has multiple accounts in AgLearn. Other Users have changed supervisors. These conditions must be corrected, and notifications should be sent informing the affected Users.

Merging Users

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Tools**.	
3.	Select **Merge Users**.	

Merging Users

Step	Activity	View
4.	Use the search page to filter the list of Users. *Be sure that your search criteria will result in both User records appearing.* Click **Search**.	5.	Find the User whose records you wish to use as the secondary User. Click the corresponding **Merge from User ID** radio button.	
6.	Find the primary User into whom you want to merge the records. Click the corresponding **Merge Into User ID** radio button.	
7.	Click **Merge**.	
8.	Click **OK**.	
Supervisor Assistant

Step	Activity	View
1.	Select the **User Management** menu.	User Management
2.	Select **Tools**.	Regions + Tools + References
3.	Select **Supervisor Assistant**.	**Tools** -Learning Event Recorder -Learning Event Editor -**Merge Users** -Send Notifications -Supervisor Assistant -User Needs Mgmt
4.	In the **Supervisor ID** text box, type the ID of the current supervisor, or click the **Search** icon to find and select one.	**Step 1: Select Current Assigned Supervisor** * = Required Fields * Supervisor ID:
5.	Click **Next**.	Next
6.	In the **Supervisor ID** text box, type the ID of the new supervisor, or click the **Search** icon to find and select one.	**Step 2: Select New Assigned Supervisor** * = Required Fields * Supervisor ID:
7.	Click **Next**.	Next

Supervisor Assistant

Step	Activity	View
8.	All Users under the Current Supervisor are displayed. To add a User to the list, type the User ID in the **User ID** text box, or click the **Add one or more from list** link to use a search page and select multiple Users. You can also remove Users from the supervisor's list by clicking **Remove** on the appropriate line(s).	
9.	When you are satisfied the list is complete, click **Next**.	
10.	Review the information. The User records displayed should reflect the new supervisor. If satisfied, click **Finish**. If not satisfied, click **Previous** to return to Step 8.	

Notes

Assigning an Item to a User's Learning Plan can also be accomplished by using the User Needs Management Assistant. See **Adding Items to User Record(s) with the UNM Assistant** for detailed information.

If the Learner is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

The tabs displayed after clicking edit depends on your assigned role.

Assign an Item to a Learning Plan Record

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Users**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	Locate the desired User record. **Tip**: Use the **Ctrl+F** function to quickly find a User record on the screen.	6.	Select the User's corresponding **Edit** link.	7.	If it is not already displayed, select the **Learning Plan** tab.	
8.	In the **Assign User Needs** section, select the **Add one or more from list** link.	

Notes

Assign an Item to a Learning Plan Record

Step	Activity	View
9.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	10.	Click **Search**.	
11.	On the **Results** tab, locate the Item to be added to the Learning Plan.	
12.	If the assign date is not the current (default) date, select the **Assign Date** calendar icon to select and enter the actual assign date.	
13.	Click **Add** to add the Item and return to the Learning Plan tab.	
14.	In the **Update the Learning Plan for the User** section, locate the Item recently added.	15.	Select the corresponding **Req. Date** calendar icon to enter the date by which the User must complete the Item.	
Notes

Assign an Item to a Learning Plan Record

Step	Activity	View
16.	Select the corresponding assignment type from the **Assign. Type** drop-down list.	17.	Click **Apply Changes**. **Caution**: Do not select a different tab prior to clicking **Apply Changes** or all changes and modifications will be lost.	

Caution: Do not use the browser **Back** button when using AgLearn – use the menus, links and breadcrumbs in AgLearn to navigate.
Note: If an assigned Item has an associated prerequisite, it will not be automatically added to the Users' Learning Plans. Users will be presented with an opportunity to add the prerequisite to their plan when they try to access the assigned Item.
Tip: If a User cannot be located, search for the User in other domains. During data entry, the User may have been mistakenly placed in an incorrect domain.

Notes

Removing an Item from a User's Learning Plan can also be accomplished by using the User Needs Management Assistant. See **Removing Items from User Record(s) with the UNM Assistant** for detailed information.

Use the Ctrl+F function to quickly find a User record on the screen.

Caution: Do not select a different tab prior to clicking Apply Changes or all changes and modifications will be lost.

Remove an Item from a Learning Plan Record

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Users**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **Results** tab, locate the desired User record.	6.	Select the corresponding **Edit** icon.	
7.	Select the **Learning Plan** tab.	
8.	In the **Update the Learning Plan for the User** section, locate the Item to be unassigned.	9.	Select the **Remove** check box to mark the Item for removal from the Learning Plan.	
10.	Click **Apply Changes**.	

Ad Hoc Notifications

Step	Activity	View
1.	Select the **User Management** menu.	User Management
2.	Select **Tools**.	Regions + Tools + References
3.	Select **Send Notifications**.	**Tools** Learning Event Recorder Learning Event Editor Merge Users **Send Notifications** Supervisor Assistant User Needs Mgmt
4.	Select the criterion on which your recipients will be selected. For the purposes of demonstration, this example will use the screens the flow from selecting **Scheduled Offering**. The others are similar.	* Base Population On: Scheduled Offering Item Curriculum Class
5.	Click **Next**.	Next
6.	If you know the scheduled offering ID number, enter it in the **Scheduled Offering ID** box, and click the **Add** button. If you don't know the scheduled offering ID, search for it by clicking the **Add one or more from list** link.	**Add a Scheduled Offering to the Criteria** Enter Scheduled Offering ID or add one or more from list. Scheduled Offering ID:
7.	Multiple offerings may be added. When you have all the offerings you want, click **Next**.	Next

Ad Hoc Notifications

Step	Activity	View
8.	Select a **Registration Status** or a **Completion Status** for the Users you want to notify.	9.	Add or remove Users as necessary to compile the precise list to receive the notification.	10.	Click **Next**.	
11.	Search for an e-mail template you'd like to use by clicking the **Search** icon next to **Email Template**.	12.	The **From** field defaults to your e-mail address if it is recorded in AgLearn. You may change this by typing in another address, or by searching for another address by clicking the **Search** icon.	13.	Enter the e-mail address to which any replies should be directed in the **Reply To** field. The e-mail address you enter in the **From** box in Step 3 will appear here by default, if it is recorded in AgLearn. If you wish to use a different address, type it into the **Reply To** box manually, or search by clicking the **Search** icon.	

Ad Hoc Notifications

Step	Activity	View
14.	Type in the addresses of any others who should receive this e-mail in the **CC** field. The addresses must be typed out in full and separated by commas.	
15.	Check the **Second copy of email to users' supervisors** box if you would like the e-mail to also be sent to the supervisor of each User listed.	16.	One file may be attached to the notification. Click the **Browse** button to search for the file name and location.	17.	Type a subject or title for the notification in the **Subject** box.	
Ad Hoc Notifications

Step	Activity	View
18.	The **Body** block will be automatically filled in if you selected an e-mail template in Step 1. You may edit it to include the text you wish. If no template is chosen, type in the message you want to deliver and it will appear in plain text, with no formatting. A Direct Link may be included in the body of an ad hoc notification.	19.	Click **Send Notification**.	
20.	The **Finished** page confirms that the notification message has been sent to the e-mail server. Click the **Start Over** button to re-start the wizard for another notification.	

Direct Linking

AgLearn has the capability of providing HTML hyperlinks to specific pages in AgLearn so Users can directly access the pages. These links can be embedded in any environment that can accept HTML URLs, including e-mail notifications, Web pages, and documents. The User is taken directly to the appropriate page when the link is clicked, after providing login information if he or she is not already logged in.

The use of direct links does not compromise security. Users will have access only to those sections of the application that their assigned workflow restrictions allow.

The Direct Linking Wizard is used to create the link after you have chosen the page. You can copy it into an e-mail or automatic notification so that the User can click the link or copy and paste it to reveal the exact page you want them to see.

Direct Links can be created to point Users to any of the following pages in AgLearn:

- All AgLearn learning pages – Including Learning Plan, Home page, Catalog Simple Search page, Learning History page, Current Registration page, and the Employee Subordinates page. URL is the only output option available for these pages. You cannot choose to insert the link into notification tags.
- Item Details – The User will be directed to the specified Item's Details page.
- Scheduled Offering Details – The User will be directed to the specified scheduled offering's Details page.
- Registration – Directs the User to the Registration page of the specified scheduled offering.
- Online Content Structure – Directs the User to the Online Content Structure page for the Item specified.
- Report – Creates a link to the specified User Report. (**Note**: Administrator reports are not available.)
- Reports with Criteria - Creates a link to the specified User Report, and allows you to specify the criteria for the report before creating the link.

Once the link has been created, it can be copied and pasted in an e-mail, document, or notification.

Using the Direct Link Wizard to Create a URL Direct Link

Step	Activity	View
1.	Select **System Admin**.	System Admin
2.	Select **Tools**.	+ Custom Columns + Tools + References
3.	Select **Direct Link**.	- **Tools** -**Admin Passwords** -Direct Link -Level Import/Export -Learning Event Synchronization -Report Assistant
4.	Pull down the menu and select the **Direct Link Type**.	**Select Link Type** * = Required Fields * Direct Link Type: Link Output Format: Learning Plan Home Page Catalog Simple Search Learning History Current Registration Employee Subordinates Item Details Scheduled Offering Details Registration Online Content Structure Reports Reports With Criteria
5.	Choose **URL** as the **Link Output Format**.	* Direct Link Type: Link Output Format: URL Notification Tags
6.	Depending on the link type chosen in Step 4, you may be prompted for additional information. For **Item Details** or **Online Content Structure**, click the **Search** icon next to **Item ID** to search for the Item. The Item Type and Revision Date fields will be filled in automatically.	**Specify Item** * Item Type: * Item ID: Revision Date:

Using the Direct Link Wizard to Create a URL Direct Link

Step	Activity	View
7.	For **Scheduled Offerings** or **Registrations**, click the **Search** icon to search for the **Scheduled Offering ID**. You may also type it in directly, if you know it.	
8.	For **Reports** or **Reports with Criteria**, enter the report you wish to have run. If choosing **Reports with Criteria**, you will have a chance to specify the criteria after you have chosen which report is to be run.	9.	Click the **Display Link** button.	
10.	Copy the link.	11.	The link can now be pasted directly into any e-mail, including those sent as an ad hoc notification.	
External Training Requests

Administrators are now able to create SF-182 requests on behalf of employees, view and edit requests that are already in the pipeline, and make approvals as necessary. Requests can be submitted as pre-approved, and can be back-dated to accommodate training that has already taken place.

Creating an External Training Request on Form SF-182

Step	Activity	View
1.	Select **User Management** from the top menu.	
2.	Select **Users** from the left menu.	
3.	Search for the User for whom you wish to create the external request. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Select the **Edit** icon for the appropriate User.	5.	In the User's record, click the **External Requests** tab.	
6.	Click the **New Request** button.	
Request ID	Title	Status	Pending Approval Actions	Action
8627	Email test 20060822	Withdrawn	None	View Request
7766	Test 20060703	Denied	None	View Request
7644	fdfasd	Denied	None	View Request

4242	fdfasd	Denied	None	View Request

Creating an External Training Request on Form SF-182

Step	Activity	View
7.	Part of the form will be automatically populated with data from the User's record. Complete as much of the form as necessary.	8.	To submit the request as already approved and bypass the normal approval process, check **Submit Request as Approved**.	 Submit Request as Approved
9.	To save the non-personal data so it can be used for another User, check **Save Data for Another Request**.	 Save Data for Another Request
10.	To choose another User's record to apply the data saved in Step 7, click **Select User**.	Select User
11.	To submit the completed form for approval, click **Submit**.	Submit
12.	To clear any changes made to the form, click **Reset**.	Reset

You must click **Submit** after checking this box for the request to be submitted for this User.

You must click **Submit** before **Select User** for the request to be submitted for the current User.

Editing an SF-182 Form

Step	Activity	View
1.	Select **User Management** from the top menu.	
2.	Select **Users** from the left menu.	
3.	Search for the User for whom you wish to create the external request. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Select the **Edit** icon for the appropriate User.	5.	In the User's record, click the **External Requests** tab.	
6.	Click the **Edit Request** link for the request to be edited.	7.	The SF-182 pops up in a new window. Make the necessary changes.	8.	Click **Apply Changes** to save the changes.	
9.	When finished, click the **Back to External Requests** button.	

Approving an SF-182 Form

Step	Activity	View
1.	Select **User Management** from the top menu.	
2.	Select **Users** from the left menu.	3.	Search for the User for whom you wish to approve the external request.	4.	Select the **Edit** icon for the appropriate User.	5.	In the User's record, click the **External Requests** tab.	
6.	Click the **Edit Approval** link for the request to be edited.	7.	Click the radio button under **Approve** or **Deny** for the next step in the process.	8.	Click **Apply Changes**.	
9.	The screen will refresh, with the approval or denial noted.	10.	Click the **Back** button on the AgLearn screen.	

You also have the option to click the **Approve All** link to complete the approval process with one action.

Never use your browser's Back button to navigate in AgLearn.

See **Managing Data Entry and Searches** for more detailed information on searching.

Verifying External Training Requested via Form SF-182

Step	Activity	View
1.	Select **User Management** from the top menu.	
2.	Select **Users** from the left menu.	
3.	Search for the User for whom you wish to create the external request.	
4.	Select the **Edit** icon for the appropriate User.	5.	In the User's record, click the **SF-182 Requests** tab.	
6.	Click the **Verify** link for the request to be verified.	7.	Complete the form.	
Request ID	Title	Status	Pending Approval Actions	Action
193	test course	Submitted	Pending Step 2	Edit Approval Edit Request Withdraw Request
163	TEST Oct 19 2006	Approved	None	View Request Transfer Request Verify
107	Supervising in Iowa	Approved	None	View Request Transfer Request Verify

Verifying External Training Requested via Form SF-182

Step	Activity	View
8.	Click **Submit** to send the form to the User's supervisor for approval. This allows the event to move into Learning History. **Note**: If you are also approving the verification to move into Learning History, check the **Submit Request as Approved** box before clicking **Submit**.	9.	If the verification was not submitted as "Approved," confirm the supervisor's name and click **Submit**.	

Managing Items

An Item is a learning requirement that can be learning content, an exam, a survey, OJT, or an external certification. Items can also be developed for online usage.

A Day-in-the-Life Scenario

A new Web-based course must be added to AgLearn. The course will replace current department training on the prevention of sexual harassment. The following activities must be accomplished:

- The Item must be available to all employees in the Training domain.
- The Item must be made available online and should be marked Complete when all objects are complete.
- Learners can re-enter the course after completion for refresher training.

Viewing an Item Record

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Items**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **Results** display, locate the desired Item.	
6.	Select the corresponding **View** icon to view the Item's Summary tab.	
7.	Click the Item's other data tabs to view additional information.	

Use Ctrl+F to quickly find an Item on the screen.

If an Item can not be located, search for the Item in other domains. During data entry, the Item may have been mistakenly placed in an incorrect domain.

Adding an Item Record

Step	Activity	View
1.	In the **Quick Links** pull-down menu, select **Create Learning Item**.	2.	In the **Summary** box, pull down the **Item Type** menu and select the type of Item you want to create.	3.	Enter an **Item ID**.	
4.	Enter a **Title**.	
5.	Enter your domain in the **Domain ID** box, or click the Search icon to find it.	
6.	If approval is required, pull down the **Approval Process** menu and select the proper process.	7.	If an **Approval Process** was selected in Step 6, check the **Approval Required** box.	
Adding an Item Record

Step	Activity	View
8.	Enter a **description** for the new Item.	Description: This is where the information about the item that the user sees when searching the catalog.
9.	In the **Related Subject Areas** box, click the Search icon and select the proper subject area(s) associated with the new Item.	Related Subject Areas Add
10.	Click **Next**.	Next
11.	If the Item is Instructor-Led, fill in the default **Segment Description**, **Day**, and **Offset** (if any).	Add New Schedule Offering Segment Template Segment Description | * Day (1000,001) | * Duration (1000,001.01) | Offset (1000,001.01) 1 | 8.00
12.	Click **Add**.	Add
13.	Repeat Steps 11 and 12 as needed, to create more default segments.	Add New Schedule Offering Segment Template Segment Description | * Day (1000,001) | * Duration (1000,001.01) | Offset (1000,001.01) 1 | 8.00
14.	When you have all the segments you need, click **Next**.	Next
15.	Team AgLearn takes care of all content object-related data for online Items; click **Next**.	Next
16.	Enter the **Catalog** name and click **Add**; OR Click the Search icon and search for the catalog(s) you want.	Related Catalog Add

Adding an Item Record

Step	Activity	View
17.	Select a **Flag**, if necessary.	18.	Indicate the last day of the flag's appearance.	
19.	Enter text in the **Reason** box that will appear to the User when the cursor is passed over this Item in the catalog.	
20.	Enter an expiration date for the Item in the **Expires** field, if necessary.	
21.	Click **Next**.	
22.	If you want to continue on and create a Scheduled Offering for this Item, check the **Schedule an offering of this item now** box in the lower left corner of the screen.	23.	Verify your information. If you are satisfied, click **Submit** to complete, or to launch the Create Scheduled offering Wizard.	

Editing an Item Record

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Items**.	Items Scheduled Offerings Classes
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching. 27.	Click **Run Job Now** or **Schedule Job** to have AgLearn complete the assignment to User record(s). **Note**: See **Scheduling Background Jobs** for more detailed information on scheduling jobs.	Run Job Now Schedule Job
28.	Review and revise any of the other Item data as required. **Caution**: If a Validation Error appears, you must correct the errors before the Assistant can be completed and the job scheduled. **Note**: See **Edit an Item Record** for more information on editing Items.	Pricing, Chargeback, Catalogs, Subject Areas, Standard Options Online Settings, Notifications, Materials, Objectives, Grading Options, Cost Calculation Curricula, Competencies, Custom Fields, Requests, Rqst Reasons, Substitutes Summary, Design Data, Delivery Data, Prerequisites, Documents, Tasks

Caution: Do not use the browser's **Back** button when using AgLearn – use the menus, links, and breadcrumbs to navigate.

Tip: To avoid data formatting errors when entering dates, use the Calendar Icon Assistant.

Managing Documents

A document is any media item (book, videotape, procedure, manual, audiotape, regulation, etc.) for which a record has been created, enabling it to be tracked. Documents are associated with Items, Curricula and/or Tasks.

Document management tasks are accessible from the **References > Documents** menu.

Managing Document subtasks include: **View a Document Record**, **Add a Document Record**, **Edit a Document Record**, and **Delete a Document Record**.

A Day-in-the-Life Scenario

The current version of the Intro to Microsoft Excel (TRN-DOCUMENT1) job aid must be verified. Find the document and verify that the current version has been reviewed for its applicability to the course material.

Notes

Viewing a Document Record

Step	Activity	View
1.	Select the **Content** menu.	
2.	Select **Documents**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	Locate the desired document. **Tip**: Use Ctrl+F to quickly find an Item on the screen.	6.	Select the corresponding **View** icon to view more information.	
You can perform either a Simple or Advanced Search depending upon the level of detail you need for your search.

If the document is in an incorrect domain, a person with the right permissions will need to move the record to the correct domain.

After selecting the **View** link, the **> Search > Search Results > View Summary** screen appears.

Notes

The purpose of creating a document record is to associate the document with an Item or Curricula. There is a **Document** tab in the Item and in the Curricula record that is used to create the association. See **Edit an Item** for additional information.

Once a Document record is in AgLearn, it is assigned to Items and Curricula through the Items and Curricula menus.

Type the electronic address of the document in the **Location** field to create the link from the Document in the Item with the actual Document.

Caution: A **Validation Error** field will appear if all required fields are not complete.

Adding a Document Record

Step	Activity	View
1.	Select the **Content** menu.	Content
2.	Select **Documents**.	Objectives Documents + Tools
3.	Select the **Add New** link.	Search | Add New | Help |
4.	Enter a document ID in the **Document ID** field.	* Document ID:
5.	Enter a document title in the **Title** field.	Title:
6.	Select the **Active** check box if the document is active.	Active: ☑ Active
7.	Click the **Document Type** search icon to search for and enter a document type.	Document Type:
8.	Click the **Domain** search icon and select the domain.	* Domain: PUBLIC
9.	Enter the **Source**, **Author**, **Location** and **Rev. No.** (revision number) for the document.	Source: Author: Location: Rev. No.:
10.	Click the **Revision Date** calendar icon to select and enter a revision date.	Rev. Date: (MM/DD/YYYY)
11.	Enter the **Reviser**, **Approver**, and **Comments** for the document in their respective fields.	Reviser: Approver: Comments:
12.	Click **Add**.	Add

Notes

18.	Select the **Needs Review** check box where appropriate.	19.	Click **Apply Changes**.	

The Needs Review check box will be automatically checked when the revision numbers of the Documents and/or Curricula are changed.

Notes

If the document is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Deleting a Document Record

Step	Activity	View
1.	Select the **References** menu.	
2.	Select **Documents**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	Locate the desired document. **Tip**: Use **Ctrl+F** to quickly find a document on the screen.	6.	Select the corresponding **Edit** icon to delete the document record.	7.	Click **Delete**.	
8.	Click **OK** in the Confirmation box.	
Managing Scheduled Offerings

The Scheduled Offering Wizard is used to create a scheduled offering, assign it resources, and break it up into segments with the appropriate resources. You can enter the vital information and then edit it later on. You will assign an item, set up the segment, and select resources. The system will alert you to any scheduling conflicts right away so that you are aware of them and can make the necessary adjustments. The Calendar Preview gives you a graphic view of your new offering and the conflicts. Subtasks pertaining to Scheduled Offerings are accessible from the **Scheduling** menu. Scheduled Offering-specific subtasks include the following: **View**, **Add**, **Edit**, **Copy**, **Cancel**, **Close**, and **Delete a Scheduled Offering Record**, and **Use the Scheduled Offering Notification Assistant Tool**.

Notes

Viewing a Scheduled Offering Record

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Scheduled Offerings**.	
3.	On the **> Search** screen, enter the appropriate search criteria.	4.	Click **Search**.	
5.	In the **Grid View**, locate the desired Scheduled Offering. **Tip**: Use the **Ctrl+F** function to quickly find a Scheduled Offering on the screen.	6.	Select the corresponding **View** icon to view more information.	

You can perform either a Simple or Advanced Search depending upon the level of detail needed.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Note: A Scheduled Offering is also viewable by clicking the Calendar View tab on the > Search screen and then the desired Offering ID link to open the corresponding record.

Notes

Required fields are identified by a red asterisk. Although remaining fields are not required, you should complete as many as you feel are necessary.

If you create a Scheduled Offering for an online item, unregistered users will not be able to launch that item. Registered users will only be able to launch the item during the defined segment time periods.

.

By using the selection icon, the Item ID and Title automatically appear in their

Add a New Scheduled Offering Record

Step	Activity	View
1.	Select **Add New Scheduled Offering** from the QuickLinks menu.	2.	Click the **Item** option button. **Note**: **Item** is the default selection.	3.	In the **Identify the Scheduled Offering** box, click the Search icon next to the **Item ID** field to find the item for which you want to create the offering. Selecting the item in this manner will automatically fill in the **Item Type** and **Title** fields.	
4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	Locate the desired Item and select the corresponding **Select** link.	
Notes

Add a New Scheduled Offering Record

Step	Activity	View
7.	Click the **Domain** selection icon to search for and enter a domain.	
8.	From the Facility drop-down list, select the facility where the scheduled offering will take place.	9.	Click the **Segment Start Date** calendar icon to select and enter a start date. **Note**: A Scheduled Offering must have at least one segment.	10.	Enter a start time in the **Segment Start Time** field. **Note**: Use the following time convention – hh:mm AM/PM.	
11.	Click the **Time Zone** drop-down list to search for and enter the correct time zone.	12.	In the Select Resources section, click the Primary Instructor drop-down list to search for and select an instructor authorized to teach the Scheduled Offering.	13.	Click the Primary Location drop-down list to search for and select the primary location for the scheduled offering.	
14.	Click the Equipment drop-down list to search for and select equipment to be reserved for the scheduled offering.	

respective fields

A segment is a unit of time within a Scheduled Offering. Segments enable these units to be associated with resources, such as a location, instructors and equipment.

The Time Zone field defaults to the time zone in which the Scheduled Offering will occur.

Notes

Add a New Scheduled Offering Record

Step	Activity	View
15.	Click **Refresh**.	
16.	You may show the schedule dates for any of the reserved resources by pulling down the **Resource Usage View** Menu.	17.	Click **Next**.	
18.	The catalog(s) associated with the item will appear. You do not need to click the search icon unless you remove a catalog and then decide include the catalog in the Scheduled Offering.	19.	Click **Next**.	
20.	Review the summary screen to confirm that the data for the scheduled offering is correct. If necessary, click **Previous** to return to earlier screens to modify data.	21.	When you are sure all data is correct, click **Submit** to create the record and display the Summary tab.	

The search results will reveal only catalogs associated with the item.

Notes

Add a New Scheduled Offering Record

Step	Activity	View
22.	Click the **Approval Process ID** drop down list to select the approval process associated with the scheduled offering.	Approval Process ID:
23.	Select the **Approval Required** checkbox if approval is required for users to enroll in the scheduled offering	Approval Required:
24.	Enter the name of the point of contact for the scheduled offering.	Contact:
25.	Enter the point of contact's e-mail address in the **Email** field.	Email:
26.	Enter the point of contact's **Phone** and **Fax** numbers (if available) in their respective fields.	Phone: Fax:
27.	Select or deselect the **Active** check box to affect the Scheduled Offering's availability. **Note**: The default setting for the **Active** check box is active.	Active:
28.	Check the **Auto Fill Registration** checkbox, if you wish to automatically replace users who withdraw from the scheduled offering with users on the waitlist.	Auto Fill Registration:
29.	Enter Comments to describe the scheduled offering to other administrators.	Comments:

If you clear the checkbox, the offering is inactive and unavailable for users to view or edit unless they have been assigned permission for inactive items.

Notes

Add a New Scheduled Offering Record

Step	Activity	View
30.	In the Edit the Registration for the Scheduled Offering section, click the Calendar icon to set the Registration Cut-off Date.	Registration Cut-off Date: (MM/DD/YYYY)
31.	Enter the Registration Cut-off Time.	Registration Cut-off Time: (hh:mm AM/PM)
32.	Enter the minimum registration needed to conduct the offering, and the maximum registration capacity.	Minimum Registration: (1000,001) Maximum Registration: (1000,001)
33.	Check the Self Registration checkbox if users should be allowed to register themselves in this offering from their Learning Plan.	Self Registration
34.	Click **Apply Changes**.	Apply Changes

This is the last date when enrollments to the offering should be allowed. Users are warned, but not prevented, from making enrollments after this date.

If you attempt to register more users than the maximum capacity, you will be warned but not prevented from recording the enrollments

Notes

When you create a scheduled offering, it's a good idea to jot down the Scheduled Offering ID so that you'll be able to quickly find the record in a search.

Use Ctrl+F to quickly find a Scheduled Offering.

Edit a Scheduled Offering Record

Step	Activity	View
1.	Select the **Learning** menu.	Learning

9.	Click **Apply Changes**.	Apply Changes

Notes

Edit a Scheduled Offering Record

Step	Activity	View
10.	Click the **Registration** tab and make the appropriate changes. **Note**: To learn more about adding Users to a Scheduled Offering, see **Managing Scheduled Offering Registrations**. To learn more about adding slots to a Scheduled Offering, see **Managing Scheduled Offering Slots**.	11.	Click **Apply Changes**.	
12.	Click the **Contacts** tab.	
13.	Select **Add one or more Users (instructors) from list** to select and enter a contact.	14.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information.	15.	Click **Search**.	
16.	On the **Results** display, select the **Select** check box for each User to be added as a contact.	17.	Click **Add** to return to the **Contacts** tab. **Note**: Repeat the last 4 steps to add additional contacts on this tab.	

If you know the Learner/Instructor ID, you can enter it directly in the **Learner/Instructor ID** field, select the appropriate option button, and click **Add**.

Notes

Edit a Scheduled Offering Record

Step	Activity	View
18.	Click the **Materials** tab.	
19.	Select the **Add one or more from list** link to add material(s).	
20.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information.	21.	Click **Search**.	
22.	On the **Results** screen, select the **Select** check box for each material to be added.	23.	Select the type of material from the **Type** drop-down list.	24.	Click **Add** to return to the **Materials** tab. **Note**: Repeat the last 4 steps to add additional contacts on this tab.	
25.	Scroll down to the **Update the Materials for the Scheduled Offering** section and make the appropriate changes.	26.	Click **Apply Changes**.	

After you click **Add**, the selected material appears in the **Update the Materials for the Scheduled Offering** section.

If you update materials for the Scheduled Offering, be sure to click **Apply Changes** when done.

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have been mistakenly placed in an incorrect domain.

Notes

Rather than create a new Scheduled Offering, you may want to copy a similar one, then edit the record to customize.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Use the Ctrl+F function to quickly find a Scheduled Offering on the screen.

Copy a Scheduled Offering Record

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Scheduled Offerings**.	Items **Scheduled Offerings** Classes
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Search Scheduled Offerings Enter a value for each field that you want to use to filter your search. Some fields allow you to select from a list of values. You can also add or remove search criteria to further refine your search. Case sensitive search: Yes No Offering Type: Item offering type Schedule Block offering type Both Scheduled Offering ID: Starts With Item/Schedule Block ID: Starts With Description: Starts With Start Date After: (MM/DD/YYYY) 10/26/2006 Start Date Before: (MM/DD/YYYY)
4.	Click **Search**.	Search
5.	Locate the desired Scheduled Offering and select the corresponding **Edit** icon to edit the Scheduled Offering.	Scheduled Offering ID / Item/Schedule Block 403 Classroom **TIG-MSPOWERPOINT-101** (Rev 7/8/2005 11:09 AM MST) 404 Classroom **TIG-MSPOWERPOINT-101** (Rev 7/8/2005 11:09 AM MST)
6.	Select the corresponding **Copy Scheduled Offering** button.	Copy Scheduled Offering...
7.	Select the check box(es) corresponding to the element(s) of the existing record that should remain the same.	Options: ☐ Copy Group Instance ☐ Copy New Scheduled Offering to the catalog ☐ Use item default segment day numbers ☐ Copy to consecutive Days

7.	Click **Next**.	Next
8.	Click **Next**. **Note**: This training is not addressing cost at this time.	Next
9.	On the **Step 3**: **Confirm** Close screen, review the confirmation.	**Step 3: Confirm** Scheduled Offering ID: 305 Scheduled Offering Total ($): 0.00

Notes

Close a Scheduled Offering

Step	Activity	View
10.	Click **Finish**. **Note**: Closing a Scheduled Offering removes it from the calendar.	Finish
11.	On the **Finished** screen, review the Scheduled Offering's status.	Finished **Status:** • The scheduled offering has been successfully closed.

Tip: To avoid data formatting errors when entering dates and making selections, use the Calendar and Selection icons.

Note: See **Managing Data Entry and Searches** for more detailed information pertaining to the **Selection** and **Calendar** icons.

Notes

Delete a Scheduled Offering Record

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Scheduled Offerings**.	
3.	Search for the **Scheduled Offering** to be closed.	4.	Find the Scheduled Offering to be closed and click the **Edit** icon.	5.	Click the **Delete** button.	
6.	Click **OK** in the **Confirmation** box.	
Instruct students to search for their fourth Scheduled Offering ID.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Inform students that they can delete a Scheduled Offering only if it did not occur, there are no enrollees, and no persons waitlisted.

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have mistakenly been placed in an incorrect domain.

After introducing the task via the Overview, highlight the roles assigned to perform each subtask.

Managing Segments

A Segment is a unit of division of a Scheduled Offering that facilitates variable resource scheduling. **Managing Segments** involves adding a new Scheduled Offering to the calendar and making corresponding resource assignments. Subtasks pertaining to Segments are accessible via the **Scheduling** menu. Segment-specific subtasks include the following: **View**, **Add**, **Edit a Scheduled Offering Segment**, **Copy Resources to Other Scheduled Offering Segments**, **Copy a Scheduled Offering's Daily Segments** and **Delete a Scheduled Offering Segment**.

A Day-in-the-Life Scenario

A new employee orientation course will need to begin with a one-hour introduction session in Building 57's auditorium, followed by a one-hour hands-on session in the computer lab on the following day.

Notes

View a Scheduled Offering Segment

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Ask students to search for the first Scheduled Offering created in the Add Scheduled Offering session.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Step	Activity	View
1.	Select the **Learning** menu.	
2.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	3.	Click **Search**.	
4.	Locate the desired Scheduled Offering. Select the **View** icon. **Tip**: Use **Ctrl+F** to quickly find a Scheduled Offering on the screen.	5.	Click the **Segments** tab.	
Notes

View a Scheduled Offering Segment

Step	Activity	View
6.	Locate the desired Segment and select **View**. **Note**: This provides the opportunity to view Segment details pertaining to instructors, locations, equipment, materials, and custom resources.	
Seg# Desc.	Start Date/Time	End Date/Time	Dur.	Instructor	Location	
1	12/1/2006 12:00 PM MST	12/1/2006 08:00 PM MST	8.00			View
Day 1						

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have mistakenly been placed in the default domain.

Notes

Add a Scheduled Offering Segment

Step	Activity	View
1.	Select the **Learning** menu.	
2.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	3.	Click **Search**.	
4.	Locate the desired Scheduled Offering. And select the **Edit** icon. **Tip**: Use the **Ctrl+F** function to quickly find a Scheduled Offering on the screen.	5.	Click the **Segments** tab.	6.	Scroll down to the **Add a Segment to the Scheduled Offering** section.	7.	Click the **Start Date** calendar icon to select and enter a start date.	
8.	Click the **End Date** calendar icon to select and enter an end date.	

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Suggest to students that they use their date-of-birth in the future.

Notes

Add a Scheduled Offering Segment

Step	Activity	View
9.	Click the **Time Zone** selection icon to search for and enter a time zone. **Note**: The **Time Zone** field defaults to the time zone in which the Scheduled Offering occurs.	Time Zone: EST (Eastern Standard Time)
10.	Enter a Segment start time in the **Start Time** field.	* Start Time: (hh:mm AM/PM)
11.	Enter a Segment end time in the **End Time** field.	* End Time: (hh:mm AM/PM)
12.	Pull down the **Primary Instructor** menu to select the primary instructor.	Primary Instructor:
13.	Enter a brief description in the **Segment Description** field.	Segment Description:
14.	Click the **Primary Location** selection icon to search for and enter the primary location.	Primary Location:
15.	Select the **Send Notification** check box to send e-mail notifications to those who will be affected by the changes.	Send Notification
16.	Select the **Check Conflicts** check box to check for scheduling conflicts created by adding the Segment.	Check Conflicts

Although it is not required to add an instructor when adding an initial Segment, the **Update the Segments for the Scheduled Offering** section on the **Segments** tab provides the only opportunity to add a second (or more) instructor to a Segment.

Inform students that if the Location is already booked, it will not appear on the list.

If a conflict(s) exists a message will appear providing the opportunity to view the conflict(s) by clicking **View**.

Notes

Add a Scheduled Offering Segment

Step	Activity	View
17.	Click **Add**.	Add

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have mistakenly been placed in the default domain.

Tip: To avoid data formatting errors use the Calendar and Selection icon assistants.

Note: See **Managing Data Entry and Searches** for more detailed information pertaining to the **Selection** and **Calendar** icons.

Notes

Edit a Scheduled Offering Segment

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Step	Activity	View
1.	Select the **Learning** menu.	
2.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	3.	Click **Search**.	
4.	Locate the desired Scheduled Offering. And select the **Edit** icon. **Tip**: Use **Ctrl+F** to quickly find a Scheduled Offering on the screen.	5.	Click the **Segments** tab.	6.	Scroll down to the **Update the Segments for the Scheduled Offering** section.	
7.	Locate the desired Segment.	
Notes

Edit a Scheduled Offering Segment

Step	Activity	View
8.	Open the **Primary Instructor** list to add an instructor to the Segment.	Primary Instructor:
9.	Open the **Primary Location** list to add a location to the Segment.	Primary Location:
10.	Select the **Send Notification** check box to notify interested parties of the changes.	☑ Send Notification
11.	Select the **Check Conflicts** check box to see if there are any conflicts scheduling the location.	☑ Check Conflicts
12.	Click **Apply Changes**.	Apply Changes
13.	To add an **Instructor** or **Location** not on the pull-down lists, or to add **Equipment** or **Materials**, click **Edit Resources**.	Edit Resources
14.	Click the **Equipment** tab. **Note**: **Equipment** is being used as an example. Any resources for the segment may be edited in this manner.	Locations | **Equipment** | Materials

Although it is not required to add an instructor when adding an initial Segment, the **Update the Segments for the Scheduled Offering** section on the **Segments** tab provides the only opportunity to add a second (or more) instructor to a Segment.

Equipment and materials can be assigned to a Segment. However, the AgLearn prototype does not support this

Notes

functionality.

Edit a Scheduled Offering Segment

Step	Activity	View
15.	Select the **Add one or more from list** link to add equipment to the Segment. **Caution**: If completing the field using the list link, do not click **Add**. If manually entering the appropriate information, click **Add** when finished.	Enter Equipment ID or add one or more from list
16.	On the **> Search** screen, enter the appropriate search criteria.	Case sensitive search: Yes No Equipment ID: Starts With Description: Starts With
17.	Click **Search**.	Search
18.	On the **Results** tab, select the check box corresponding to the equipment to be added.	Select All / Deselect All Equipment ID | Equipment Type | Description | Add VCR-4 | VCR
19.	Click **Add** to add the equipment and return to the **Edit Equipment** screen.	Add
20.	Make the appropriate changes to the Segment's equipment. **Note**: Changes can only be made to equipment added to the segment, not to equipment listed that is assigned to the location.	Equipment ID Name (Type) | * Start Date (MM/DD/YYYY) | * Start Time (hh:mm AMPM) | * End Date (MM/DD/YYYY) | * End Time (hh:mm AMPM) | Dur. | Remove VCR-4 | 12/1/2006 | 12:00 PM | 12/1/2006 | 08:00 PM | 8.00 VCR | * Time Zone: MST (Mountain Standard Time)
21.	Click **Apply Changes**.	Apply Changes

Notes

Share the following example with students: The entire Scheduled Offering (all Segments) may need three-ring binders, but Segment two may be the only Segment requiring a specific handout. So the binders would be assigned to the Scheduled Offering and the handout to Segment two.

Edit a Scheduled Offering Segment

Step	Activity	View
22.	Click the **Materials** tab. **Note**: Select materials specific to this Segment. Select materials applicable to the Scheduled Offering via the **Segments** tab of the corresponding Scheduled Offering.	
23.	Select the **Add one or more from list** link to add materials to the Segment.	
24.	On the **> Search** screen, enter the appropriate search criteria.	25.	Click **Search**.	
26.	On the **Results** tab, select the check box corresponding to the materials to be added. **Note**: Select the **Location** and **Target** from their respective drop-down lists and enter the number of each material in the Count field.	27.	Click **Add** to add the materials and return to the **Edit Materials** screen.	
28.	Make the appropriate changes to the Segment's materials.	
29.	Click **Apply Changes**.	
30.	Click **Return to Scheduled Offering** to view all Segments.	

Notes

Edit a Scheduled Offering Segment

Step	Activity	View

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have mistakenly been placed in the default domain.

Notes

Copy Resources to Other Scheduled Offering Segments

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Search Scheduled Offerings Enter a value for each field that you want to use to filter your search. Some fields allow you to select from a list of values. You can also add or remove search criteria to further refine your search. Case sensitive search: Yes No Offering Type: Item offering type Schedule Block offering type Both Scheduled Offering ID: Starts With Item/Schedule Block ID: Starts With Description: Starts With Start Date After: (MM/DD/YYYY) 10/26/2006 Start Date Before: (MM/DD/YYYY)
3.	Click **Search**.	Search
4.	Locate the desired Scheduled Offering. And select the **Edit** icon. **Tip**: Use **Ctrl+F** to quickly find a Scheduled Offering on the screen.	Scheduled Offering ID / Item/Schedule Block 403 Classroom **TIG-MSPOWERPOINT-101** (Rev 7/8/2005 11:09 AM MST) 404 Classroom **TIG-MSPOWERPOINT-101** (Rev 7/8/2005 11:09 AM MST)
5.	Click the **Segments** tab.	Notifications | Cost Calculation | Cost Summary Summary | **Segments** | Registration
6.	Scroll down to the **Update the Segments for the Scheduled Offering** section.	Update the Segments for the Scheduled Offering
7.	Locate the Segment containing resources to copy. **Note**: **Resources** refers to instructor, location, equipment, material types, and costs.	Segments Segment 1 * Start Date (MM/DD/YYYY) 12/1/2006 * End Date (MM/DD/YYYY) 12/1/2006 * Start Time (hh:mm AM/PM) 12:00 PM * End Time (hh:mm AM/PM) 08:00 PM * Time Zone MST (Mountain Standard Time) Primary Instructor: Primary Location: Segment Description: Day 1 Edit Resources | Copy Resources to All | Copy Daily Segments
8.	Select **Copy Resources to All**.	Copy Resources to All

Notes

Copy Resources to Other Scheduled Offering Segments

Step	Activity	View
9.	Select each check box corresponding to the individual resources to copy. **Note**: Select the **Copy All** check box to copy all Segment resources to the other Segments in this Scheduled Offering.	Choose Resources for Copy ☐ Copy All ☐ Copy Instructor ☐ Copy Location ☐ Copy Equipment ☐ Copy Material ☐ Copy Custom Resource
10.	Select the **Check Conflicts** check box. **Note**: The default setting is to check for conflicts.	Check Conflicts: ☑
11.	Click **Copy**.	Copy

Tip: For an Item/course that requires several days to train, copy all the segments for an entire day and edit the segments rather than add or copy individual segments. See the next subtask, **Copy Daily Segments of a Scheduled Offering**.

Notes

Remind students that for an Item/course that requires several days to train, it may be useful to copy all the segments for an entire day and edit the segments rather than add or copy individual segments.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Copy Daily Segments of a Scheduled Offering

Step	Activity	View
1.	Select the **Learning** menu.	
2.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	3.	Click **Search**.	
4.	Locate the desired Scheduled Offering. And select the **Edit** icon. **Tip**: Use **Ctrl+F** to quickly find a Scheduled Offering on the screen.	5.	Click the **Segments** tab.	6.	Scroll down to the **Update the Segments for the Scheduled Offering** section.	
7.	Locate the Segment comprising the date to copy.	8.	Select the corresponding **Copy Daily Segments** link.	

Notes

Copy Daily Segments of a Scheduled Offering

Step	Activity	View
9.	On the **> Search > Search Results > Edit Segments > Copy Daily Segments** screen, enter the desired number of Segment duplications in the **Number of Times to Copy** field.	* Number of Times to Copy: (1000,001)
10.	Select the **Check Conflicts** check box. **Note**: The default setting is to check for conflicts.	Check Conflicts: ☑
11.	Select the **Send Notification** check box. **Note**: The default setting is to send notifications.	Send Notification ☑
12.	Click **Copy**.	Copy
13.	Scroll down to the **Update the Segments for the Scheduled Offering** section.	Update the Segments for the Scheduled Offering
14.	Make the appropriate changes to the new Segments. **Note**: The start and end dates for are automatically set to the next day.	Segments Segment 1 * Start Date (MM/DD/YYYY) 12/1/2006 * End Date (MM/DD/YYYY) 12/1/2006 * Start Time (hh:mm AM/PM) 12:00 PM * End Time (hh:mm AM/PM) 08:00 PM * Time Zone MST (Mountain Standard Time) Primary Instructor: Primary Location: Segment Description: Day 1 Edit Resources Copy Resources to All Copy Daily Segments
15.	Click **Apply Changes**.	Apply Changes

Inform students that this is a helpful feature for when there are items requiring several days to complete. Instead of creating new Segments to extend the schedule, simply duplicate a day and edit the date and time information as necessary while maintaining the resources.

Notes

Delete a Scheduled Offering Segment

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	3.	Click **Search**.	Search
4.	Locate the desired Scheduled Offering. And select the **Edit** icon. **Tip**: Use **Ctrl+F** to quickly find a Scheduled Offering on the screen.	5.	Click the **Segments** tab.	6.	Scroll down to the **Update the Segments for the Scheduled Offering** section.	Update the Segments for the Scheduled Offering
7.	Select the **Delete** button for the segment to be removed.	Delete
8.	Click **Apply Changes**.	Apply Changes

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have mistakenly been placed in the default domain.

After introducing the task via the Overview, highlight the roles assigned to perform each subtask.

Managing Requests

A Request is a notification specifying that a User wants or needs to complete a specific Item. Usually the request is generated because a Scheduled Offering does not currently exist to accommodate the User's timeframe. A Request does not place a User in active registration or on the Waitlist for any specific Scheduled Offering. Current Item requests can also be viewed using the **Item Requests Report**. Subtasks pertaining to **Managing Requests** are accessible from the **Learning** menu. Request-specific subtasks include the following: **View**, **Add**, and **Edit a User Item Request**.

A Day-in-the-Life Scenario

You are planning to create an additional Scheduled Offering for the Item Internet Policies when there is sufficient need for it.

Notes

View a User Item Request

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Items**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	Locate the desired Item. **Tip**: Use **Ctrl+F** to quickly find a Learning Event.	
Notes

View a User Item Request

Step	Activity	View
6.	Select the **View** icon corresponding to the desired Item.	
7.	Click the **Requests** tab to view Users who have requested the Item.	

Notes

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Add a User Item Request

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Items**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	Locate the desired Item. **Tip**: Use **Ctrl+F** to quickly find a Learning Event.	6.	Select the **Edit** icon corresponding to the desired Item.	
7.	Click the **Requests** tab to view the list of Users requesting the Item.	
8.	Select the **Add one or more from list** link to search for and enter a User.	
Notes

Add a User Item Request

Step	Activity	View
9.	On the **> Search** screen, enter the appropriate search criteria.	10.	Click **Search**.	
11.	On the **Results** tab, select the **Add** check box corresponding to each User to be added to the Item's request list. **Note**: Use the **Request** and **Required Date** calendar icons accordingly to make changes to the Requests.	
12.	Click **Add** to add the selected User requests and return to the **Requests** tab.	

Note: Requests are usually entered here, but AgLearn can generate requests on its own. When a Scheduled Offering is cancelled, AgLearn will ask the administrator whether requests should be generated for Users that were registered or waitlisted for that Scheduled Offering. The second circumstance occurs when a Scheduled Offering with a Waitlist takes place. Requests can be generated for each User on the Waitlist via the Waitlist to Request automatic process.

Notes

Have students begin with Step #8 as they will need to add a comment regarding the request.

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Edit a User Item Request

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Items**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	Locate the desired Item. **Tip**: Use **Ctrl+F** to quickly find a Learning Event.	6.	Select the **Edit** icon corresponding to the desired Item.	
7.	Click the **Requests** tab to view the list of Users requesting the Item.	
8.	Scroll down to the **Update the Requests for the Item** section.	

Notes

Edit a User Item Request

Step	Activity	View
9.	Click a User's **Request Date** calendar icon to change the existing request date.	
10.	Click a User's **Required Date** calendar icon to enter/change the existing required date.	11.	Select the **Comments/Reason** link to edit or enter a comment or reason regarding the Request.	
12.	On the **> Search > Search Results > Edit Requests** screen, enter comments in the **Comments** field. **Note**: A comment can be entered by the User originating the Request, or by the administrator accessing it.	13.	Enter or modify the reason for the User's request in the **Request Reason** field.	
14.	Click **Apply Changes**.	
15.	Select the **Remove** check box next to each User Request to be removed.	16.	Click **Apply Changes**.	

After introducing the task via the Overview, highlight the roles assigned to perform each subtask.

Managing Slots

A Slot is a reservation made by an Organization for enrollments in a Scheduled Offering. Names of specific Users may not be available when an Organization acquires the Slots, but seats on the Scheduled Offering are reserved for that organization until the specific Users are identified. Slots are filled using the **Registration** tab within **Scheduled Offerings**. Subtasks pertaining to Slots are accessible via the **Scheduling** menu. Slot-specific subtasks include the following: **View**, **Add**, **Edit**, **Delete**, and **Fill a Slot**.

A Day-in-the-Life Scenario

AgLearn announced an additional Scheduled Offering for the Sexual Harassment Prevention course that must be completed by all employees hired after December 31st, 2006. The Scheduled Offering will occur in the Fall of 2007. A supervisor knows that he will be hiring 5 new employees.

Notes

View Scheduled Offering Slots

Remind students that complete definitions of terms are included in the glossary.

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Scheduled Offerings** from the left menu.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	In the **Grid View**, locate the desired Scheduled Offering.	
Notes

View Scheduled Offering Slots

Step	Activity	View
6.	Select the corresponding **View** icon to view more information. **Note**: A Scheduled Offering is also viewable by clicking the **Calendar View** tab on the **> Search** screen and then the desired **Offering ID** link to open the corresponding record.	
7.	Click the **Registration** tab.	
8.	Scroll down to the **View the Slots** section to view the Slots.	
Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have been mistakenly placed in an incorrect domain.

Notes

Inform students that they will be adding Slots to the newly created Scheduled Offering.

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Add Slots to a Scheduled Offering

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Scheduled Offerings** from the left menu.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **Search Results** screen, locate the desired Scheduled Offering. **Tip**: Use **Ctrl+F** to quickly find a Scheduled Offering.	6.	Select the **Edit** link corresponding to the desired Scheduled Offering.	7.	Click the **Registration** tab.	

Notes

Tell students that an Organization is an entity of some type to which a Learner belongs. In AgLearn, the Organization is equivalent to T&L.

Add Slots to a Scheduled Offering

Step	Activity	View
8.	Scroll down to the **Add Slots to the Scheduled Offering** section.	9.	Click the **Organization ID** search icon to search for and enter the Organization ID reserving Slots in this offering.	
10.	Click the **Reservation Date** calendar icon to select and enter a reservation date. **Note**: The Reservation Date field defaults to the current date.	
11.	Enter a reservation time in the **Reservation Time** field. **Note**: The **Reservation Time** field defaults to the current time.	12.	Click the **Time Zone** selection icon to search for and enter a time zone. **Note**: The **Time Zone** field defaults to the time zone in which the Scheduled Offering occurs.	13.	Select the **Email confirmation to the Organization** check box to send the Organization a confirmation message.	14.	Enter the number of Slots reserved by the Organization in the **Number of Slots** field.	

Notes

Add Slots to a Scheduled Offering

Step	Activity	View
15.	Select a registration status from the **Registration Status** drop-down list.	Registration Status: ENROLL(Enrolled)
16.	Click **Add**.	Add

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have been mistakenly placed in an incorrect domain.

Tip: To avoid data formatting errors when entering dates, use the Selection and Calendar icon assistants.

Note: See **Managing Data Entry and Searches** for more detailed information pertaining to the **Selection** and **Calendar** icons.

Notes

Edit Scheduled Offering Slots

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Scheduled Offerings** from the left menu.	Items **Scheduled Offerings** Classes
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching. 7.	Click the **Registration** tab.	
8.	Select the **Add one or more from list** link to select a User.	
Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Tell students they may need to scroll down to the section titled "Scheduled Offering Registration."

Notes

Fill a Slot

Step	Activity	View
9.	On the **> Search** screen, enter the appropriate search criteria.	10.	Click **Search**.	
11.	On the **Results** screen, locate the desired User(s).	12.	Select a Slot to assign the User from the **Slot ID** drop-down list.	13.	Select the User's corresponding **Add** check box.	14.	Click **Add**.	
15.	On the **Registration** tab, scroll down to the **Edit the Registered Learners for the Scheduled Offering** section.	
16.	Locate the User(s) that were added to verify the Slot ID assignment.	
Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have been mistakenly placed in an incorrect domain.

Managing Scheduled Offering Registrations

Registration is the act of placing a User's name on the planned list of participants in a specific Scheduled Offering. Subtasks pertaining to **Managing Scheduled Offering Registrations** are accessible from the **Scheduling** menu. Registration-specific subtasks include the following: **Register/Withdraw a User**, **View a Scheduled Offering Registration**, **Edit Registered Users for a Scheduled Offering**, **Create a Class Roster Registration Report**, and **Use the Registration Assistant Tool** to **Register a User for a Scheduled Offering**, and **Reserve Slots for a Scheduled Offering**.

A Day-in-the-Life Scenario

You are asked to determine which User is Waitlisted for a particular Scheduled Offering. Additionally, you must identify all Users who are Waitlisted for all Scheduled Offerings of a certain Item.

Notes

View a Scheduled Offering Registration

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Scheduled Offerings** from the left menu.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **Grid View** screen, locate the desired Scheduled Offering. **Tip**: Use the **Ctrl+F** function to quickly find an Offering ID.	
Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Offering is in an incorrect domain, a person with the right permissions will need to move the record to the correct domain.

Notes

View a Scheduled Offering Registration

Step	Activity	View
6.	Select the **View** link corresponding to the desired Scheduled Offering. **Note**: A User's registration is also viewable via **User Management > Users > Registration**.	
7.	Click the **Registration** tab.	8.	Scroll down to the **Registered Users** section to verify/view the current student User registrations.	
Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have been mistakenly placed in an incorrect domain.
Tip: The **Reports** menu contains a **Registration Status** report listing the status for all registered Users selected for a specific Scheduled Offering(s).

Notes

Register a User in a Scheduled Offering

6.	Select the **Edit** link corresponding to the desired Scheduled Offering.	Scheduled Offering ID 403 404
7.	Click the **Registration** tab.	Cost Calculation | Cost Summary | Pricing Segments | **Registration** | Contacts
8.	Scroll down to the **Add a User to the Scheduled Offering Registration** section.	**Add a User to the Scheduled Offering Registration**

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Offering is in an incorrect domain, a person with the right permissions will need to move the record to the correct domain.

Notes

Register a User in a Scheduled Offering

Step	Activity	View
9.	Select the **Add one or more from list** link or the **Add from request list** link to search for and enter Users. **Note**: A **request list** is a list of Users who have requested to attend the Scheduled Offering.	10.	On the **> Search** screen, enter the appropriate search criteria.	11.	Click **Search**.	
12.	On the **Results** tab, select a registration status from the **Registration Status** drop-down list.	13.	Select a slot, if appropriate, from the **Slot ID** drop-down list.	14.	Select the **Add** check box for each User to be registered to the Scheduled Offering.	15.	Select the applicable **Email confirmation to User**, **Instructor**, **Supervisor**, and/or **Contacts** check boxes at the bottom of the User list.	

Inform the students that if they know the Learner ID, they can enter it directly in the **Learner ID** field.

Mention to students that this is where they can assign a Learner to a Waitlist.

Inform students that after clicking the **Add** button it is unnecessary to click **the Apply Changes** button in the **Edit the Registered Learners for the Scheduled Offering**

Notes

Register a User in a Scheduled Offering

Step	Activity	View
16.	Click **Add**. **Note**: Be sure to scroll down to the bottom of the screen to verify the addition.	

section of the **Registration** tab. At this point they should validate the registered Learners.

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have been mistakenly placed in an incorrect domain.

Notes

Edit Registered Users for a Scheduled Offering

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Scheduled Offerings** from the left menu.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **Grid View** screen, locate the desired Scheduled Offering. **Tip**: Use the **Ctrl+F** function to quickly find a User.	6.	Select the **Edit** link corresponding to the desired Scheduled Offering.	
7.	Click the **Registration** tab.	
8.	Scroll down to the **Edit the Registered Users for the Scheduled Offering** section.	
9.	Select a User's corresponding **Edit** link to make edits to the User's registration information. **Note**: Edits can only be made to one User's registration at a time.	
Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the record to the correct domain.

Notes

Edit Registered Users for a Scheduled Offering

Step	Activity	View
10.	Make the appropriate changes to the Users' registration information for the Scheduled Offering.	11.	Select the **Send Confirmation Notification to User** check box to provide Users with a confirmation. **Note**: Select the **Instructors**, **Supervisors**, and **Contacts** check boxes accordingly to provide them with confirmations.	
12.	Click **Apply Changes**.	

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have been mistakenly placed in an incorrect domain.

Notes

Withdraw a User from a Scheduled Offering

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Scheduled Offerings** from the left menu.	Items **Scheduled Offerings** Classes
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Search Scheduled Offerings Enter a value for each field that you want to use to filter your search. Some fields allow you to select from a list of values. You can also add or remove search criteria to further refine your search. Case sensitive search: Yes No Offering Type: Item offering type Schedule Block offering type Both Scheduled Offering ID: Starts With Item/Schedule Block ID: Starts With Description: Starts With Start Date After: (MM/DD/YYYY) 10/26/2006 Start Date Before: (MM/DD/YYYY)
4.	Click **Search**.	Search
5.	On the **Results** screen, locate the desired Scheduled Offering. **Tip**: Use the **Ctrl+F** function to quickly find a Scheduled Offering.	Scheduled Offering ID / Item/Schedule Block 909 — Classroom **TIG-AS-AGLEARN** (Rev 11/16/2006 12:00 AM EST) 403 — Classroom **TIG-MSPOWERPOINT-101** (Rev 7/8/2005 01:09 PM EST) 404 — Classroom **TIG-MSPOWERPOINT-101** (Rev 7/8/2005 01:09 PM EST)
6.	Select the **Edit** link corresponding to the desired Scheduled Offering.	Scheduled Offering ID 403 404
7.	Click the **Registration** tab.	Cost Calculation | Cost Summary | Pricing Segments | **Registration** | Contacts
8.	Scroll down to the **Edit the Registered Users for the Scheduled Offering** section.	Edit the Registered Users for the Scheduled Offering
9.	Locate the User to be removed (Withdrawn).	User: LEARNER04 Learner, Alec Registration Status: ENROLL (Enrolled) 11/21/2006 03:03 PM EST Edit

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the record to the correct domain.

Notes

Withdraw a User from a Scheduled Offering

Step	Activity	View
10.	Select the **Select** check box next to the User to be removed (withdrawn) from the Scheduled Offering.	11.	Click **Remove**.	
12.	Select the **Send Confirmation Notification to User** check box to provide Users with a confirmation. **Note**: Scroll down to the bottom of the list of names to select the **Instructors**, **Supervisors**, and **Contacts** you wish to also receive confirmations.	
13.	Select the **Remove associated item from the learning plan** check box to remove the Item from the learning plan.	14.	Click **Apply Changes**.	

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have been mistakenly placed in an incorrect domain.

Notes

Remind students that required fields are identified by a red asterisk. Although remaining fields are not required, students should complete as many as they feel are necessary.

The Class Roster report displays each selected Scheduled Offering to include in the report and the instructor and Learners who have been scheduled for it.

Create a Class Roster Registration Report

Step	Activity	View
1.	Select the **Reports** menu.	Reports
2.	Select **Learning** from the left menu.	+ Performance + Learning + Content
3.	Select **Class Roster**.	Class Progress **Class Roster** Curricula with Related Job Positions
4.	Enter a title for the report in the **Report Title** field. **Note**: The default entry for this field is Class Roster.	Report Title: Class Roster
5.	Enter a header and footer for the report in their respective fields.	Report Header: Report Footer:
6.	Click either the **Browser** or **Local File** view option to view the report. **Note**: **Browser** is the default selection; when selected, it displays the report within the browser. Selecting **Local File** saves the report to your hard drive to be opened at your convenience.	Report Destination: Browser Local File
7.	Click the **XML**, **CSV**, **HTML**, or **PDF** view option for creating the report. **Note**: The default format is HTML.	Report Format: XML CSV HTML PDF
8.	Select the **Mask User IDs** check box to mask a User's ID. **Note**: The default setting is for this check box to be selected so User IDs can not be read.	Mask User IDs

Notes

If students know the Scheduled Offering ID for which they want a roster, they can enter it directly into the **Scheduled Offerings** field. Multiple IDs should be separated with a comma.

Create a Class Roster Registration Report

Step	Activity	View
9.	Select the **Page Break Between Records** check box to break the report between each record. Note: The default setting is for this check box to not be selected.	10.	Select the **Filter** icon. The Scheduled Offering ID may be typed directly into the box, if known.	11.	Search for desired Scheduled Offering.	12.	Click **Search**.	
13.	Select the **Select** check box corresponding to each Scheduled Offering for which a roster will be printed.	
14.	Click **Submit Selection**.	15.	On the **View Filter** tab, select the **Remove** check box corresponding to any Scheduled Offering to be removed from the filter. Note: To add a Scheduled Offering to the filter on this tab, enter the Scheduled Offering ID in the Scheduled Offerings field and click Add.	16.	Click **Submit Filter**.	

Notes

Create a Class Roster Registration Report

Step	Activity	View
17.	Click **Run Report**.	Run Report

Inform students they can click **Schedule Job** to specify a date and time to run the report as a background job or to click **Reset** to revert to system default.

Notes

Use the Registration Assistant Tool to Register a User for a Scheduled Offering

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Tools** from the left menu.	Tasks + Tools + Resources
3.	Select **Registration Assistant**.	Curriculum Scheduling **Registration Assistant** Inventory Adjustment
4.	Select the **Register Users** option button. **Note**: This is the default selection.	Withdraw Users Reserve Slots Register Users
5.	Click **Next**.	Next
6.	Click the **Scheduled Offering** Search icon.	* Scheduled Offering:
7.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Search Scheduled Offerings Enter a value for each field that you want to use to filter your search. Some fields allow you to select from a list of values. You can also add or remove search criteria to further refine your search. Case sensitive search: Yes No Offering Type: Item offering type Schedule Block offering type Both Scheduled Offering ID: Starts With Item/Schedule Block ID: Starts With Description: Starts With Start Date After: (MM/DD/YYYY) 10/26/2006 Start Date Before: (MM/DD/YYYY)
8.	Click **Search**.	Search
9.	On the **Results** tab, select the **Select** link for the Scheduled Offering to be added and return to the **Step 2**: **Select Scheduled Offering** screen.	Scheduled Offering ID / Item/Schedule Block / Description 643 — Classroom **TNG-MSWORD-101** (Rev 7/8/2005 01:02 PM EST) — Select 259 — Classroom **TNG-MSWORD-101** (Rev 7/8/2005 01:02 PM EST) — Select
10.	Click **Next**.	Next

Inform students that the Registration Assistant tool is helpful for situations in which more than one Learner must be registered or unregistered.

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

Notes

Use the Registration Assistant Tool to Register a User for a Scheduled Offering

Step	Activity	View
11.	Select the **Add one or more from list** link to search for and enter Users.	12.	On the **> Search** screen, enter the appropriate search criteria.	13.	Click **Search**.	
14.	On the **Results** tab, select the **Add** check box next to each User to be added.	
15.	Click **Add**.	
16.	Scroll down to the **Edit Users** section.	
17.	Remove Users as necessary by checking the appropriate **Remove** box.	
18.	Click **Apply Changes**.	
19.	Click **Next**.	
20.	Enter additional comments/information pertaining to each User in the corresponding **Comments** field.	
21.	Click **Next**.	

Inform students that it is unnecessary to click **Apply Changes** at this point.

Notes

Use the Registration Assistant Tool to Register a User for a Scheduled Offering

Inform students that for the purposes of this training cost is not being addressed and as such they should not make any changes to the **Step 5: Edit Financial Data** screen.

Step	Activity	View
22.	Click **Next** to skip the **Step 5**: **Edit Financial Data** screen.	
23.	Select the **Email confirmations to Users**, **Instructors**, **Supervisors**, and/or **Contacts** check boxes if it is applicable.	
24.	Click **Finish**.	
25.	Review the Scheduled Offering's registration status on the **Finish** screen.	

Tip: If a Scheduled Offering can not be located, search for the Scheduled Offering in other domains. During data entry, the Scheduled Offering may have been mistakenly placed in an incorrect domain.

Tip: When using the Registration Assistant tool to Withdraw a student, steps are similar to those above, with the exception of two elements:

1. Select the **Withdraw** check box for those students to be Withdrawn.
2. On the final step, select the **Remove associated item from the learning plan** check box to remove the Item from the User's Learning Plan.

Tip: To avoid data formatting errors, use the Selection icon assistant.

Note: See **Managing Data Entry and Searches** for more detailed information pertaining to the **Selection** icon.

Notes

Use the Registration Assistant Tool to Reserve Slots for a Scheduled Offering

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Tools** from the left menu.	Tasks + Tools + Resources
3.	Select **Registration Assistant**.	Curriculum Scheduling **Registration Assistant** Inventory Adjustment
4.	Select the **Reserve Slots** option button.	Withdraw Users Reserve Slots Register Users
5.	Click **Next**.	Next
6.	Click the **Scheduled Offering** Search icon.	* Scheduled Offering:
7.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Search Scheduled Offerings Enter a value for each field that you want to use to filter your search. Some fields allow you to select from a list of values. You can also add or remove search criteria to further refine your search. Case sensitive search: Yes No Offering Type: Item offering type Schedule Block offering type Both Scheduled Offering ID: Starts With Item/Schedule Block ID: Starts With Description: Starts With Start Date After: (MM/DD/YYYY) 10/26/2006 Start Date Before: (MM/DD/YYYY)
8.	Click **Search**.	Search
9.	On the **Results** screen, select the **Select** link for the Scheduled Offering to be added and return to the **Step 2**: **Select Scheduled Offering** screen.	Scheduled Offering ID / Item/Schedule Block / Description 643 — Classroom **TIG-MSWORD-101** (Rev 7/8/2005 01:02 PM EST) — Select 259 — Classroom **TIG-MSWORD-101** (Rev 7/8/2005 01:02 PM EST) — Select
10.	Click **Next**.	Next

If the Scheduled Offering is in an incorrect domain, a person with the right permissions will need to move the record to the correct domain.

Notes

Use the Registration Assistant Tool to Reserve Slots for a Scheduled Offering

Step	Activity	View
11.	Click the **Organization ID** Search icon to select and enter an Organization ID.	
12.	On the **> Search** screen, enter the appropriate search criteria.	13.	Click **Search**.	
14.	Select the **Select** link next to the Organization to be added.	15.	Enter the required number of slots in the **Slots** field.	
16.	Select a status from the **Registration Status** drop-down list. **Note**: The default is set to **Enrolled**.	17.	Click the **Calendar** icon to select and enter a Reservation date. **Note**: The default is set to the current date.	

Remind students that they do not need to change the fields if the default field is accurate.

Notes

Use the Registration Assistant Tool to Reserve Slots for a Scheduled Offering

Remind students that they do not need to change the fields if the default field is accurate

Step	Activity	View
18.	Enter the reservation time in the **Time** field.	
19.	Click the **Time Zone** Selection icon to select and enter a Time Zone.	
20.	Click **Add**.	
21.	Click **Next**.	
22.	Enter additional comments/information about the Organization in the **Comments** field.	
23.	Click **Next**.	
24.	Click **Next** to skip the **Step 5**: **Edit Financial Data** screen.	
25.	Select the **Email confirmations to Organizations** check box if it is applicable to this Scheduled Offering registration.	26.	Click **Finish**.	
27.	Review the Scheduled Offering's registration status on the **Finish** screen.	

Tip: To avoid data formatting errors use the Calendar and Selection icon assistants.

Note: See **Managing Data Entry and Searches** for more detailed information pertaining to the **Selection** and **Calendar** icons.

Managing Curricula Records

A Curriculum is a grouping of learning. The Requirements, Subcurricula, Items, and Documents are grouped to make them easier to assign, track, and maintain.

Curricula management tasks are accessible from the **Learning > Curricula** menu.

Managing Curricula tasks include: **Creating Requirements**, **View**, **Add**, **Edit**, **Copy**, and **Delete a Curriculum Record**.

A Day-in-the-Life Scenario

All new employees are required to take a series of learning events, including an orientation class, privacy basics, security literacy, and ethics and civil rights training. The easiest way to assign and track this is to create a curriculum containing all of the required Items and verify its completion.

Requirements

Requirements are intended to give the administrator, and the User, more flexibility. Now the User can choose several Items from a larger pool, or complete any number of Items from the pool, so long as a minimum number of contact hours (or credits) is met. The original parameters are set by the administrator; the User then makes specific choices to best suit his/her needs and preferences.

Requirements are assigned to Users through curricula. The administrator associates a requirement with a curriculum, and then assigns the curriculum to a User, thus providing an easy-to-use mechanism for the User to complete the requirement. Requirements can use period-based assignments, just as curricula could before, so that mandatory retraining intervals can be enforced.

Space and time restrictions prohibit a comprehensive discussion of all the permutations possible with requirements. The fundamentals will be discussed here; more detailed information will be available in the online AgLearn Administrators' Reference.

There are three basic types of requirements. You may specify a number of Items from a pool, a number of hours or credits from a pool of Items, or just a number of hours or credits. Examples of each:

- Items from a pool of Items – The requirement may be for the User to complete any three from a pool of five Items (two from a pool of three, four of six, etc.). Ethics training, for example, requires the User to take three Items each year, from a pool of seventeen.
- Hours (or credits) from a pool of Items – The requirement may be to complete fifteen hours from a pool of Items; credits, or Continuing Professional Education units (CPE) may also be used. Some certifications require Users to attain a specified number of CPE units in their field each year to retain their certification.
- Hours (or credits) from any Items – An agency or organization may require any or all of its employees to complete forty hours a year of training, regardless of the discipline or subject.

Like many things in AgLearn, creating requirements is not difficult, but it has to be done correctly. Below are the steps required to create each of the three major requirements.

Creating a New Requirement: Items from a Pool of Items

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Requirements**.	Curricula Requirements Communities
3.	Select **Add New**.	Search | Add New | Help |
4.	In the **Add New Requirement** module, go to the **Requirement Type** drop-down list and choose **# Items from Pool of Items**.	* Requirement Type: # Hours of specified Hour Type * ID: Description: # Hours of specified Hour Type # Hours of specified Hour Type from Pool of Items # Items from Pool of Items
5.	Type an **ID** and **Description** for the requirement.	* ID: Description:
6.	Type a **Domain ID** or search for one by clicking the Search icon.	* Domain: PUBLIC
7.	Accept the default **Creation Date**, type a different date, or click the Calendar icon to select a date.	* Creation Date: (MM/DD/YYYY) 11/22/2006
8.	Uncheck the **Active** checkbox if you wish to make the requirement inactive. (Requirements are active upon creation by default.)	Active:
9.	Type **Comments** if you wish.	Comments:
10.	Click **Next**.	Next

Creating a New Requirement: Items from a Pool of Items

Step	Activity	View
11.	Add Items to the **Item Pool** by clicking the **Add one or more from list** link. **Note**: The number of Items must be equal to or greater than the number entered into the **Required Number of Items** field in Step 12.	12.	Click **Add** after each Item selected until you have all the Items needed for the pool.	
13.	Type the **Required Number of Items**. **Note**: The required number of Items must be equal to or greater than the number of Items in the pool.	14.	Click the **Add** button nearest the top of the page.	

Creating a New Requirement: Hours of a Specified Type from a Pool of Items

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Requirements**.	Curricula Requirements Communities
3.	Select **Add New**.	Search | Add New | Help |
4.	In the **Add New Requirement** module, go to the **Requirement Type** drop-down list and choose **# Hours of specified Hour Type from Pool of Items**.	* Requirement Type: # Hours of specified Hour Type * ID: Description: # Hours of specified Hour Type # Hours of specified Hour Type from Pool of Items # Items from Pool of Items
5.	Type an **ID** and **Description** for the requirement.	* ID: Description:
6.	Type a **Domain ID** or search for one by clicking the Search icon.	* Domain: PUBLIC
7.	Accept the default **Creation Date**, type a different date, or click the Calendar icon to select a date.	* Creation Date: (MM/DD/YYYY) 11/22/2006
8.	Uncheck the **Active** checkbox if you wish to make the requirement inactive. (Requirements are active upon creation by default.)	Active:
9.	Type **Comments** if you wish.	Comments:
10.	Click **Next**.	Next

Creating a New Requirement: Hours of a Specified Type from a Pool of Items

Step	Activity	View
11.	Select the **Hour Type** from the drop-down list.	12.	Enter the **Required Hours** (i.e., hours of the required type needed to fulfill the requirement).	
13.	Add at least one Item to the **Item Pool** by clicking the **Add one or more from list** link in the **Create Item Pool** module.	
14.	Click **Add** after each addition until you have the complete pool.	
15.	When all Items have been added, click the **Add** button nearest the top of the page.	

Creating a New Requirement: Hours of a Specified Hour Type

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Requirements**.	Curricula Requirements Communities
3.	Select **Add New**.	Search | Add New | Help |
4.	In the **Add New Requirement** module, go to the **Requirement Type** drop-down list and choose **# Hours of specified Hour Type**.	* Requirement Type: # Hours of specified Hour Type * ID: Description: # Hours of specified Hour Type # Hours of specified Hour Type from Pool of Items # Items from Pool of Items
5.	Type an **ID** and **Description** for the requirement.	* ID: Description:
6.	Type a **Domain ID** or search for one by clicking the Search icon.	* Domain: PUBLIC
7.	Accept the default **Creation Date**, type a different date, or click the Calendar icon to select a date.	* Creation Date: (MM/DD/YYYY) 11/22/2006
8.	Uncheck the **Active** checkbox if you wish to make the requirement inactive. (Requirements are active upon creation by default.)	Active:
9.	Type **Comments**, if you wish.	Comments:
10.	Click **Next**.	Next

Creating a New Requirement: Hours of a Specified Hour Type

Step	Activity	View
11.	Select the **Hour Type** from the drop-down list.	12.	Enter the **Required Hours** (i.e., hours of the required type needed to fulfill the requirement).	
13.	Click the **Add** button.	

Requirement Grouping

Requirements can be assigned to a curriculum individually, in multiples, or in groups. When assigned individually, the requirement must be fulfilled for the curriculum to be considered complete. When multiple requirements are assigned to a curriculum, **all** requirements must be fulfilled for the curriculum to be considered complete.

Requirement Groups allow administrators to assign multiple requirements to a curriculum, and leave it to the User to decide which requirement to fulfill to complete the curriculum.

For example, if a curriculum has two standalone requirements, A and B, the User must fulfill Requirement A *and* Requirement B for the curriculum to be completed. If Requirements A and B are grouped together, the User may fulfill either Requirement A *or* Requirement B to complete the curriculum.

Creating a Requirement Group

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Curricula**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **Results** tab, locate the desired Curriculum record. **Tip**: Use the **Ctrl+F** function to quickly find a Curriculum on the screen.	6.	Click the **Edit** icon for the Curriculum.	
Creating a Requirement Group

Step	Activity	View
7.	Click the **Requirements** tab.	Catalogs Items | **Requirements** | Subcurricula
8.	Find the requirements that you wish to group together and click the corresponding **Select** checkboxes.	Requirement | Description | Select AC Requirement TEST - 4 items from item pool | Excel Requirement A | Edit AC Requirement Test 2 - 4 items from item pool | Excel Requirement B | Edit
9.	Click the **Group** button.	Group
10.	Enter a **Group Description**.	Group Description:
11.	(Optional) Enter an **Initial Number**, select an **Initial Period** from the drop-down list, and choose the **Initial Basis** (either Calendar or Event).	Initial Assignments: Initial Number: (1000,001) Initial Period: Days Initial Basis: Calendar Event
12.	(Optional) Enter the **Retraining Number**, select a **Retraining Period** from the drop-down list, and choose the **Retraining Basis** (either Calendar or Event).	Retraining Assignments: Retraining Number: (1000,001) Retraining Period: Days Retraining Basis: Calendar Event
13.	Click the Calendar icon to select an **Effective Date**.	Effective Date: (MM/DD/YYYY)
14.	Click **Create Group**.	Create Group
15.	The Group will appear in the **Update the Requirements for the Curriculum** section. Click the Expand icon to review the data and the Edit link to update it.	Update the Requirements for the Curriculum Remove Group Select All / Deselect All Requirement | Description | Select Requirement Group | Excel Group 1 | Edit Initial Assignments: N/A Retraining Assignments: N/A Effective Date: AC Requirement TEST - 4 items from item pool | Excel Requirement A --OR-- AC Requirement Test 2 - 4 items from item pool | Excel Requirement B

Notes

View a Curriculum Record

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Curricula**.	Group Instances Curricula Requirements
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Case sensitive search: Yes No Curriculum ID: Starts With Curriculum Title: Starts With Add/Remove Criteria
4.	Click **Search**.	Search
5.	On the **Results** tab, locate the desired Curriculum record. **Tip**: Use the **Ctrl+F** function to quickly find a Curriculum on the screen.	Curriculum ID / Curriculum Title TNG-AI-APHIS 101 / APHIS TNG-APHIS / TNG-AI-CORN TNG-BH-CURR / Film Writing Curriculum
6.	Select the corresponding **View** icon to view more information.	Curriculum ID 381 AC-TEST CURRICULA ADMIN-BUDGET

If the Curriculum is in an incorrect domain, a person with the right permissions will need to move the record to the correct domain.

After selecting the **View** link, the **> Search > Search Results > View Summary** screen appears.

Notes

Remind students that required fields are identified by a red asterisk. Although remaining fields are not required, students should complete as many as they feel are necessary.

Add a Curriculum Record

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Curricula**.	Group Instances Curricula Requirements
3.	Select the **Add New** link.	Search | Add New | Help |
4.	Enter the curriculum ID in the **Curriculum ID** field. **Note**: Check with your agency lead for the proper AgLearn naming convention.	* Curriculum ID:
5.	Enter a title for the new curriculum in the **Title** field.	Title:
6.	Click the **Creation Date** Calendar icon to select and enter a creation date.	Create Date: (MM/DD/YYYY) 11/20/2006
7.	Select the **Active** check box if the Curriculum is active.	Active:
8.	Click the **Domain** Search icon to search for and enter a domain. **Note**: **Domain** is a required field.	* Domain: PUBLIC
9.	Click the **Curriculum Type** selection icon to search for and enter a curriculum type.	NUT (NUT) PROC (Procurement) PROG (Programs) RISK_MGMT (Risk Management) SCIENCE (Science) SEC (Security) Curriculum Type:

Notes

Inform students they can select the Help link to locate context sensitive help regarding field definitions on each screen.

After clicking the **Add** button, the **> Search > Search Results > Edit Summary** screen appears.

Add a Curriculum Record

Step	Activity	View
10.	Click the Basis Date Calendar icon to select and enter a basis date. **Note**: The **Basis Date** defines the beginning point of the time periods which are built using the initial assignment information or the retraining assignment information.	
11.	Select the **Force Incomplete** check box to have the system calculate the Item's completion status based on the User's latest attempt at completing the Item. **Note**: If the User's latest attempt is incomplete, the system will calculate the expiration and required dates based on the date/time of the last unsuccessful attempt.	12.	Enter a curriculum description in the **Description** field.	
13.	Click **Add**. **Caution**: A **Validation Error** message will appear if all required fields are not complete.	
14.	Review and edit the information displayed on the **Summary** tab.	
15.	Click **Apply Changes**. **Caution**: Do not select a different tab prior to clicking **Apply Changes** or all changes and modifications will be lost.	

Notes

Add a Curriculum Record

Step	Activity	View
16.	Click the **Items** tab.	17.	Select the **Add one or more from list** link to search for and enter Items to the Curriculum.	18.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	19.	Click **Search**.	
20.	Select the corresponding **Add** check box for each Item to be added to the Curriculum.	21.	Click **Add**.	
22.	Review the added Items in the **Update the Items for the Curriculum** section. **Tip**: To remove an Item from the Curriculum, select the corresponding **Remove** check box and click **Apply Changes**.	
23.	Select the **Requirements** tab.	

After selecting the **Items** tab, the **> Search > Search Results > Edit Items** screen appears.

If the Item is in an incorrect domain, a person with the right permissions will need to move it to the correct domain.

Notes

Add a Curriculum Record

Step	Activity	View
24.	Select the **Add one or more from list** link to search for and enter Requirements to the Curriculum.	add one or more from list
25.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Case sensitive search: Yes No Requirement Type: Starts With ID: Starts With Status: Active Not Active Both
26.	Click **Search**.	Search
27.	Select the corresponding **Add** check box for each Requirement to be added to the Curriculum.	Requirement / Add AC Requirement TEST - 4 items from item pool — Excel Requirement A AC Requirement Test 2 - 4 items from item pool — Excel Requirement B
28.	Click **Add**.	Add
29.	Select the **Subcurricula** tab.	Requirements | Subcurricula | Documents
30.	Select the **Add one or more from list** link to search for and enter Subcurricula into the Curriculum.	Enter Curriculum ID or add one or more from list
31.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Case sensitive search: Yes No Curriculum ID: Starts With Curriculum Title: Starts With Add/Remove Criteria
32.	Click **Search**.	Search
33.	Select the corresponding **Add** check box for each Subcurriculum to be added to the Curriculum.	Curriculum ID / Title / Add FS-Safety — Safety and Health Awareness FSR1_SafetyQual — Health and Safety

Curricula can stand alone or be part of another Curriculum as well. For example, CPR Training can be a stand-alone Curriculum or a Subcurriculum of other Curricula.

If a Subcurriculum is in an incorrect domain, a person with the right permissions will need to move it to the correct domain.

Notes

Add a Curriculum Record

Step	Activity	View
34.	Click **Add**.	Add
35.	Scroll down to the **Update the Subcurricula for the Curriculum** section to review the add Curriculum. **Tip**: To remove a Subcurriculum from the Curriculum, select the corresponding **Remove** check box and click **Apply Changes**.	Update the Subcurricula for the Curriculum
36.	Select the **Documents** tab.	Subcurricula | **Documents** | Job Positions
37.	Select the **Add one or more from list** link to search for and enter documents into the **Document ID** field.	Enter Document ID or add one or more from list
38.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Case sensitive search: Yes No Document ID: Starts With Title: Starts With
39.	Click **Search**.	Search
40.	Select the corresponding **Add** check box for each Document to be added to the Curriculum.	Document ID | Description | Add TNG-ARSSEC-PPT | Security at ARS Facilities (PowerPoint Presentation)
41.	Click **Add**.	Add

If the Item is in an incorrect domain, a person with the right permissions will need to move it to the correct domain.

Notes

Add a Curriculum Record

Step	Activity	View
42.	Review the added Documents in the **Update the Documents for the Curriculum** section. **Tip**: To remove a Document from the curriculum, select the corresponding **Remove** check box.	
43.	Select the **Job Positions** tab to view the Job Positions associated with a Curriculum record.	44.	Select the **Assignment Profiles** tab.	
45.	Select the **Add one or more from list** link to search for and enter Assignment Profiles associated with the Curriculum.	
46.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	47.	Click **Search**.	
48.	Select the corresponding **Add** check box for each Assignment Profile to be added to the Curriculum.	49.	Click **Add**.	
50.	Select the **Catalogs** tab.	

Notes

Add a Curriculum Record

Step	Activity	View
51.	Select the **Add one or more from list** link to search for and enter the Catalogs in which you would like for this Curriculum to appear.	
52.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	
53.	Click **Search**.	
54.	Select the corresponding **Add** check box for each Catalog to which the Curriculum should be added.	55.	Click **Add**.	
56.	Designate **Flag** information, and enter an **Expiration Date**, if needed.	
Caution: Do not use the browser **Back** button when using AgLearn – use the menus, links, and breadcrumbs in AgLearn to navigate.

Tip: If a Curriculum, Item or Document can not be located, search for the Curriculum, Item or Document in other domains. During data entry, the Curriculum, Item or Document may have been mistakenly placed in an incorrect domain.

Notes

Edit a Curriculum Record

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Curricula**.	Group Instances Curricula Requirements
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Case sensitive search: Yes No Curriculum ID: Starts With Curriculum Title: Starts With Add/Remove Criteria
4.	Click **Search**.	Search
5.	On the **Search Results** screen, locate the desired Curriculum Record. **Tip**: Use the **Ctrl+F** function to quickly find a Curriculum on the screen.	Curriculum ID / Curriculum Title TNG-AI-APHIS 101 / APHIS TNG-APHIS / TNG-AI-CORN TNG-BH-CURR / Film Writing Curriculum
6.	Select the corresponding **Edit** link.	Curriculum ID TNG-AI-APHIS 101 TNG-APHIS
7.	Make the appropriate changes to the information on the **Summary** tab. **Caution**: Do not select a different tab prior to clicking **Apply Changes** or all changes and modifications will be lost.	Assignment Profiles / Catalogs Summary / Items
8.	Click **Apply Changes**.	Apply Changes
9.	Select the **Items** tab.	Assignment Profiles / Catalogs Summary / Items / Requirements

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If a Curriculum is in an incorrect domain, a person with the right permissions will need to move it to the correct domain.

Notes

Edit a Curriculum Record

Step	Activity	View
10.	Select the **Add one or more from list** link to search for and enter Items into the Curriculum record.	
11.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	12.	Click **Search**.	
13.	On the **Results** screen, select the corresponding **Add** check box for each Item to be added to the Curriculum.	14.	Click **Add**.	
15.	Review the added Items in the **Update the Items for the Curriculum** section. **Tip**: To remove an Item from the curriculum, select the corresponding **Remove** check box.	16.	Select the **Edit** link of the Item to be edited.	
If a Curriculum is in an incorrect domain, a person with the right permissions will need to move it to the correct domain.

Notes

For example, if you want the learners to complete the item within 30 days, select Days from the Initial Period drop-down list and type 30 in the Initial Number text box.

For example, if you want learners to retrain on the item within 2 months, select Months from the Initial Period drop-down list and type 2 in the Initial Number text box.

Tell students that when they create an Item, the default date is the current date; but they may decide to set it to a future date since the curriculum status of any Learner who is assigned the curricula to which they are adding this new Item would become "incomplete" as soon as the Item is Added. By making the effective date a future date, they are defining a "grace period" to allow Learners to complete the new Item in the time allotted, without losing their curriculum.

Tell students that for online Items the system will not prevent a Learner from taking the Items out of the scheduled order (i.e., the Learner can take the Items in any order).

Edit a Curriculum Record

Step	Activity	View
17.	Enter the **Initial Assignments** data. **Note**: The values in these fields indicate how long, in days, weeks, etc., the Users has to complete this Item once it has been assigned.	
18.	Enter the **Retraining Assignments** data. **Note**: The values in these fields indicate how frequently, in days, weeks, etc., the User must be retrained on this Item.	
19.	Click the **Effective Date** Calendar icon to select and enter an effective date. **Note**: The effective date is the date when a new or revised Item will be used for the calculation of Item completion statuses and curriculum statuses.	
20.	Click the **Assignment Type** Selection icon to search for and enter an assignment type.	
21.	Enter a sequence number in the **Sequence Number** field. **Note**: A sequence number indicates the order in which the Items in the curriculum will be scheduled by the system. It is the order the User is expected to take the assigned Items in the curriculum.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Curriculum is in an incorrect domain, a person with the right permissions will need to move the record to the correct domain.

The naming convention for Curriculum Names is “LLL-Description.

Notes

Copy a Curriculum Record

Step	Activity	View
10.	Select the **Job position relationships**, **Item relationships**, **Requirement relationships**, **Curriculum hierarchy relationships**, and/or **User assignments** check boxes to copy these items to the new Curriculum.	11.	Click **Copy**.	
12.	On the **Results** tab, select the new Curriculum's **Edit** link.	13.	Review the new Curriculum record's data. Edit data as appropriate. **Note**: See **Edit a Curriculum Record** for deletion, substitution, and re-ordering steps.	

After clicking the **Copy** button, the **>Search** screen appears, including the copied/new Curriculum.

Inform students that at this point, the only difference between the original and copied Curriculum is the ID; appropriate edits are required.

Tip: If a Curriculum can not be located, search for the Curriculum in other domains. During data entry, the Curriculum may have been mistakenly placed in an incorrect domain.

Notes

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Curriculum is in an incorrect domain, a person with the right permissions will need to move the record to the correct domain.

Delete a Curriculum Record

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Curricula**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **Results** tab, locate the desired Curriculum record. **Tip**: Use the **Ctrl+F** function to quickly find a Curriculum on the screen.	6.	Select the **Edit** link for the Curriculum to be deleted.	7.	Click **Delete**.	
8.	Click **OK** in the **Confirmation** box.	
Tip: If a Curriculum can not be located, search for the Curriculum in other domains. During data entry, the Curriculum may have been mistakenly placed in an incorrect domain.

Managing Curriculum Assignments

A Curriculum is a grouping of learning Items. Subcurricula, Items, and Documents are grouped in a Curriculum to make them easier to assign, track, and maintain.

Curriculum assignments are managed by editing the Curricula tab of the User record. To assign curricula to multiple Users, see the **User Needs Management Assistant** (User Management menu).

Managing Curriculum Assignment tasks include: **Assign a Curriculum** and **Unassign a Curriculum to a User Record**.

A Day-in-the-Life Scenario

You are asked to:

- Add a Curriculum to a User's record, with a Required Completion date of 90 days from today
- Delete a Curriculum from a User's record

Notes

Assign a Curriculum to a User Record

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Users**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	
Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

When creating a new Curriculum for students to add to Learners' Learning Plans, create some of the Scheduled Offerings of the Items with a self registration option. Students will then be able to login as a Learner, view the Curriculum, and register for one of the Items.

Notes

Assign a Curriculum to a User Record

Step	Activity	View
4.	Click **Search**.	
5.	On the **Results** screen, locate the desired User record. **Tip**: Use the **Ctrl+F** function to quickly find a User record on the screen.	6.	Select the corresponding **Edit** link.	7.	Click the **Curricula** tab.	
8.	Click **Attach Job Related Curricula** to assign all the Curricula which are associated with the selected User's job position.	9.	Select the **Add one or more from list** link to search for and enter a curriculum ID and assign date.	
10.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	
To assign curricula to multiple learners, see the Learner Needs Management Assistant (Learner Management menu).

If the Learner is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

After selecting the **Edit** link, the **> Search > Search Results > Edit Summary** screen appears.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Notes

Assign a Curriculum to a User Record

Step	Activity	View
11.	Click **Search**.	
12.	Select the desired curriculum's corresponding **Add** check box.	
13.	Click **Add**.	
14.	Scroll down to the **Update the Curricula for the User** section to view the newly assigned curriculum.	15.	Click the **Details** link to view the Items for the Curriculum.	
16.	Click **Close** to close the Curricula Items window.	
17.	Click the **Learning Plan** tab to enter the required dates for the curricula and subcurricula.	
18.	Scroll down to the **Update the Learning Plan for the User** section.	
19.	Click the **Req. Date** Calendar icon to select and enter the date by which that User must complete the Item. Repeat for all Items listed.	

After clicking the Search button, the **Results** tab appears. If the Learner is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

If the Curriculum has associated subcurricula, a Plus sign (**+**) will precede the name of the Curriculum.

Some roles allow changing the Assign Date after it is added to the Learner record, in the Update the Curricula for the Learner section.

Curricula Items can be modified by clicking the **Learning Plan** tab.

Notes

Assign a Curriculum to a User Record

Step	Activity	View
20.	Click **Apply Changes**. **Caution**: Do not click a different tab prior to clicking **Apply Changes** or all changes and modifications will be lost.	

Caution: Do not use your browser's **Back** button when using AgLearn – use the menus, links, and breadcrumbs in AgLearn to navigate.

Tip: If a User or Curriculum record can not be located, search for the User or Curriculum record in other domains. During data entry, the User or Curriculum may have been mistakenly placed in an incorrect domain.

Notes

Remove a Curriculum from a User Record

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Learner is in an incorrect domain, a person with the right permissions will need to move the corresponding record to the correct domain.

After selecting the **Edit** link, the **Learner record Summary** tab appears.

If students had an opportunity to view the assignment via the Learner interface, have

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Users**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **> Search Results** screen, locate the desired User record. **Tip**: Use the **Ctrl+F** function to quickly find a User record on the screen.	6.	Select the corresponding **Edit** link.	7.	Click the **Curricula** tab.	
8.	Scroll down to the **Update the Curricula for the User** section of the screen.	9.	Select the corresponding **Remove** check box of the Curriculum to be unassigned.	

Notes

Remove a Curriculum from a User Record

Step	Activity	View
10.	Click **Apply Changes**. **Caution**: Do not click a different tab prior to clicking **Apply Changes** or all changes and modifications will be lost.	Apply Changes

them return to the Learner interface once the Curriculum has been unassigned to view the difference.

Caution: Do not use your browser's **Back** button when using AgLearn – use the menus, links, and breadcrumbs in AgLearn to navigate.

Tip: If a User or Curriculum record can not be located, search for the User or Curriculum record in other domains. During data entry, the User or Curriculum may have been mistakenly placed in an incorrect domain.

Managing Classes

A Class is a group of Users who are assigned the same items and attend and complete the same set of Scheduled Offerings as a group. Each Class has a specific start and end date. Subtasks pertaining to **Managing Classes** are accessible from the **Scheduling** menu. Class specific subtasks include the following: **View**, **Add**, **Edit**, and **Delete a Class Record**. Several reasons for editing a Class record include the following: adding/deleting Users, auto registering Users, and adding a Scheduled Offering.

A Day-in-the-Life Scenario

You have received notification that a group of 5 new employees are starting their jobs next week. They have already been added to AgLearn; it is now your responsibility to assign them to the standard Items that all new hires must complete within their first 3 months on the job.

View a Class Record

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Classes**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **Results** screen, locate the desired Class. **Tip**: Use **Ctrl+F** to quickly find a Class.	
6.	Click the corresponding **View** link to view the Class.	

Add a New Class Record

Step	Activity	View
1.	Select the **Learning** menu.	Learning

Edit a Class Record

Step	Activity	View
10.	Make the appropriate changes. **Note**: On this screen, Scheduled Offerings are added and removed and auto registration is set up.	11.	Click **Apply Changes**.	
12.	Click the **Register Rules** tab.	
13.	Make the appropriate changes.	14.	Click **Apply Changes**.	
15.	Click the **Users** tab.	
16.	Make the appropriate changes. **Note**: Here Users can be added, removed, moved to another Class, and have their Class status changed.	
17.	Click **Apply Changes**.	

Delete a Class Record

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Classes**.	
3.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	4.	Click **Search**.	
5.	On the **Results** tab, locate the desired Class. **Tip**: Use **Ctrl+F** to quickly find a Class.	
6.	Click the corresponding **Edit** icon.	
7.	Click **Delete**.	
8.	Click **OK** in the **Confirmation** box.	
User Needs Management

After introducing the task via the Overview, highlight the roles assigned to perform each subtask

The User Needs Management (UNM) Assistant provides onscreen instructions for each step of the process of adding to, or removing elements from, a User record or group of User records.

The User Needs Management Assistant is available from the **User Management** menu.

User Needs Management Assistant tasks include **Add Curricula**, **Add Items**, **Add Competency Profiles**, **Add Competencies**, **Add Job-related Curricula**, **Add Job-related Competency Profiles**, **Remove Curricula**, **Remove Items**, **Remove Competency Profiles**, and **Remove Competencies to/from User record(s) with the UNM (User Needs Management) Assistant**.

A Day-in-the-Life Scenario:

It has been decided to assign First Aid and CPR training Items to several AgLearn Security Guards involved in a special AgLearn-hosted event.

Notes

Add Curricula to User Record(s) with the UNM Assistant

Remind students that required fields are identified by a red asterisk. Although remaining fields are not required, students should complete as many as they feel necessary.

After clicking **Next**, the **Step 2: Select Learners** screen appears.

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Tools** from the left menu.	
3.	Select **User Needs Mgmt**.	4.	Click the **Add Curricula** option button.	5.	Click **Next** to move to Step 2.	
6.	Select the **Add one or more from list** link to search for and enter Users into the UNM Assistant.	

Notes

Add Curricula to User Record(s) with the UNM Assistant

Step	Activity	View
7.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	8.	Click **Search**.	
9.	On the **Results** tab, select the corresponding **Add** check box for each User to be added.	10.	Click **Add**.	
11.	Review the Users in the **Edit Users** section. **Tip**: To remove a User, select the corresponding **Remove** check box and click **Apply Changes**.	
12.	Click **Next** to move to Step 3.	
13.	Select the **Add one or more from list** link to search for and enter Curricula into the UNM Assistant.	
14.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	15.	Click **Search**.	

After selecting the **add one or more from list** link, the **> Search** screen appears.

After clicking Search, the **Results** tab appears.

After clicking **Add**, the **Step 2: Select Learners** screen appears.

After clicking **Next**, the **Step 3: Adding Curricula** screen appears.

After selecting the **add one or more from list** link, the **> Search** screen appears.

Notes

Add Curricula to User Record(s) with the UNM Assistant

Notes	Step	Activity	View
After clicking Search, the **Results** tab appears.	**16.**	On the **Results** tab, select the corresponding **Add** check box for each curriculum to be added.		17.	Click **Add**.	
After clicking **Add**, the **Step 3: Adding Curricula** screen appears.	**18.**	Review the curricula in the **Edit the List of Curricula for Adding** section. **Tip**: To remove curricula, select the corresponding **Remove** check box and click **Apply Changes**.	After clicking **Next**, the **Step 4: Edit Assign Dates** screen appears.	**19.**	Click **Next** to move to Step 4.	
Tell students that assign dates can be set in the past, but not in the future.	**20.**	For each curriculum listed, click the corresponding **Assign Date** Calendar icon to select and enter an assign date for that curriculum. **Note**: The current date is the default date.	
After clicking **Next**, the **Step 5: Complete Learner Needs Management** screen appears.	**21.**	Click **Next** to move to Step 5.	
Tell students that jobs that will add multiple curricula to many Learners can place a strain on system resources. Schedule large jobs for times when most users are off the system.	**22.**	Click **Run Job Now** to have AgLearn complete the assignment to User record(s). **Note**: See **Scheduling Background Jobs** for more detailed information on scheduling jobs.	

Notes

After clicking **Add**, the **Step 3: Removing Items** screen appears.

Notes

Removing Items from User Record(s) with the UNM Assistant

Step	Activity	View
18.	Review the Items in the **Edit the List of Items for Removal** section. **Tip**: To remove an Item from the **List of Items for Removal**, select the corresponding **Remove** check box.	19.	Click **Run Job Now** to have AgLearn complete the un-assignment to User record(s). **Note**: See **Scheduling Background Jobs** for more detailed information on scheduling jobs.	
20.	Review the Status message(s) on the **Finished** screen.	
Clarify that if an Item was mistakenly added to the Removal list, this action provides a means to correct the error.

Jobs that will remove multiple items from many Learners can place a strain on system resources. Schedule large jobs for times when most users are off the system.

After clicking Run Job Now (or Schedule Job, scheduling the job and clicking Finish) the Finished > Status screen appears.

Caution: Do not use the browser's **Back** button when using the UNM Assistant. Use the **Previous** button to move back to previous step(s).

Tip: If a record can not be located, search for the record in other domains. During data entry, the record may have been mistakenly placed in an incorrect domain.

Notes

Remove Competency Profiles from User Record(s) with the UNM Assistant

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Tools** from the left menu.	
3.	Select **User Needs Mgmt**.	4.	Click the **Remove Competency Profiles** option button.	5.	Click **Next** to move to Step 2.	
6.	Select the **Add one or more from list** link to search for and enter Users into the UNM Assistant.	
7.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	8.	Click **Search**.	
9.	On the **Results** tab, select the corresponding **Add** check box for each User to be added.	
After clicking **Next**, the **Step 2: Select Learners** screen appears.

Remind students that required fields are identified by a red asterisk. Although remaining fields are not required, students should complete as many as they feel necessary.

After selecting the **add one or more from list** link, the **> Search** screen appears.

After clicking Search, the **Results** tab appears.

Notes

Remove Competency Profiles from User Record(s) with the UNM Assistant

Step	Activity	View
10.	Click **Add**.	
11.	Review the added Users in the **Edit Users** section. **Tip**: To remove a User, select the corresponding **Remove** check box and click **Apply Changes**.	
12.	Click **Next** to move to Step 3.	
13.	Select the **Add one or more from list** link to search for and enter competency profiles into the list of competency profiles for removal.	
14.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	
15.	Click **Search**.	
16.	On the **Results** tab, select the corresponding **Add** check box for each competency profile to be added to the list of competency profiles for removal.	
17.	Click **Add**.	

After clicking **Add**, the **Step 2: Select Learners** screen appears.

After clicking **Next**, the **Step 3: Removing Competency Profiles** screen appears.

After selecting the **add one or more from list** link, the **> Search** screen appears.

After clicking Search, the **Results** tab appears.

Clarify that students are building a list of profiles to be removed.

After clicking **Add**, the **Step 3: Removing Competency Profiles** screen appears.

Notes

Remove Competency Profiles from User Record(s) with the UNM Assistant

Step	Activity	View
18.	Review the Competency Profiles in the **Edit the List of Competency Profiles for Removal** section. **Tip**: To remove a Competency Profile from the **List of Competency Profiles for Removal**, select the corresponding **Remove** check box.	19.	Click **Run Job Now** to have AgLearn complete the un-assignment to User record(s). **Note**: See **Scheduling Background Jobs** for more detailed information on scheduling jobs.	
20.	Review the **Status** message on the **Finished** screen.	
Clarify that if a profile was mistakenly added to the Removal list, this action provides a means to correct the error.

Tell students that jobs that will remove multiple items from many Learners can place a strain on system resources. Schedule large jobs for times when most users are off the system.

After clicking Run Job Now (or Schedule Job, scheduling the job and clicking Finish) the Finished > Status screen appears.

Caution: Do not use the browser's **Back** button when using the UNM Assistant. Use the **Previous** button to move back to previous step(s).
Tip: If a record can not be located, search for the record in other domains. During data entry, the record may have been mistakenly placed in an incorrect domain.

Notes

Remove Competencies from User Record(s) with the UNM Assistant

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Tools** from the left menu.	
3.	Select **User Needs Mgmt**.	4.	Click the **Remove Competencies** option button.	5.	Click **Next** to move to Step 2.	
6.	Select the **Add one or more from list** link to search for and enter Users into the UNM Assistant.	
7.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	8.	Click **Search**.	
9.	On the **Results** tab select the corresponding **Add** check box for each User to be added.	
After clicking **Next**, the **Step 2: Select Learners** screen appears.

Remind students that required fields are identified by a red asterisk. Although remaining fields are not required, students should complete as many as they feel necessary.

After selecting the **add one or more from list** link, the **> Search** screen appears.

After clicking Search, the **Results** tab appears.

Notes

Remove Competencies from User Record(s) with the UNM Assistant

Step	Activity	View
10.	Click **Add**.	
11.	Review the added Users in the **Edit Users** section. **Tip**: To remove a User, select the corresponding **Remove** check box and click **Apply Changes**.	
12.	Click **Next** to move to Step 3.	
13.	Select the **Add one or more from list** link to search for and enter competencies into the list of competencies for removal.	
14.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	
15.	Click **Search**.	
16.	On the **Results** tab, select the corresponding **Add** check box for each competency to be added to the list of competencies for removal.	17.	Click **Add**.	

After clicking **Add**, the **Step 2: Select Learners** screen appears.

After clicking **Next**, the **Step 3: Removing Competencies** screen appears.

After selecting the **add one or more from list** link, the **> Search** screen appears.

After clicking Search, the **Results** tab appears.

Clarify that students are building a list of competencies to be removed.

After clicking **Add**, the **Step 3: Removing Competencies** screen appears.

Notes

Remove Competencies from User Record(s) with the UNM Assistant

Step	Activity	View
18.	Review the Competencies in the **Edit the List of Competencies for Removal** section. **Tip**: To remove a competency from the **List of Competencies for Removal**, select the corresponding **Remove** check box.	
19.	Click **Run Job Now** to have AgLearn complete the un-assignment to User record(s). **Note**: See **Scheduling Background Jobs** for more detailed information on scheduling jobs.	
20.	Review the Status message on the **Finished** screen.	
Clarify that if a competency was mistakenly added to the Removal list, this action provides a means to correct the error.

Tell students that jobs that will remove multiple items from many Learners can place a strain on system resources. Schedule large jobs for times when most users are off the system.

After clicking Run Job Now (or Schedule Job, scheduling the job and clicking Finish) the Finished > Status screen appears.

Caution: Do not use the browser's **Back** button when using the UNM Assistant. Use the **Previous** button to move back to previous step(s).

Tip: If a record can not be located, search for the record in other domains. During data entry, the record may have been mistakenly placed in an incorrect domain.

Managing Learning Events

After introducing the task via the Overview, highlight the roles assigned to perform each subtask.

A learning event refers to a User's completion of an Item, or attempt at completion. Subtasks pertaining to **Managing Learning Events** are accessible from the **User Management** menu. User-specific subtasks include the following: **View**, **Edit**, and **Delete a Learning Event**, and **Record a Learning Event for an Item**, **an External Event**, and a **Scheduled Offering**.

A Day-in-the-Life Scenario

A group of Users just completed their required prerequisite reading for a course.

Notes

View a Learning Event

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Tools** from the left menu.	
3.	Select **Learning Event Editor**.	4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	Locate the desired event on the **Results** screen. **Tip**: Use **Ctrl+F** to quickly find an event.	7.	Select the **View** link corresponding to the desired event.	
Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

User ID	User Name	Item	Description	Completion Date	Completion Status
LEARNER01	Learner, Raymond	Classroom **USDA-NEWEMPLOYEE** (Rev 10/6/2004 12:09 AM EST)	USDA New Employee Orientation	5/5/2006 06:24 PM EST	Class Completed
LEARNER01	Learner, Raymond	Classroom **TIG-JTF-C-LSFD** (Rev 11/16/2006 02:23 PM EST)	AMS Livestock Food Defense Awareness Training (FINAL)	5/22/2006 04:00 PM EST	Class Completed

User ID	User Name
LEARNER01	Learner, Raymond

Notes

Edit a Learning Event

Remind students that complete definitions of terms are included in the glossary.

Have students skip to the Record a Learning Event for an Item task in order to have a Learning Event to edit.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Inform students that for the purposes of this training cost is not being addressed and as such they should not enter/change any information on the **Financial** tab.

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Tools** from the left menu.	
3.	Select **Learning Event Editor**.	4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	Locate the desired event on the **Results** tab. **Tip**: Use the **Ctrl+F** function to quickly find an event.	7.	Select the **Edit** link corresponding to the desired Learning Event.	
User ID	User Name	Item	Description	Completion Date	Completion Status
LEARNER01	Learner, Raymond	Classroom USDA-NEWEMPLOYEE (Rev 10/6/2004 12:09 AM EST)	USDA New Employee Orientation	5/5/2006 06:24 PM EST	Class Completed
LEARNER01	Learner, Raymond	Classroom THG-JTF-C-LSFD (Rev 11/16/2006 02:23 PM EST)	AMS Livestock Food Defense Awareness Training (FINAL)	5/22/2006 04:00 PM EST	Class Completed

User ID	User Name
LEARNER01	Learner, Raymond

Notes

Inform students that any information they enter in the **Comments** field is viewable by many. Advise them to use great caution when entering any comments.

Edit a Learning Event

Step	Activity	View
8.	On the **Summary** tab, make the appropriate changes.	9.	Click **Apply Changes**.	

Notes

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Delete a Learning Event

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Tools** from the left menu.	
3.	Select **Learning Event Editor**.	4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	Locate the desired event on the **Results** tab. **Tip**: Use **Ctrl+F** to quickly find an event.	7.	Select the **Edit** link corresponding to the desired Learning Event.	8.	Click **Delete**.	
9.	Click **OK** in the **Confirmation** box.	
Notes

Inform students that they can also add a Learning Event by clicking the **Add New** link on the **Learning Event Editor** search screen which will automatically display the **Learning Event Recorder**.

Examples of Items that would not be Scheduled Offerings include On the Job Training (OJT), an interview, or an article.

Remind students that required fields are identified by a red asterisk. Although remaining fields are not required, students should complete as many as they feel are necessary.

Record a Learning Event for an Item

Step	Activity	View
1.	Select the **User Management** menu.	
2.	Select **Tools** from the left menu.	
3.	Select **Learning Event Recorder**.	
4.	Select the **Item** option. **Note**: This is the default selection.	5.	Click **Next**.	
6.	Click the **Item Type** Search icon to search for and enter an Item for the Learning Event.	
7.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	8.	Click **Search**.	
9.	On the **Results** screen, select the desired Item's corresponding **Select** link to add the Item.	
Notes

Record a Learning Event for an Item

Step	Activity	View
10.	Verify that the associated Item ID appears in the **Item ID** field. **Note**: The **Revision Date** and **Title** fields will fill in automatically when the **Item Type** selection icon is used to select an Item.	* Item ID: TNG-MSEXCEL-101
11.	Verify the Item's revision date appears in the **Revision Date** field. **Note**: If a revision date is not specified, the latest revision of the Item will be assumed.	Revision Date: 7/8/2005 01:06 PM EST
12.	Verify an Item title appears in the **Title** field.	Title: Basic Excel
13.	Click **Next**.	Next
14.	Open the **Instructor** pull-down to choose an Instructor.	Instructor: FAS-Wilkes, GZ123456, 88, learner07
15.	Enter the default grade in the **Default Grade** field. **Note**: The default grade can be numeric or ratings-based.	Default Grade:
16.	Select the default completion status for the User from the **Default Completion Status** drop-down list.	* Default Completion Status: Class Completed (Class Completed) - For Credit; Class Incomplete (Class Incomplete) - Not For Credit; Class Attend (Class Attend) - For Credit; Class Waived (Class Waived) - For Credit; Class NoShow (Class NoShow) - Not For Credit
17.	Click the **Completion Date** selection icon to select and enter a completion date. **Note**: The default entry for this field is the date on which the event is recorded.	* Completion Date: (MM/DD/YYYY) 11/27/2006

Notes

Record a Learning Event for an Item

Step	Activity	View
18.	Enter the completion time in the **Completion Time** field. **Note**: The default entry for this field is the time at which the event is recorded.	* Completion Time: (hh:mm AM/PM) 10:57 AM
19.	Click the **Time Zone** selection icon to search for and enter a time zone. **Note**: The default entry for this field is obtained from the Item record.	Time Zone: EST (Eastern Standard Time)
20.	Enter the default price in the **Default Price** field, if applicable.	Default Price ($): (1000,001.01) 0.00
21.	Enter the number of hours in the **Total Hours** field. **Note**: **Total Hours** is the total number of hours during which the resources for the Item were in use.	Total Hours: (1000,001.01) 8.00
22.	Enter the total number of credit hours that the Users will receive for completing this Item in the **Credit Hours** field. **Note**: **Credit Hours** indicates the number of unit hours printed on a Certificate (i.e., number of CEUs, CMEs, etc.).	Credit Hours: (1000,001.01)
23.	Enter the number of contact hours for the Item in the **Contact Hours** field. **Note**: **Contact Hours** indicates the total number of hours that the Users actually spent on this Item.	Contact Hours: (1000,001.01) 8.00

Tell students to only change the time zone if necessary. They can skip the step if they will use the default entry.

Notes

Record a Learning Event for an Item

Step	Activity	View
24.	Enter the CPE credits in the **CPE** field. **Note**: **CPE** shows the total number of credits for professional education hours that the Users will receive for completing this Item.	
25.	Click **Next**.	
26.	Select the **Add one or more from list** link to search for and enter Users.	
27.	On the **> Search** screen, enter the appropriate search criteria.	28.	On the **Results** tab, select the **Add** check box next to each User to be added to the Learning Event.	29.	Click **Add**.	
30.	Scroll down to the **Edit Selected Users** section.	
31.	Select the **Remove** check box next to each User to be removed from the list of Users who will have learning events recorded.	32.	Click **Apply Changes**.	

The Remove check box is a way to modify the selected list of learners identified on the previous screen. Skip the step if no changes need to be made.

Notes

Record a Learning Event for an Item

Step	Activity	View
33.	Click **Next**.	
34.	Enter comments or grades for each User in the appropriate fields and select the appropriate status for each User from the corresponding **Status** drop-down list.	35.	Click **Next**.	
36.	Click **Next** to skip the **Step 6**: **Edit User Event Financial Information** screen.	
37.	Review the **Step 7**: **Record Event** screen.	38.	Click **Finish**.	
39.	Review the **Finished** screen. **Tip**: Click **Start Over…** to begin recording another Learning Event with the same list of Users.	
Tell students that this now appears on the "Learner's" Student Transcript.

Direct students to **Edit a Learning Event** to verify that the event was recorded, make edits, and apply the changes.

Tip: To avoid data formatting errors, use the Calendar and Selection icon assistants.

Note: See **Managing Data Entry and Searches** for more detailed information pertaining to the **Selection** and **Calendar** icons.

Record a Learning Event for an Item via the Quick Links Wizard

Step	Activity	View
1.	Select **Record Learning** from the Quick Links menu at the top of the screen.	2.	Select **Item** in **What kind of learning do you want to record?**	3.	In the **Search & Add Items Box**, click the **Search** icon next to **Item ID**.	
4.	Search for and add the Item(s) you wish to give credit for in the resulting pop-up box.	5.	In the **Search & Add Users** box, click the **Search** icon next to **User ID**.	
6.	Search for and add the User(s) to whom you wish to give credit in the resulting pop-up box.	
Record a Learning Event for an Item via the Quick Links Wizard

Step	Activity	View
7.	Click **Next**.	Next
8.	Edit the **Completion Date**, if necessary.	* Completion Date (MM/DD/YYYY) 10/25/2006
9.	Complete the **Grade/Completion** box and edit any of the other fields, as necessary. (The example shown is for a classroom Item; the pull-down choices will vary.)	* Grade/Completion Class Completed (Class Completed) - For Credit Class Incomplete (Class Incomplete) - Not For Credit Class Attend (Class Attend) - For Credit Class Waived (Class Waived) - For Credit Class NoShow (Class NoShow) - Not For Credit
10.	Click **Apply Changes**. (You may have to scroll to the right to see it.)	Apply Changes
11.	Click **Next**.	Next
12.	Choose whether you want AgLearn to assess competencies based on each Item's individual settings, assess all Items, or not to assess any competencies.	Change the way competencies are assessed Assess based on item setting / Assess all items / Do Not Assess
13.	Verify the accuracy of the data.	Item: Classroom **TIG-MSEXCEL-101** (Rev 7/8/2005 11:06 AM MST) Title: Basic Excel

User ID	User Name	Grade/Completion	Completion Date	Total Hours	Credit Hours	Contact Hours	CPE	Comments
LEARNER07	Learner, Donna	Class Completed	10/25/2006 02:04 PM MST	8.00		8.00

29.	Click **Next** to skip the **Step 6**: **Edit User Event Financial Information** screen.	
30.	Review the **Step 7**: **Record Event** screen.	31.	Click **Finish**.	
32.	Review the **Finished** screen. **Tip**: Click **Start Over…** to begin recording another Learning Event with the same list of Users. **Tip**: Click **Print** to print the completion certificates for each User in the list. **Tip**: Click **Email…** to Email the completion certificates to each User on the list.	
Tell students that this now appears on the "Learner's" Student Transcript.

Tip: To avoid data formatting errors, use the Calendar and Selection icon assistants.

Note: See **Managing Data Entry and Searches** for more detailed information pertaining to the **Selection** and **Calendar** icons.

Record a Learning Event for a Scheduled Offering via the Quick Links Wizard

Step	Activity	View
1.	Select **Record Learning** from the Quick Links menu at the top of the screen.	
Record a Learning Event for a Scheduled Offering via the Quick Links Wizard

Step	Activity	View
2.	Select **Scheduled Offering** in **What kind of learning do you want to record?**	3.	In the **Search & Add Offerings Box**, click the **Search** icon next to **Scheduled Offering ID**. (If you know the numeric ID of the Scheduled Offering, you may type it directly in the box, and click **Add**.)	
4.	Search for and add the Item(s) for which you wish to give credit in the resulting pop-up box.	5.	In the **Search & Add Users** box, click the **Search** icon next to **User ID**. (If you want AgLearn to automatically populate the class roster for you to edit as needed, click **Auto Fill From Registration**.)	6.	Search for and add the User(s) to whom you wish to give credit in the resulting pop-up box.	
Record a Learning Event for a Scheduled Offering via the Quick Links Wizard

Step	Activity	View
7.	Click **Next**.	Next
8.	Complete the **Grade/Completion** box and edit any of the other fields, as necessary.	9.	Click **Apply Changes**. (You may have to scroll to the right to see it.)	Apply Changes
10.	Click **Next**.	Next
11.	Choose whether you want AgLearn to assess competencies based on each Item's individual settings, assess all Items, or not to assess any competencies.	
12.	Verify the accuracy of the data.	13.	Click **Submit**.	Submit

User ID	User Name	Grade/Completion	Completion Date	Total Hours	Credit Hours	Contact Hours	CPE	Comments
LEARNER07	Learner, Donna	Class Completed	1/12/2006 05:00 PM EST	16.00		8.00		
LEARNER02	Learner, Dashiell	Class Completed	1/12/2006 05:00 PM EST	16.00		8.00		
LEARNER05	Learner, Bill	Class Completed	1/12/2006 05:00 PM EST	16.00		8.00		

After introducing the task via the Overview, highlight the roles assigned to perform each subtask.

Reports

AgLearn data can be displayed and printed by running a report. AgLearn provides many different report options, each of which offers various grouping, sorting, format and print options.

Subtasks pertaining to reports are accessible from the **Reports** menu. All report subtasks provide a method to identify and filter the data shown as well as a screen to identify grouping, sorting, and format options. The report subtasks chosen to illustrate typical report activity steps are the **Run a Class Roster Report**, **Run a Certificate of Completion Report**, **Run a Compliance Report**, and **Run a Deficiency Report**.

A Day-in-the-Life Scenario

A mandatory Workplace Violence Workshop is being offered tomorrow. You have been asked to provide the instructor with a roster of all registrants. Once the workshop is completed, you will need to print a certificate of completion for each attendee. Next week, you will need to generate a compliance report that identifies the percentage of employees who have completed this mandatory workshop.

Notes

Run a Class Roster Report

Remind students that complete definitions of terms are included in the glossary.

Remind students that not all reports are accessible by all roles.

Remind students that the number and type of reports a user is allowed to access will vary depending upon the user's permissions within the LMS.

Remind students that required fields are identified by a red asterisk. Although remaining fields are not

Step	Activity	View
1.	Select the **Reports** menu.	
2.	Select the **Learning** link.	3.	Select the **Class Roster** link.	
4.	Enter a report title in the **Report Title** field. **Note**: The **Report Title** default is set to display the name of the actual report.	

Notes

required, students should complete as many as they feel are necessary.

Scheduled offering IDs can be entered directly into the appropriate field. However, it may be easier to select the scheduled offering(s) from a list, since the IDs may be difficult to memorize.

Run a Class Roster Report

Step	Activity	View
5.	Enter a header and footer for the report in their respective fields. **Note**: **Report Header** and **Footer** do not have a default setting.	Report Header: Report Footer:
6.	Click either the **Browser** or **Local File** view option to select a report destination. **Note**: **Browser** is the default selection, and when selected, it displays the report within the browser. **Local File** saves the report to your computer.	Report Destination: Browser Local File
7.	Click a **Report Format** option button/box to change the report format. **Note**: The **Report Format** default is set to **HTML** with the **Mask User IDs** check box selected and the **Page Break Between Records** checkbox unselected.	Report Format: XML CSV HTML PDF
8.	Click the **Filter** icon to search for a Scheduled Offering.	Scheduled Offering: Exact
9.	On the **Create** Filter tab, enter the appropriate criteria for filtering the Scheduled Offering request.	Search Scheduled Offerings Enter a value for each field that you want to use to filter your search. Some fields allow you to select from a list of values. You can also add or remove search criteria to further refine your search. Case sensitive search: Yes No Offering Type: Item offering type Schedule Block offering type Both Scheduled Offering ID: Starts With Item/Schedule Block ID: Starts With Description: Starts With Start Date After: (MM/DD/YYYY) 10/26/2006 Start Date Before: (MM/DD/YYYY)

Notes

Run a Class Roster Report

Step	Activity	View
10.	Click **Search**.	
11.	Click the **Select** check box corresponding to the appropriate Scheduled Offering(s).	12.	Click **Submit Selection**.	
13.	On the **View Filter** tab, select the **Remove** check box corresponding to any Scheduled Offering to be removed from the filter. **Note**: To add a Scheduled Offering to the filter, enter the Scheduled Offering ID in the **Scheduled Offerings ID** field and click **Add**.	14.	Click **Submit Filter**.	
15.	On the **Run Class Roster** screen, click **Run Report** to display the report. **Note**: The report may take a few minutes to run. If the report does not display, try running the report again or see your Supervisor.	

Inform students that if the number of records in the report exceeds the predefined threshold, they will be directed to a **Schedule Job** screen in order to specify a date and time to run the report as a background job.

Notes

Run a Class Roster Report

Step	Activity	View
16.	Use **Ctrl+P** to open the **Print Dialog** box.	17.	Click **Print** to print the report.	
Note: For additional information about scheduling a background job, see **Scheduling a Background Job**.

Notes

Remind students that complete definitions of terms are included in the glossary.

Remind students that required fields are identified by a red asterisk. Although remaining fields are not required, students should complete as many as they feel are necessary.

Run a Certificate of Completion Report

Step	Activity	View
1.	Select the **Reports** menu.	Reports
2.	Select **User Management** from the left menu.	+ User Management + Performance + Learning

16.	Click the **Detail** radio button if a detailed report is desired. **Note**: The Summary button is checked by default.	Report Type: Summary Detail

Learner IDs can be entered directly into the appropriate field. However, it may be easier to select the scheduled offering(s) from a list, since the IDs may be difficult to memorize.

Notes

Run a User Learning History Report

Step	Activity	View
17.	If this is a frequently-run report, click **Save Report**.	
18.	Fill in a **Saved Report ID** and **Description**.	19.	Click **Submit**.	
20.	On the **Run Training Deficiency Report** screen, click **Run Report** to display the report. **Note**: The report may take a few minutes to run. If the report does not display, try running the report again or see your Supervisor.	
21.	Use **Ctrl+P** to open the **Print Dialog** box.	22.	Click **Print** to print the report.	
Note: For additional information about scheduling a background job, see **Scheduling a Background Job**.

Scheduling Background Jobs

After introducing the task via the Overview, highlight the roles assigned to perform each task.

Reinforce the notion that based on the student's role, the tasks available for scheduling as background jobs vary.

The **Learner Needs Management Assistant** is available through the **Learner Management** menu.

The **Item Revision Assistant** is accessed by selecting **Revise…** when editing an Item.

Tasks that can be time-consuming, include too many records, or dramatically affect system performance should be run as background jobs. **Background jobs** are tasks that are scheduled to run at off-peak work hours, where they can be performed without overloading the system.

Background jobs are scheduled for the tasks available through the **User Needs Management Wizard**, the **Item Revision Wizard**, and for system **Reports**.

Background job scheduling tasks include **View** and **Schedule a Background Job.**

Note: Scheduling a background job is performed during the final step of specific tasks, when both the **Run Job Now** and **Schedule Job** buttons appear.

The tasks available for scheduling as background jobs through the **User Needs Management Assistant** can include: **Add and Remove Curricula**, **Add and Remove Items**, **Add and Remove Competency Profiles**, **Add and Remove Competencies**, **Add Job-related Curricula**, and **Add Job-related Competency Profiles**. See **User Needs Management Assistant** for more detailed information on performing these tasks.

Background jobs can also be scheduled for revising Items, through the **Item Revision Assistant**. See **Managing Items** for more detailed information on using the Item Revision Assistant.

The reports available through the **Reports** menu may be scheduled as background jobs. See **Reports** for more detailed information on running reports.

A Day-in-the-Life Scenario

Your supervisor has requested to see an Instructor Data report of all active instructors currently assigned to teach Items through AgLearn. He has asked for a printed copy by next Thursday, aware that running the report would be a burden on the system during peak work hours.

Notes

Remind students that complete definitions of terms are included in the glossary.

View a Background Job

Step	Activity	View
1.	Select the **Reports** menu.	
2.	Select **System Admin** from the left menu.	
3.	Select **Background Jobs**.	

Notes

Scheduling a task to run as a background job is done when the task is created. Show students that the only links available on the Background Jobs **> Search** screen are **Search** and **Help**.

Background jobs include completion statuses of: Scheduled, Success, and Failed.

Tell students that they will only see their own background jobs

Only the System Administrator can see all background jobs.

View a Background Job

Step	Activity	View
4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching. **Note**: To increase search results, remove the ID from the **Owner** field.	
5.	Click **Search**.	
6.	On the **Results** screen, locate the desired background job.	
7.	Click the corresponding **View** icon to view more information.	
Notes

Remind students that complete definitions of terms are included in the glossary.

The **Allowable Dates/Times For Background Jobs** pop-up window appears.

Schedule a Background Job

Step	Activity	View
1.	Click **Schedule Job**. **Note**: Background jobs are scheduled from within the AgLearn module requesting the job. User Needs Management is used here as an example.	
2.	Select the **Schedule this job to be executed on** option button.	3.	Select the **View Available Time Slots** link to see times when the job can be performed.	
4.	Review the available timeframes from the list displayed in the **Allowable Dates/Times For Background Jobs** window.	5.	Click **Close**.	
6.	Click the **Date** Calendar icon to select and enter the date the background job will run.	
7.	Enter a **Time** for the background job to run.	
8.	Click the **Time Zone** selection icon to search for and enter a Time Zone.	
9.	Enter a brief description of the job in the **Job Description** field.	

Notes

Schedule a Background Job

Step	Activity	View
10.	Select the **Notify via email upon completion** check box to send a notification e-mail.	Notify via email upon completion
11.	Enter the e-mail address for notification in the **Email** field.	**Email:**
12.	Select the **Email the Report** check box to receive a copy of a report with the notification e-mail. **Note**: The **Email the Report** check box appears only for **Reports**.	Email the Report
13.	Click **Finish**.	Finish
14.	Verify that the background job has been scheduled on the **Status** screen. **Note**: Only a System Administrator may reschedule and/or delete background jobs.	**Finished** **Status:** • Your job has been scheduled to run in the background. The job ID is 000000000000000009.

Inform students that the **Email the Report** check box only applies to background jobs for **Reports**.

Point out that the system auto-generates the Job ID when the background job has been successfully scheduled.

Managing Instructors

After introducing the task via the Overview, highlight the roles assigned to perform each task.

An instructor is any person who delivers learning. AgLearn tracks Instructors not only by name, location, and availability, but can keep records about which Items an instructor is authorized to teach. Subtasks pertaining to **Managing Instructors** are accessible from the **Instructors** menu. **Managing Instructors** tasks include: **View**, **Add**, **Edit**, **Delete**, and **Add Authorized Items to Instructors**, and **Remove Authorized Items from Instructors**.

A Day-in-the-Life Scenario

A new instructor has been hired. You need to:

- Add the instructor to AgLearn
- Add two (2) Items that the instructor has been authorized to teach

Notes

View an Instructor Record

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Resources** from the left menu.	
3.	Select **Instructors**.	
4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	On the **Results** screen, locate the desired instructor.	
7.	Click the **View** link to view more information.	

Notes

Remind students that complete definitions of terms are included in the glossary.

For the Instructor ID field, make sure that students do **NOT** enter data in the field, but **DO** check the box to Auto Generate the ID.

Inform students that required fields are identified by a red asterisk, and that the remaining fields are not required. However, encourage them to capture as much information as possible.

Add an Instructor Record

Step	Activity	View
1.	Select **Learning** from the top menu.	Learning
2.	Select **Resources** from the left menu.	+ Tools + Resources + References
3.	Select **Instructors**.	- **Resources** -**Instructors** -Equipment
4.	Select the **Add New** link.	Search | Add New | Help |
5.	Enter the **Instructor ID**	* Instructor ID:
6.	Enter the instructor name in the **Last Name**, **First**, and **MI** fields accordingly.	Last Name: First: MI:
7.	Enter the instructor company in the **Company** field, if known.	Company:
8.	Click the **Domain** Selection icon to search for and enter a domain.	* Domain: PUBLIC
9.	Click the **Organization** Selection icon to search for and enter an organization.	Organization:
10.	Enter an e-mail address in the **Email Address** field.	Email Address:
11.	Enter any comments concerning the instructor in the **Comments** field.	Comments:

Notes

Add an Instructor Record

Step	Activity	View
12.	Select the **Active** check box if the instructor has been designated as active.	Active:
13.	Click **Add**.	

Notes

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Inform students to make all necessary changes using the tabs available. However, caution them to click **Apply Changes** before selecting a different tab. Otherwise they will lose all their changes and modifications.

Edit an Instructor Record

Step	Activity	View
1.	Select **Learning** from the top menu.	
2.	Select **Resources** from the left menu.	
3.	Select **Instructors**.	
4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	On the **Results** tab, locate the desired instructor.	
7.	Click the corresponding **Edit** icon to edit the instructor information.	
8.	Make the appropriate changes and click **Apply Changes**. **Caution**: Do not select a different tab prior to clicking **Apply Changes** or all changes and modifications will be lost.	

Notes

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Delete an Instructor Record

Step	Activity	View
1.	Select **Learning** from the top menu.

Notes

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

After selecting the **Authorized** tab, the **> Search > Search Results > Edit Authorized to Teach** screen appears.

Add Authorized Items to Instructors

Step	Activity	View
1.	Select **Learning** from the top menu.	
2.	Select **Resources** from the left menu.	
3.	Select **Instructors**.	
4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	On the **Results** tab, locate the desired instructor.	
7.	Click the corresponding **Edit** icon to edit the instructor information.	
8.	Click the **Authorized to Teach** tab.	

Notes

Add Authorized Items to Instructors

Step	Activity	View
9.	Select the **Add one or more from list** link, from the **Add an Item to the Instructor Authorized Items** section. **Caution**: Instructors can be scheduled to teach an Item even if they are not authorized to teach that Item.	10.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	11.	Click **Search**.	
12.	On the **Results** tab, locate the desired Item to add to the instructor.	
13.	Select the corresponding **Add** check box.	
14.	Click **Add**.	

Tell students that they are not prevented from scheduling an instructor for an offering of an Item even if the instructor is not authorized to teach that Item.

After selecting the add one or more from list link, the Item **> Search** screen appears.

Notes

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Inform students that after selecting the **Authorized** tab, the **> Search > Search Results > Edit Authorized to Teach** screen appears.

Remove Authorized Items from Instructors

Step	Activity	View
1.	Select **Learning** from the top menu.	
2.	Select **Resources** from the left menu.	
3.	Select **Instructors**.	4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	On the **Results** tab, locate the desired instructor.	
7.	Click the **Edit** icon to edit the instructor information.	
8.	Click the **Authorized to Teach** tab.	9.	From the **Update the Authorized Items for the Instructor** section, locate the Item to be removed.	10.	Select the corresponding **Remove** check box.	11.	Click **Apply Changes**.	

Managing a Material Record

After introducing the task via the Overview, highlight the roles assigned to perform each subtask.

Materials are consumable supply Items used during learning (e.g., pens, handouts, giveaways, etc.). Subtasks pertaining to **Managing Locations** are accessible from the **Locations** menu. User-specific subtasks include the following: **View**, **Add**, **Edit**, **Copy**, and **Delete a Location Record**.

A Day-in-the-Life Scenario

As the week begins, you note the following:

- Three classes were held last week. Total student enrollment in these classes was 78.
- A box of supplies that includes 300 three-ring binders has just arrived.

Notes

View a Material Record

Remind students that complete definitions of terms are included in the glossary.

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Resources** from the left menu.	
3.	Select **Materials**.	
4.	On the **> Search** screen, enter the appropriate search criteria. **Note:** See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	On the **Results** tab, locate the desired material.	
7.	Click the corresponding **View** link to view more information.	
Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Inform students that they can also view information about material inventory, base cost, additional costs, and pricing from this screen.

Notes

Remind students that complete definitions of terms are included in the glossary.

Remind students that required fields are identified by a red asterisk. Although remaining fields are not required, students should complete as many as they feel are necessary.

Add a New Material Record

After introducing the task via the Overview, highlight the roles assigned to perform each subtask.

Managing A Work Week Profile

Work weeks are those days of the week when learning can be scheduled at a facility, and are defined through the creation of work week profiles. Profiles prevent offerings from being scheduled on a day of the week that has been excluded from the work week. Tasks pertaining to work week profiles are accessible from the **Resources** menu. Work week profile specific tasks include the following: **View**, **Add**, **Edit**, and **Delete a work week profile record**.

A Day-in-the-Life Scenario

A facility needs to be available seven days a week to accommodate staff needs.

Notes

After introducing the task via the Overview, highlight the roles assigned to perform each subtask.

Managing Holiday Profiles

Holiday Profiles are used to define the holidays for training facilities. The list of holidays included in the profile can be used for a single facility or assigned to multiple facilities. Once a facility has been assigned a holiday profile, offerings can not be scheduled for holidays included in the profile.

The tasks for Managing Holiday Profiles include: **View**, **Add**, **Edit**, and **Delete a Holiday Profile**, **Add a Holiday to a Holiday Profile**, and **Remove a Holiday from a Holiday Profile**.

A Day-in-the-Life Scenario

The current facility holiday profile does not include Columbus Day. Add the Columbus Day holiday to the facility profile. You'll need to:

- Search for the current Holiday Profile
- Add Columbus Day to the profile

Managing a Facility Record

After introducing the task via the Overview, highlight the roles assigned to perform each subtask.

A facility can be a building (Whitten) or a complex (BARC); its purpose is to provide a logical grouping of "locations" where training takes place. (Locations will be discussed below.) Subtasks pertaining to **Managing Facilities** are accessible from the **Resources** menu. Facility-specific subtasks include the following: **View**, **Add**, **Edit**, **Copy**, and **Delete a Facility Record**.

A Day-in-the-Life Scenario

A new training facility has recently become available for use by your agency. The facility is located approximately 2 blocks from the South Building, and includes six classrooms. Although no equipment is currently located in the new classrooms, you have been authorized to transfer a portion of the equipment that is assigned to your current facility.

Notes

View a Facility Record

Currently, no automatic scripts have been created to add facilities. It is recommended that Domain Managers add facilities manually rather than import them from existing databases.

Remind students that complete definitions of terms are included in the glossary.

Remind students that **Facilities** is the default screen for the **Resources** section.

Step	Activity	View
1.	Select the **Learning** menu.	
2.	Select **Resources** from the left menu.	
3.	Select **Facilities**.	
4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	5.	Click **Search**.	
6.	On the **Results** screen, locate the desired facility.	
7.	Select the corresponding **View** icon to view more information.	
Notes

Add a New Facility Record

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Resources** from the left menu.	+ Tools + Resources + References
3.	Select **Facilities**.	Materials Facilities Locations
4.	Select the **Add New** link.	Search | Add New | Help |
5.	Enter the **Facility ID**.	* Facility ID:
6.	Enter a facility description in the **Description** field. **Tip**: Enter an easily recognizable name for the facility in the **Description** field.	* Description:
7.	Click the **Domain** Search icon to search for and enter a domain.	* Domain: PUBLIC
8.	Click the **Region** Selection icon to search for and enter a region.	Region: APHISER (APHIS Eastern Region [Raleigh NC]) APHISWR (APHIS Western Region [Fort Collins]) ERO (NAD-Eastern Regional Office, Indianapolis) FS-R1 (Region One)
9.	Click the **Holiday Profile** Selection icon to search for and enter a holiday profile.	Holiday Profile: FS-R8 (Region 8 RO) Federal Holidays (11 Federal Holidays) Test
10.	Click the **Time Zone** Selection icon to search for and enter a time zone.	Time Zone: EST (Eastern Standard Time)

Inform students that Facilities is the default screen for the Resources section.

Remind students that complete definitions of terms are included in the glossary.

Tell students that the naming convention for Facility IDs is “LLL-Description” (30 character maximum).

Inform students that the naming convention for Facility descriptions is “LLL-Description” (30 character maximum).

Remind students that required fields are identified by a red asterisk. Although remaining fields are not required, students should complete as many as they feel are necessary.

Tell students that VA is not using Region as an organizational structure for the AgLearn prototype.

Notes

Add a New Facility Record

Step	Activity	View
11.	Click the **Work Week** Selection icon to search for and enter a work week profile.	Work Week: 12.	If applicable, select the **External Facility** check box.	External Facility:
13.	If applicable, enter comments in the **Comments** field.	Comments:
14.	Click **Add**. **Caution**: A **Validation Error** message will appear if all required fields are not complete.	Add
15.	Click the **Contact** tab.	Summary | **Contact** | Locations
16.	Enter information about the facility's contact person in the appropriate fields.	Contact: Address: City: State / Province: Postal Code: Country: Phone Number: Fax Number: Email Address:
17.	Select **Apply Changes**. **Note**: See **Edit a Facility Record** to view information on adding locations, equipment, and materials to a facility.	Apply Changes

Once a new record is submitted, the **Search Results > Edit Summary** screen appears. From this screen, students can add contacts, locations, equipment, and materials to a facility.

Remind students that it is important to enter POC information for a facility.

Notes

Remind students that complete definitions of terms are included in the glossary.

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

Tell students to make all necessary changes using the tabs available. However, caution them to click **Apply Changes** before selecting a different tab or they will lose all their changes and modifications.

Edit a Facility Record

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Resources** from the left menu.	+ Tools + Resources + References
3.	Select **Facilities**.	Materials Facilities Locations
4.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	Facility ID: Starts With Description: Starts With
5.	Click **Search**.	Search
6.	On the **Results** screen, locate the desired facility.	Facility ID / Facility Description FNS05 / Southwest Region FS Tori / Forest Service Training Facility
7.	Select the corresponding **Edit** icon to edit facility information.	Facility ID FNS05 FS Tori
8.	Make the appropriate changes and click **Apply Changes**. **Caution**: Do not select a different tab prior to clicking **Apply Changes** or all changes and modifications will be lost.	Apply Changes
9.	Click the **Contact** tab.	Summary | Contact | Locations
10.	Make the appropriate changes and click **Apply Changes**.	Apply Changes
11.	Click the **Locations** tab.	Contact | Locations | Equipment

Notes

Edit a Facility Record

Step	Activity	View
12.	Select the **Add one or more from list** link to add a new location to the facility.	13.	On the **> Search** screen, enter the appropriate search criteria. **Note**: See **Managing Data Entry and Searches** for more detailed information on searching.	
14.	Click **Search**.	
15.	Find the location and select the corresponding **Add** check box.	
16.	Click **Add** to return to the **Edit Locations** screen. **Note**: Once added, the location will appear in the **Update the Locations for the Facility** section. **Tip**: Click the corresponding **Remove** check box to remove a location from the facility.	
17.	Click the **Equipment** tab.	
18.	Select the **Add one or more from list** link to add equipment to a facility.	
If the Location ID is known, students can enter it directly and click **Add**. (It is an extra step to select it from the list, but possibly easier, since the Location ID may be difficult to memorize.)

Inform students that they can perform either a Simple or Advanced Search depending upon the level of detail they need for their search.

If the Equipment ID is known, students can enter it directly and click **Add**. (It is an extra step to select it from the list, but possibly

9.	Click **OK** in the Confirmation box. **Caution**: Be certain that the facility record selected should be deleted. If unsure, click **Cancel**.	
Managing Training Approval Processes

AgLearn has the ability to manage multiple multi-level training approval processes. The creation of additional approval mechanisms and roles will be handled at a higher level; agency administrators will assign Users to approval roles and associate specific Approval Processes with Items and Scheduled offerings.

An approval process may have as many as six steps, though six-step approvals will be rare. A User's two immediate supervisors are automatically set up in the system to fill two default approval roles; many Items may only require a supervisor approval.

For more complicated processes, seven other roles have been created. This grants each agency the flexibility to use the processes best suited to their needs, and appropriate for each Item. Approval Roles such as Budget, Training Coordinator, and Training Officer can be mapped to specific individuals if those titles exist in your agency. More generic roles (Approver 1, Approver 2, Reviewer, and Final Approver) have been created for processes that need more flexibility in the selection of personnel to fill each role.

A Day-in-the-Life Scenario

It has been decided that Users should get their supervisor and Budget Officer to approve a specific Item before registration is permitted. You must assign a User to the role of Budget Officer and modify the Item record to reflect this new policy.

Notes

Assign an Approval Role to a User

Step	Activity	View
1.	Select **User Management** from the top menu.	
2.	**Search** for the User for whom you wish to add or change an Approval Role.	3.	Locate the User on the **Results** screen.	4.	Click the corresponding **Edit** icon.

Managing Communities

AgLearn enables you to conduct asynchronous, threaded discussions through online communities. Each Community contains one or more topics; the individual topics are composed of multiple messages. Users are then free to read or post messages at their convenience.

Communities in AgLearn are created by administrators and managed by moderators. The administrator functions, including assigning a moderator to the community, are performed from AgLearn Administration. The moderator - who is a User - performs his or her community functions through the User Interface.

A Day-in-the-Life Scenario

A General Community is to be created for AgLearn administrators to exchange ideas. Moderators must be assigned to manage this community.

Notes

Create a General Community

Step	Activity	View
1.	Select the **Learning** menu.	Learning
2.	Select **Communities**.	Requirements Communities Tas
3.	Click **Add New**.	| Search | Subscribed | View All | Add New | Help |
4.	Select the Community Type: **General**.	Select Community Type Item Scheduled Offering General
5.	Click **Next**.	Next
6.	Enter a **Community Title**. **Note**: This is a required field.	Enter General Community Information * = Required Fields * Community Title:
7.	Enter a **Community Description**.	Community Description:

Notes

Add a Community to an Existing Item

Step	Activity	View
9.	Click **Select** on the line of the Item to which the Community is to be added. **Note**: The **Item Type**, **Item ID**, **and Item Title** fields will be automatically populated.	
10.	To lock the community, check the **Lock Community** checkbox. **Note**: Locking the Community prevents new additions or replies. It does not delete the Community, nor does it prevent existing posts from being read.	11.	To subscribe to the newly created community, click the **Subscribe** checkbox. **Note**: Subscribing to a Community allows easy access when logged in as a User without having to search for it.	
12.	Click **Finish**. **Note**: Click **Back** if you wish return to any part of the creation process.	

Note: Communities may be added to an existing Scheduled Offering. The process is essentially the same as above; substitute "**Scheduled Offering**" for "**Item**" in the instructions, and be prepared for screen that will look slightly different. It is a good idea to have the ID number of the Scheduled Offering handy before starting the process.

Glossary

A

Accomplishment: Part of the performance module, Accomplishments are achievements that are not directly related to the User's employment or job satisfaction.

Account Code: The unique code used to track the charge-back information of a transaction.

Active: An active record is available to be updated, fully functional, and will appear on reports. To change the status of an Item or to view, edit, and report on an inactive record, the system administrator must grant the User a security privilege to do so.

Active Locale: Locale is the term used to describe a specific language with a given cultural, geographical, and political region (i.e., a local market). Think of an active locale as a specific language with related information such as numbers, date, and time currency for a specific local market.

Activity: A Learning Event associated with an initiative. Activities are automatically assigned to goals when Users align their goals with an initiative. Users can also assign their own activities to goals. When an activity is assigned to a goal, Users can request a schedule of the related learning, or add the learning event to their learning plans.

Admin User ID: A system ID that appears when AgLearn takes any automatic action, such as moving a User from the Waitlist to Enrolled status when someone withdraws from a Scheduled Offering, or when a training request is denied because the necessary approvals have not been granted before the start date of the learning event.

Adopt an Initiative: Part of the Performance module, describing the copying of an initiative to a subordinate organizational structure. See also *Align an Initiative.*

AICC: Airline Industry CBT Committee. A standard for online courseware that guarantees interchangeability and data exchange capability between online learning development packages and players.

Align an Initiative: To an initiative at the subordinate level in support of initiatives posted at a higher level. See also *Adopt an Initiative.*

Assessed Level: The mastery level earned by the selected User for the associated competency.

Assessment: The assessment/rating of a User's demonstrated Competencies, based on a previously established rating scale. Users can assess themselves or their peers through Assessment Surveys. Administrators can record assessments using the Competency Assessment Recorder. Completed Assessments are displayed in the User's Assessment History.

Assessment Date: The date on which an assessment is completed in AgLearn.

Assessment Process: The procedure by which individual User(s) are assessed on one or more competencies.

Assessment Rating: The relationship between a User's assessed mastery of a competency and the mastery rating expected of the competency.

Assessment Survey: A collection of competencies and rating criteria used to assess one or more Users.

Assignment Profile: Used to automatically assign Curricula, Catalogs, and Competency Profiles based on multiple User attributes, including (but not limited to) Domain ID, Country, Job Position, Job Location, Organization, Employment Type, or State. Users whose attributes match those of the Assignment Profile are automatically assigned the appropriate Curricula, Catalog, or Competency Profile.

Assignment Type: Categories used to help to prioritize a User's learning needs by distinguishing between need-to-have and nice-to-have Items. Typical examples of assignment types in AgLearn are Optional, Recommended, Required, and Legislatively Mandated. Default Assignment Types can be assigned at the Item level, but may be edited to suit the situation of each subsequent assignment.

Associated Costs: Any cost of conducting a segment of a Scheduled Offering that is not otherwise defined. Examples might include food, clean-up, or travel; and any cost of instructors, material, equipment, or location, in addition to those already defined in AgLearn.

Attainment Level: An informal indication of how well a User is progressing toward assigned goals. There are three qualitative statuses for the selected initiative: On Target, Behind Plan, and Ahead of Plan.

Auto Fill Registration Flag: When enabled, moves the next waitlisted User into an enrolled status when a previously enrolled User withdraws from an offering.

Automatic Processes Module (APM): Processes pre-configured to run periodically without human intervention. APMs typically perform housekeeping and notification tasks at scheduled intervals.

B

Background Jobs: Jobs (such as large-scale assignments or reports) that would be too time/processor-intensive to run during normal working hours, and are configured to run during a specific off-hours time period. The number of records defined in the selected job MUST exceed the predefined threshold (Maximum Record Count for Online Operation) set for running background jobs.

Basis Date (curriculum): The basis date defines the beginning point of a curriculum's associated time-periods. The time-periods themselves are built using either the initial assignment information, or the retraining assignment information. Once complete, the Item is not due again until the end of the next designated period. This allows assigned learning that is due once a quarter, or once a year, to be completed at any time during the quarter or year.

Blended Item: A Learning Item type with elements of both Instructor-Led and Online Learning Items.

C

Cancellation Policy: A set of rules used to calculate what the User is charged when withdrawing from a Scheduled Offering.

Cascading Initiatives: Initiatives created in a parent organizational unit that are then made effective in subordinate units. There are ways to push initiatives to subordinate organizations: Forcing requires the sub-organizations to adopt the initiative as is; Require Alignment means the sub-organizations must align one or more of their initiatives to the parent initiative; Make Available gives the sub-organizations the option to align one or more of their initiatives to the parent initiative.

Catalog: A collection of Items and Scheduled Offerings made accessible to Users via Assignment Profiles. Users can only view training that is included in catalogs made visible to them. Items and Scheduled Offerings can be part of more than one catalog.

Chargeback: A financial transaction that occurs internally, between organizations, with one being debited for costs accrued and the other being credited for the price of services delivered. The transaction is systemic only; no invoices or checks actually change hands.

Chargeback Adjustment: A wizard used to reconcile chargeback transactions after closing a Scheduled Offering, debiting the related cost centers, and crediting profit centers of the selected Scheduled Offering. Note: A Scheduled Offering cannot be closed with an open segment.

Circular supervisor relationship: A circular relationship exists when a User is designated as his own supervisor, no matter how many levels removed. AgLearn will not permit such an arrangement and will return a Validation Error to reject any change that would create such a circumstance.

Class: An entity in AgLearn that associates a group of Users with a set of Scheduled Offerings, used to help administrators keep the Users together through a series of Scheduled Offerings. Roughly analogous to school classes, such as freshman class, sophomore class, etc.

Classification: There are four Item classifications: Instructor-Led, Online, Blended, and Other (for physical goods).

Coach: A coach is a User who may view, update, or add comments to a User's Individual Development Plan (IDP), designated by the User or supervisor. The coach has no role in the approval process of the IDP.

Company: The company by whom an Instructor is employed. This is a non-referenced text entry field associated with an Instructor record.

Competency: Competencies are measurable capabilities that are required or recommended for effective performance. Assigning a competency to an Item indicates the User will be considered to have reached the indicated proficiency level upon successful completion of the Item. *See also: Competency Type.*

Competency Assessment: The assessment/rating of a User's demonstrated Competency, based on a rating scale. Users can record assessments for themselves or their peers using the Assessment Recorder, or an Assessment Survey may be used. Administrators can record assessments using the Competency Assessment Recorder. Completed Assessments are displayed in the User's Assessment History.

Competency Assessment Level: Rating given to a User that indicates his or her command of a specific competency. The rating scale is established in the Competency Assessment subsection of the Application Admin section (System Admin area).

Competency Category: A text label (e.g., Teamwork) used to group similar competencies when displayed in a view, assessment survey, or report.

Competency Profile: A grouping of competencies that can be associated with a job position or a function to help manage the skill sets required of Users with similar responsibilities. Competency Profiles can include minimum required mastery levels as aids to identifying gaps in a User's training.

Competency Type: There are four types of competencies: Skill - Physical or mental activities that support the performance of job-related activities. Knowledge - Facts and information needed to comprehend, recognize, and/or recall terms, rules, concepts, and symbols related to the performance of job-related activities. Ability - Capacity to meet physical and/or psychomotor requirements for job-related activities (usually an innate physical attribute). Attitude - Behavior required to perform job-related activities. *See also, Competency.*

Completion Status: Indicates the current status of an Item (or Scheduled Offering), relative to a User. The completion status appears with each Item in the Learning History (if complete) or the Learning Plan (if incomplete).

Contact Hours: The actual number of hours of instruction received during a Scheduled Offering. For example, an Item that begins at 8 AM and ends at 5 PM is nine hours in duration, but may only count as eight contact hours due to a one-hour lunch break. The delineation between contact hours and total hours allows accurate recording of actual training time compared to the total hours of resource usage.

Content Object: A database record indicating content that can be launched by Users, such as Web-based training, online documents, and executable files.

Content Package: A Content Package is any grouping of Content Objects, Exam Objects, and/or Objectives. Content Objects may belong to more than one Content Package.

Content Player: Any software application used by a workstation to open and/or play an online Content Object.

Copy Daily Segments: Duplicates an entire day full of segments within a Scheduled Offering, including all related data. The duplicate segments can then be edited to suit schedule needs.

Cost Center: The account code being debited in a financial transaction. If multiple cost centers are debited in a single transaction, the total percentage distribution MUST equal 100.

Cost Formula: The mathematical expression used by the AgLearn to calculate the cost of a selected event or transaction.

Cost Name: User-defined name for a cost with associated formula. The formula can be numeric, and/or another cost name with any combination of the following valid mathematical operators. Cost names are used in association with both Items and Scheduled Offerings. An example of a Cost Name: FOOD, with the Formula: Drinks+Lunch+Dinner.

CPE: Credit for Professional Education. Assigned by professional organizations as a way of tracking the volume and currency of specific, profession-related training.

Credit Hours: A method of tracking the successful completion of Items by weighting the relative value of each Item. Any number of credit hours can be associated with each Learning Item, to be awarded upon completion of the Item.

Critical Needs: Learning needs that have expired, are overdue, or will expire within the curriculum expiration notification threshold set by the system administrator.

Currency Pattern: Indicates the default format for currencies used in the selected Active Locale.

Curricula Requirement: A rule used to determine completion of a curriculum, such as “any three Items from a pool of five”, or “9 credit hours from a pool of four Items”.

Curriculum: A grouping of Items and/or sub-curricula that facilitates the assignment of related Items to a User. Curricula are also convenient for the assignment and tracking of mandatory retraining intervals.

Custom Report: A report created to return data on USDA-specific events not readily available in the standard reports that ship with AgLearn. Examples are Bulk Reports, and Incompletion Reports.

Custom Resource: A resource used in a Scheduled Offering that is not an instructor, material, equipment, or location.

D

Days Remaining: Number of days remaining before an Item on a User’s Learning Plan will be overdue.

Decimal Pattern: Indicates the default format of integers and specified decimal places in the selected active locale.

Delivery Method: The instructional method used to deliver learning. Examples might include Instructor-Led Training, Computer-Based Training, On-the-Job Training, and Self-Study. Delivery methods should be designed with reporting and information tracking needs in mind.

Delivery Offset Days: The number of days prior to the scheduled delivery date of the selected Item.

Direct Link: A link, created by an administrator in AgLearn, that guides the recipient directly to a specific page in AgLearn. Direct Links can be inserted into either e-mails or notifications.

Document: Any media (book, videotape, procedure, manual, audiotape, regulation, etc.) for which a record has been created in AgLearn. Documents may be associated with Items, curricula, tasks, or may stand alone.

Document Type: A category used to differentiate among training documents. Examples may include Vendor Manual, Regulation, Corporate Policy, Job Aid, etc. Reporting and information tracking needs should be kept in mind when creating document types.

Domain: An administrative unit in AgLearn, derived from USDA Organization Codes. AgLearn’s domain structure is roughly equivalent to USDA’s hierarchy. Domains determine which administrators can create and edit the objects contained within them. See also *Domain Restrictions.*

Domain Restriction: Defines the domains in which an administrator has authority. Domain restrictions may be assigned at the entity, function, and workflow levels for any role. See *Workflow*.

Domain Type: Used to determine which types of records may be assigned to a domain. For example, if a domain includes the Organization domain type then organization records can be assigned that domain. The domain types are: Users, Items, Curricula, Competencies, Competency Profiles, Scheduled Offerings, Facilities, Locations, Equipment, Instructors, Tasks, Documents, and Organizations.

Dynamic Survey: A survey used to assess a User's assigned competencies and job positions.

E

E-Signature Meaning Code: Used by Administrators to provide reasons and meaning for changing data that require electronic signatures. The Meaning Code enhances compliance with FDA 21 CFR Part 11 requirements ensuring the authenticity, integrity, and confidentiality of electronic records.

Effective Date: The date when a new or revised Item will be in effect for the calculation of Item completion statuses and curriculum statuses. By default, new Items have the current date as the effective date. Be aware that accepting the current date will make any curricula containing the Item incomplete, as Users will not have had time to complete the new or revised Item.

Employee Status: Indicates the User’s employment status (e.g., full-time, part time, temporary, seasonal, etc.).

Employee Type: Used to designate whether a User is a contractor, consultant, partner, etc.

Equipment: Reusable resources used in the delivery of Scheduled Offerings. Examples include overhead projectors, television monitors, and VCR players.

Equipment Status: The current status of a given piece of equipment, as defined in AgLearn, such as Operational, On Loan, Inoperative, Undergoing Maintenance, etc. Depending on the definition of an equipment status, equipment may not be available for scheduling.

Equipment Type: Categories by which different types of equipment may be grouped, such as Overhead Projector, VHS VCR, Video Monitor, etc.

Exam/Survey Object: A database record containing all details of an online examination or survey, including questions and objectives, percentage grade required for passing, electronic proctoring requirements, messages displayed to Users before and after the exam, the exam's launch method, information about usage, and other software behaviors.

External Event: A Learning Event for which there is no corresponding AgLearn Item. An example might include a college course, or a one-time seminar.

External Exam: Any exam created with a tool other than Plateau Question Editor.

External Reports: Reports generated using third party tools, then run in AgLearn.

F

Facility: A grouping of training locations. Facilities may be buildings, plants, branch locations, or any other logical way to group locations. The locations within a facility can share the facility's work week profile, holiday profile, equipment inventory (for equipment assigned to a specific facility, but not to a specific location within the facility), and material inventory.

Field Chooser: Describes the ability to add or remove columns in Search Results tables.

Force Incomplete: When checked for a curriculum, this check box requires AgLearn to calculate whether the status should be Complete or Incomplete based on the User's latest attempt at completing the Item. If the User's latest attempt is incomplete, the system will calculate the expiration and required dates based on the date/time of the last unsuccessful attempt, whether or not the initial retraining period has expired.

Free-floating competency: A competency assigned to a User independent of any competency profiles or job position.

Free-floating Item: An Item assigned to a User, independent of any curriculum.

G

Gap: The difference between a required level and the User's current level for a specific competency that is included in the User's competency profile. A negative gap indicates a learning need (e.g., the required mastery level is 4 and the User is assessed at a level of 3; the gap is -1 and a learning need exists).

Goal: A grouping of objectives in a development plan. A goal represents a high-level development milestone toward which a User may strive. Goals need not be realistically attainable (e.g., to become the perfect basketball player). A goal is supported by one or more objectives, each of which should be related to achieving the goal.

Grade: A value to indicate a User's examination score for a specific learning event. Grades may be numeric or ratings-based.

Group Instance: A collection of existing Scheduled Offerings. Group instances can be used as search criteria to help keep groups of Users together by enrolling them in the same Scheduled Offerings as a unit. For example, an Item has training sessions occurring simultaneously for the same Item. Each session has 2 Scheduled Offerings, but one session is in California and one is in New York. By adding a Group Instance for each location, Users cannot be inadvertently enrolled in one Scheduled Offering in New York, and another in California.

Grouping: A mechanism by which administrators can define how report output is displayed. For example, a User Item Completion Report may display By User, with each completed Item appearing under headings of User names; or By Item, with User names displayed under headings for each Item. Many standard reports grant the option to start each group on a new page.

H

Holiday: Calendar dates defined in AgLearn when training should not be scheduled at a learning facility. When you schedule an offering, AgLearn will not allow you to schedule the offering at a facility on a date that has been defined as a

holiday, unless you override the default. When you schedule an offering lasting two or more days, AgLearn will skip over any holidays unless you override the default.

I

Individual Development Plan (IDP): A collection of goals, objectives, and activities for a specific User. An IDP is a defined career and professional development plan, generally developed collaboratively between a User and his/her Supervisor. It reflects the current and future development needs for the User (employee), including both the employee's current position as well as desired future positions. It may include personal and professional goals. An approved IDP is related to the User's Learning Plan, but is broader, as it may include non-learning related activities as well.

Individual Development Plan (IDP) Template: A collection of IDP sections that may be established unique to each agency.

Initial Period: The number of days between the assignment of a learning requirement and its required completion. Each Item can have a default initial period that may be overridden on assignment.

Initiative: Allows executives and managers to define the goals for the Department or their respective agencies as a way of providing employees with guidance in the creation of Individual Development Plans.

Initiative Alignment: Describes the relationship of goals among different levels in the same agency hierarchy. For example, how the goals for APHIS-VS relate to the goals for all of APHIS.

Instructor: A human resource, defined in AgLearn, that is used to deliver learning.

Integer Pattern: Describes the default format of whole integers in an active locale.

Internationalization (I18N): The process of developing and implementing the application so it is easily adaptable to a specific local language or set of standards.

Inventory Type: All inventory tracked in AgLearn is defined as either a Material or an Item (distinct from Learning Item, as described below).

Item: Also referred to as Learning Item. An assignable unit of learning for which completion can be tracked and recorded. Items can be Web-based, Instructor-Led, blended, written materials, videos, etc.

Item Pool: A selected group of Items that make up a curriculum requirement.

Item Source: Typically identifies an Item's origin, such as developer or author, agency of ownership, etc.

Item Type: Logical groupings of learning activities useful to differentiate among potentially similar Items. Typical Item types include course, class, certification, OJT, interview, etc. Types should be defined with reporting and information tracking needs in mind, as the establishment of these categories can greatly increase the value of AgLearn's standard reports to your organization.

Iteration (online exam): An attempt by a User to complete an exam. For exams and surveys created in the Exam Definitions section, iterations can be limited to one by specifying, on the Summary tab, that the maximum number of allowable attempts for the exam is one. Instructor or administrator intervention can be made necessary before subsequent iterations by setting the Lock exam flags.

J

Job Location: The physical location where a User works.

Job Position: A definition or title of the employment position held by a User.

L

L10N (Localization): The process of adapting the application to a particular language (within a specific geographic and political region), and desired local standards like date, time, currency, etc. AgLearn is an internationalized application, developed so that localization is relatively easy to achieve.

Label: The displayed value that describes a specific entry on the User interface of the application.

Label Links: A link adjacent to a data entry field that names the field and acts as a tool to find the relevant data. Clicking a label button opens a page through which the administrator may search for allowable values.

Launch Method: Specify the file path (location) for online content and command line parameters (as needed) that are used when a User launches the Content Object. There are five different launch methods: Content Player, Document Type, AICC, Browser, and SCORM.

Learning Event: A User's completion, or attempted completion, of a Learning Item. For example, when attendance or participation in a Learning Item is recorded, a corresponding Learning Event is added to the User's Learning History. Learning Events can be either internal (based on an AgLearn Item) or external.

Learning History: A detailed listing of a User's recorded Learning Events.

Learning Needs: Learning Items assigned to a User's Learning Plan.

Learning Plan: A list of Items a User must complete, with target completion dates for each.

Locale: The amalgamation of a specific language's unique syntax and patterns for numbers, date, and time specifications, and standards for labels as well. See also *Active Locale*.

Localization (L10N): The process of adapting the application to a particular language (within a specific geographic and political region), and desired local standards like date, time, currency, etc. AgLearn is an internationalized application, developed so localization is relatively easy to achieve.

Location: A specific place within a facility where a Scheduled Offering or Segment is delivered. Locations could be classrooms, simulators, or conference rooms. See also *Location Types*.

Location Type: A logical grouping of locations. Typical examples might include Classroom, In- Plant Location, Simulator, or Auditorium. Location type data is used by AgLearn to provide a list of suitable locations when creating a Scheduled Offering. By default, AgLearn displays only locations of the type(s) indicated as suitable, but the default can be overridden, if necessary.

M

Master Inventory: A list of all Items and Scheduled Offerings available in your system. Catalogs are populated from the Master Inventory.

Materials: Supplies that are used up during learning, such as pens, handouts, giveaways, etc. Commonly known as consumables.

Maximum Assessment Rating: This field contains the maximum rating to use for competency assessments.

Maximum Registration: This indicates the maximum capacity for a Scheduled Offering.

Minimum Registration: The minimum number of enrollments required for a specific Scheduled Offering to occur. This field is strictly informational and will not impact the Scheduled Offering.

N

Next Action Date: See *Required Date*.

Nominator: The person authorized to propose rater(s) to assess a User.

Notification Database Tag: A variable used in the notification templates and syntaxes, replaced at run time by context-based data.

Notification Syntax: The notification tag definition used to perform looping. See also *Notification Database Tag.*

Notification Template: A pre-parsed message format that includes database tags to be populated at run time within a defined context. The templates may have multiple syntaxes.

Numeric Grading: Allows the creation of multiple score ranges, associating each range with a completion status. Users are assigned a completion status corresponding with their score for the Item in question. See also, *Ratings-based Grading*.

O

Objective Grade Value: The percentage of correct answers required for a User to have mastered (or passed) an Objective.

Objectives: A statement that specifies the skills acquired by the successful completion of the learning session. Effective objectives describe what Users must accomplish, focus their attention on critical components, guide trainers in the development of instructional materials, and specify the knowledge and skills on which the Users are to be evaluated.

Offering: See *Scheduled Offering.*

Offset: The time between the end of one segment and the beginning of the next for the same Scheduled Offering. For example, if a one-hour lunch break is to be inserted between the morning and afternoon segments of an offering, an offset of one hour can be indicated. AgLearn will automatically calculate the appropriate start and end time, leaving the one-hour gap for lunch.

Online Instance: The launching of an online Item for the first time. If the Item is not completed in one session, subsequent sessions will not create a new instance. Once an Item is completed and entered in Learning History, a subsequent launch will create a new online instance, which may also eventually become part of Learning History upon completion.

Online Item: Any Item that is available for Users via the Internet.

Online Settings: The parameters and settings for the delivery of online content.

Organization: Any virtual entity to which a User belongs, created solely for AgLearn administrative purposes. An Organization need not have any relationship to any actual USDA entity. The Organization entity can be used to reserve Slots, make purchases, grant User permission to use Account Codes, and control User access to Catalogs.

Organizational Group: A grouping of organizations.

P

Pattern: A format that describes the manner in which dates, time, and numbers are displayed throughout the application.

Pattern Type: The categories into which Patterns are grouped. The four Pattern Types in AgLearn are Integer, Decimal, Currency, and Percentage. See also *Pattern.*

Peer: In evaluations, a User or external person other than the User being evaluated, that User's supervisor, or one of that User's subordinates.

Pending List: A virtual listing of all Users with approvals currently pending.

Percentage Pattern: Used to indicate the default format of percentages in the selected active locale. See also *Pattern*.

Performance Review: Used to appraise, measure, and report on an individual employee's performance during a specified time period, such as a calendar or fiscal year.

Performance Review Process: The definition of how and when performance reviews are created and scheduled for employees.

Performance Review Template: The definition of the format and steps involved in a performance review, and the options available to the individuals involved.

Pool of Items: A defined group of Learning Items from which a User must select in order to satisfy a requirement.

Post-work materials: Consumables that must be sent to students and/or instructors after the completion of a Scheduled Offering. Examples might include surveys, follow-up reading material, etc.

Pre-work materials: Consumables that must be sent to Users and/or instructors in advance of a Scheduled Offering. Examples might include prerequisite reading material, pre-class assessment, etc.

Prerequisites: Items that must be completed before the current Item can be attempted.

Pricing Rule: The ID, description, and discount rate (percentage) for pricing Items in the Master Inventory and catalogs.

Proctor: An instructor who has been designated as an online examination monitor. Proctors are assigned proctor codes that enable them to unlock User machines in the event of certain events or conditions, such as a failing grade on an exam.

Profit Center: Refers to the entity/account that is being credited in a commercial transaction.

Published Price: The price published for a selected Item.

Q

Question: A single page that appears in an exam or survey, giving Users an opportunity to demonstrate their ability to distinguish the correct answer from among a choice of possible answers.

R

Rater: A User, supervisor, subordinate, or peer tasked with evaluating a User in AgLearn.

Rater Approver: The person designated to approve the proposed rater(s) for a User.

Rating Criteria: Text descriptions for each rating label in a rating scale.

Rating Label: Text labels that describe the meaning of each integer value of a particular rating scale.

Rating Scale: A range of continuous integer values (1..n). Multiple rating scales can be defined, each with different values for "n". A rating scale can be associated with more than one competency.

Ratings-based Grading: Allows multiple values to be used for grading, each of which may be associated with a completion status. Completion statuses may then be assigned based on where the User's examination score falls in a range. See also, *Numeric Grading*.

Region: An entity that describes the location of assets and Users. Regions do not need to be geographically based. If a facility is assigned to a region, the locations, equipment, and materials associated with the facility are also placed in that region.

Register: To place a User's name on the planned list of participants in a specific course offering.

Registration: To place a User's name on the planned list of participants in a specific Scheduled Offering.

Registration Status: The status of a User's registration. Types include: Enrolled, Waitlist, Pending, and Cancelled.

Report: Data generated in HTM, CSV, XML, or PDF from a specific query.

Request: A notification generated by a User to inform AgLearn of the User's need or desire for specific training. A request does not place a User in active registration or on the Waitlist for any specific instance. AgLearn may automatically create Requests when an Item is canceled or when a Scheduled Offering is delivered with Users still on the Waitlist who could not be accommodated.

Required Date: The date by which all Items related to the selected curriculum MUST be completed.

Requirement: An entity that allows Users to exercise flexibility when determining which training to complete to receive credit for a curriculum, essentially creating "electives". Examples of Requirements would be "any three Items from a pool of five" or "twelve credit hours from a pool of six Items". Requirements may be combined with mandatory Items and sub-curricula in the same curriculum. See also *Requirement Type.*

Requirement Type: A means of categorizing Requirements. There are three Requirement Types: Number of Hours of a Specific Credit Type, Number of Hours of a Specified Hour Type from a Pool of Items, and Number of Items from a Pool of Items. See also *Requirement*.

Requirements-based Curriculum: A curriculum for which the completion status is determined by Requirements, instead of a listing of mandatory Items. See also *Requirements.*

Resource: Assets needed to execute a Scheduled Offering, such as instructors, locations, equipment, etc.

Retraining Interval: The number of days that may pass between the time a User completes an Item in a Curriculum and when the Item must be completed again. This applies only to Items that require recurring training. If a retraining interval has been passed without completion, the Curriculum will become incomplete.

Retraining Period: Refers to the number of days between the last time a User completed an Item and when he or she must complete it again.

Review Flag: A system-generated flag automatically created when a document is revised. The flag indicates that an Item or curriculum related to the document has not been checked for any potential conflicts between the current information and information that may have been added, deleted, or changed by the revision.

Revision Date: The date of an Item's most recent revision. A new Item's Revision Date will be the date of origination.

Role: A combination of one or more workflows assigned to an administrator. See also *Workflows*.

Rule: Comprised of a Delivery Offset (Days) with a corresponding reimbursement price adjustment for the selected Item or material.

Rule-Level Retraining Period: Provides a mechanism to specify a retraining period separate from the Item retraining period. Selecting a rule-level retraining period overrides the Item level retraining periods for all Items associated with the selected requirement.

Rule Template: Provides "out-of-the-box" rule templates that may be used to quickly build curriculum requirements. The templates contain all the entities needed to create a valid requirement.

S

Schedule Block: Used to describe offerings that are not Item-based, do not appear in Catalogs, and do not have User events recorded against them. Schedule Blocks are often used to make Users and resources unavailable on the learning calendar, such as when equipment is undergoing maintenance, or a User is out of the office for an extended period of time, etc.

Scheduled Offering: An Item or learning event with a scheduled date and time.

SCORM: Sharable Content Object Reference Model (SCORM). Defines a Web-based Learning Content Aggregation Model and Run-Time Environment for learning objects. The SCORM is a collection of specifications adapted from multiple sources to provide a comprehensive suite of e-Learning capabilities that enable interoperability, accessibility, and reusability of Web-based learning content.

Search Page Selector Icon: A control that opens a search page where you can select an element from the database. The element you select will fill in the corresponding field to the right of the icon.

Security Profile: Pre-defined sets of security permissions (e.g., View, Create, Modify, etc.), called security functions, assigned to each AgLearn Administrator. Security profiles and domain privileges work together to define an administrator's permissions in the system.

Segment: Unit of division of an Item offering, based on duration, that facilitates variable resource scheduling. For example, a 40-hour course can be divided into five 8-hour segments, scheduled one segment per day for five days; divided into ten 4-hour segments, scheduled two segments per day for five days; into four 10-hour segments, scheduled one per day for four days, etc.

Sequence Number: Indicates the order in which the User is expected to complete the Items in the curriculum. Sequence Numbers do not apply to online Items.

Shopping Account ID: A unique ID created for individual Users and organizations to track their commercial transactions.

Site: A server site for the system. Sites have different URLs and allow different User populations to use the system.

SKU: Stock Keeping Unit (SKU). An inventory mapping mechanism used in catalogs.

Slot: A space reserved for a specified Organization in a Scheduled Offering. Slots are considered to be filled seats, even though the name of the User filling the seat may not yet be known.

Sorting: In a Report, allows for output to be displayed in various formats, allowing the administrator to choose which display best suits the needs of the specific report.

Subject Area: Categories for Items and competencies used to facilitate User searches for Items in the Catalog. Subject Areas group Items and Curricula with similar topics and/or interest groups.

Subject Area Pools: In rule-based curricula, provides the ability for a User to specify a select group of Items in a specific subject area that are associated with a curriculum requirement.

Subordinate: All Users who have the target User as a supervisor (either immediate or indirect– e.g., supervisor of supervisor).

Substitute: An Item that is credited as a similar Item in AgLearn. For example, if a Curriculum requires the completion of an Instructor-Led Basic Word Item, the Web-based version may be designated as a Substitute, allowing a User to pass the Web-based version and receive credit for the Instructor-Led Item.

Succession Planning: Used by supervisors to evaluate an employee's competencies against the competencies of a job position's incumbent, and to assign Items to help the employee achieve mastery of the competencies. It can also be used to evaluate a group of employees to determine which employee is most qualified to replace an incumbent.

Supervisor: A User designated to oversee another User's learning. A supervisor has the ability to log in to AgLearn Learning on behalf of their subordinates, view subordinates' learning information, and assign learning to them. If granted permission by the system administrator, supervisors can also record learning events for their subordinates.

System Reports: Standard reports that come with AgLearn.

T

Target: Indicates whether the student or instructor should receive the material.

Task: A task is a discrete unit of work with a definite beginning and end, which can be performed in a relatively short period of time, and which results in a finished product, a completed service, or a change in the work environment.

Total Hours: The number of hours of training contained in a Scheduled Offering, including non-instructional time. For example, an Item that meets from 8am to 5pm may have eight hours spent in training (contact hours), but nine total hours, indicating the number of hours the resources are in use; the extra hour takes into account the lunch hour.

Training Administrator: The User who creates assessment surveys and initiates the assessment processes.

U

User: Any person for whom a record has been created in the Users section of the User Management area, including employees, contractors, and others for whom you wish to keep learning records and to register for courses.

User Hours: The length of a Scheduled Offering (the sum of the segment durations).

V

V-Calendar: A file that can be sent as an e-mail attachment to automatically enter appointment information on the recipient's calendar. The recipient must use a VCalendar-compliant calendar program such as Microsoft Outlook, Netscape Calendar, or others.

vCalendar: The vCalendar specification defines a format for exchanging scheduling information in AgLearn. The vCalendar holds information about events that are normally used by group schedulers.

VLS: A file that can be sent to a person as an e-mail attachment that can automatically enter appointment information on the recipient's calendar. The recipient must use a VCalendar-compliant calendar program such as Microsoft Outlook, Netscape Calendar, or others.

W

Waitlist: A list of Users trying to register for a Scheduled Offering that has already reached a maximum capacity.

Work weeks: The days of the week during which training may be scheduled at a facility.

Workflow: A combination of a function applied to an entity. An example of a workflow is "View Users" (i.e., the function "VIEW" and the entity "USERS". A domain restriction is applied to each workflow to restrict access to certain data). See *Domain Restriction*.
