

# Custom Content Discussion

Agency-specific courseware

# Vista / Internet Explorer 7

- AgLearn SP3 is both Vista and IE7 compatible
- Newest SkillSoft course player is also compatible
- All AgLearn courseware (AgLearn Tour, Supervisors training, SF-182, ...) is also compatible

# Vista / Internet Explorer 7

- Agency-specific courseware is not necessarily compatible
- Please keep the above fact in mind, if:
  - Your agency considers moving to either platform
  - A user contacts you with issues with your custom content
  - You contract out any future content development

# Section 508 Compliance

- AgLearn is developing our own policy regarding Section 508 compliance
- We will work with the USDA Target Center to do so
  - Director Kevin Curtin has offered his expertise for this effort
- New policy will be included in the new content integration guide

# Content Integration Guide

- We are developing a new content integration guide
- Will be available for distribution to all developers: employee and contract
- All developers are required to have read and referenced guide prior to submitting content for integration (could be in a SOW)

# Content Integration Guide

- Will include instructions and considerations pertaining to:
  - SCORM, SCORM 2004, AICC
  - Naming conventions, case-sensitivity, file/folder structure
  - FTP, file versioning, revisions
  - Section 508 compliance
  - PQE
  - Much more

# Plateau Question Editor (PQE)

- Plateau's custom exam, survey and assessment tool
- Benefits
  - Item-level analysis
  - Seamless integration
- Shortcomings
  - Ease of use, lack thereof
  - Very little control over interface

# Documents, Attachments

- AgLearn can support any document format you wish to attach to courseware
- These documents must be 508 compliant
- Send with a completed content submission form and Team AgLearn can attach these documents as references for courses, scheduled offerings, etc.
